The Languages of the Soviet Union Bernard Comrie, 1981-06-04 A general account of the languages of the Soviet Union one of the most diverse multinational and multilingual states in the world as well as one of the most important There are some 130 languages spoken in the USSR belonging to five main families and ranging from Russian which is the first language of about 130 000 000 people to Alut spoken only by 96 in the 1970 census Dr Comrie has two general aims First he presents the most important structural features of these languages their genetic relationships and classification and their distinctive typological features Secondly he examines the social and political background to the use of functioning of the various languages in a multilingual state The volume will be of importance and interest to linguists and to those with a broader professional interest in the Soviet Union ***The Language of the Inuit*** Louis-Jacques Dorais, 2014-08-01 The culmination of forty years of research The Language of the Inuit maps the geographical distribution and linguistic differences between the Eskaleut and Inuit languages and dialects Providing details about aspects of comparative phonology grammar

and lexicon as well as Inuit prehistory and historical evolution Louis Jacques Dorais shows the effects of bilingualism literacy and formal education on Inuit language and considers its present status and future An enormous task masterfully accomplished The Language of the Inuit is not only an anthropological and linguistic study of a language and the broad social and cultural contexts where it is spoken but a history of the language s speakers **Historical Dictionary of the Inuit**

Pamela R. Stern,2013-09-26 The Inuit do not represent a very large population only 160 000 or so spread over a very large portion of the Arctic region and located in four different countries Although they are a people there are many variations from one group to the next and any study of them must consider both similarities and differences The Historical Dictionary of the Inuit introduces us to the Inuit as they actually are and not as they have been traditionally pictured and some would still like to see them looking after their traditional chores and engaged in time honored practices but rather as a modern people trying to shape their worlds in their own interest This second edition includes an updated chronology as well as an introduction to provide a broader view of who the Inuit are where they live and what they do But it is the dictionary section that is most interesting with many new informative entries on persons places events and institutions shedding light not only on the culture but also on the society economy and politics For those seeking further information there is a considerably expanded bibliography This book is an excellent access point for students researchers and anyone wanting to know more about the Inuit **The Languages of Native North America** Marianne Mithun,2001-06-07 This book provides an

authoritative survey of the several hundred languages indigenous to North America These languages show tremendous genetic and typological diversity and offer numerous challenges to current linguistic theory Part I of the book provides an overview of structural features of particular interest concentrating on those that are cross linguistically unusual or unusually well developed These include syllable structure vowel and consonant harmony tone and sound symbolism polysynthesis the nature of roots and affixes incorporation and morpheme order case grammatical distinctions of number gender shape control location means manner time empathy and evidence and distinctions between nouns and verbs predicates and arguments and simple and complex sentences and special speech styles Part II catalogues the languages by family listing the location of each language its genetic affiliation number of speakers major published literature and structural highlights Finally there is a catalogue of languages that have evolved in contact situations *Language Contact in the Arctic* Ernst Hakon Jahr,Ingvald

the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing

Health Transitions in Arctic Populations Peter Bjerregaard, T. Kue Young, 2008-06-28 The Arctic regions are inhabited by diverse populations both indigenous and non indigenous Health Transitions in Arctic Populations describes and explains changing health patterns in these areas how particular patterns came about and what can be done to improve the health of Arctic peoples This study correlates changes in health status with major environmental social economic and political changes in the Arctic T Kue Young and Peter Bjerregaard seek commonalities in the experiences of different peoples while recognizing their considerable diversity They focus on five Arctic regions Greenland Northern Canada Alaska Arctic Russia and Northern Fennoscandia offering a general overview of the geography history economy population characteristics health status and health services of each The discussion moves on to specific indigenous populations Inuit Dene and Sami major health determinants and outcomes and finally an integrative examination of what can be done to improve the health of circumpolar peoples Health Transitions in Arctic Populations offers both an examination of key health issues in the north and a vision for the future of Arctic inhabitants

Documenting Endangered Languages Geoffrey Haig, Nicole Nau, Stefan Schnell, Claudia Wegener, 2011-11-30 The rapid decline in the world's linguistic diversity has prompted the emergence of documentary linguistics While documentary linguistics aims primarily at creating a durable accessible and comprehensive record of languages it has also been a driving force in developing language annotation and analysis software archiving architecture improved fieldwork methodologies and new standards in data accountability and accessibility More recently researchers have begun to recognize the immense potential available in the archived data as a source for linguistic analysis so that the field has become of increasing importance for typologists but also for neighbouring disciplines The present volume contains contributions by practitioners of language documentation most of whom have been involved in the Volkswagen Foundation's DoBeS programme Dokumentation Bedrohter Sprachen The topics covered in the volume reflect a field that has matured over the last decade and includes both retrospective accounts as well as those that address new challenges linguistic annotation practice fieldwork and interaction with speech communities developments and challenges in archiving digital data multimedia lexicon applications corpora from endangered languages as a source for primary data typology as well as specific areas of linguistic analysis that are raised in documentary linguistics

Predicative Possession Leon Stassen, 2009-05-07 This pioneering work draws on data from over 400 languages from a wide range of language families to establish a typology of four basic types of predicative possession It examines their interdependence with other typologies and explores varieties of related grammaticalization processes

Variations on Polysynthesis Marc-Antoine Mahieu, Nicole Tersis, 2009 This work is comprised of a set of

papers focussing on the extreme polysynthetic nature of the Eskaleut languages which are spoken over the vast area stretching from Far Eastern Siberia on through the Aleutian Islands Alaska and Canada as far as Greenland The aim of the book is to situate the Eskaleut languages typologically in general linguistic terms particularly with regard to polysynthesis The degree of variation from more to less polysynthesis is evaluated within Eskaleut Inuit Yupik vs Aleut even in previously insufficiently explored domains such as pragmatics and use in context including language contact and learning situations and over typologically related language families such as Athabascan Chukotko Kamchatkan Iroquoian Uralic and Wakashan A Survey of Word Accentual Patterns in the Languages of the World Harry van der Hulst, Rob Goedemans, Ellen van Zanten, 2010 This volume contains a wealth of information on the word accentual metrical stress phenomena that we encounter in natural languages Two types of information will be supplied language profiles in tabular form and survey articles Of the total of 10 chapters in Part I 3 are general in nature while the other 7 describe and analyze word accentual systems in all continents The volume's point of departure is a database called StressTyp StressTyp developed into a database on word prosodic systems of the languages of the world The over 500 languages representing a wide geographical distribution taken from the StressTyp database will be represented in this volume For all these languages information regarding identity sources and stress location s will be included accompanied by some examples in nearly all cases These language data packages will be organized by language family This information constitutes Part II of the volume
