Sidney Hook Philosopher Of Democracy And Humanism:

Sidney Hook Paul Kurtz, 1983 Sidney Hook is considered by many to be America's most influential philosopher today. An earlier defender of Marxism, he became its most persistent critic, especially of its totalitarian and revolutionary manifestations. A student of John Dewey's pragmatism, Sidney Hook has written extensively about most of the live moral, social, and political issues of the day. He has known and debated many of the leading thinkers of the twentieth century, such as Max Eastman, Bertrand Russell, Albert Einstein, Jacques Maritain, Mortimer Adler, Robert Hutchins, Paul Tillich, Noam Chomsky, and John Kenneth Galbraith. Throughout his career, which spans a half a century, Sidney Hook has been a stalwart defender of the social democratic philosophy of freedom. At a time when secular humanism has been under heavy criticism from the New Right, he stands out as the leading philosophical representative of the position. Virtually all of the essays in this volume were written especially for it. The list of contributors includes Irving Kristol, Antony Flew, Nathan Glazer, Lewis Feuer, Daniel Bell, Richard Rorty, Ernest Nagel, Edward Shils, Seymour Martin Lipset, Ernest van den Haag, and others, all of whom testified that their thinking has been profoundly influenced by Sidney Hook's wisdom and insight. These original essays are wide ranging in scope, but all are focused on Hook's philosophy or on subjects in which he has shown an abiding interest: socialism, democracy, equality, quotas, higher education, academic freedom, humanism, liberal education, natural and human rights, and pragmatism. The book also contains a complete up-to-date bibliography of the writings of Sidney Hook.

Philosophy and Public Policy Sidney Hook, 1980 Like John Dewey, his mentor and friend, Sidney Hook shares the classic conception of philosophy as the pursuit of wisdom. A philosopher is concerned ultimately with the conception of the good life in a good society. In these essays, extending over many years, Hook illustrates the activity of the philosopher in the cave of social life. He brings to bear the tools of reflective analysis on dominant social and political issues: human rights, the role of personality and leadership in history, the attempt to defend freedom as we seek to preserve and extend the welfare state, and a criticism of the common premise of historical materialism shared by both Marxists and their opponents. Most significantly, Hook addresses the relation between morality and religion and the place of religion in democratic society. A secular and naturalistic humanism, he contends, generates an authentic, reliable commitment to the democratic faith.

Young Sidney Hook Christopher Phelps, 2005 In the first biography of philosopher Sidney Hook since his death in 1989, Christopher Phelps vividly describes the neglected early thought and political history of this important New York intellectual. Phelps chronicles Hook's early years and explores the contributions young Hook made to social theory, ethics, politics, epistemology, and discussions of scientific method. 12 photos

Dialectic Roy Bhaskar, 2008-07-02 *Dialectic The Pulse of Freedom* is now widely regarded as a classic of contemporary philosophy This book first published in 1993 sets itself three main aims the development of a general theory of dialectic of which Hegelian dialectic can be seen to be a special case the dialectical enrichment and deepening of critical realism viz into the system of dialectical critical realism and the outline of the elements of a totalizing critique of Western philosophy The first chapter clarifies the rational core of Hegelian dialectic Chapter 2 then proceeds to develop a general theory of dialectic Isolating the fallacy of ontological monovalence i.e a purely positive account of being Roy Bhaskar then shows how absence and other negating concepts such as contradiction have a legitimate and necessary ontological employment He then goes on to give a synoptic account of key dialectical concepts such as the concrete universal to sketch the further dialectical development of critical naturalism through an account of what he calls four planar social being and following consideration of the dialectical critique of analytical reason he moves on to the real definition of dialectic as absencing absence and in the human sphere the axiology of freedom Chapter 3 extends and deepens critical realism's characteristic concerns with ontology science social science and emancipation not only into the realms of negativity and totality but also into the fields of reference and truth spatio temporality tense and process the logic of dialectical universalizability and on to the plane of ethics where it articulates a combination of moral realism and ethical naturalism

whereby consideration of elemental desire involves commitment to the eudaimonistic society This is then followed in Chapter 4 by a sublime discussion of key moments in the trajectory of Western philosophy the tradition of which can now be seen to be based on what the author calls the unholy trinity of the epistemic fallacy or the reduction of being to knowledge primal squeeze or the collapse of structure and alethic truth and ontological monovalence *Life without a Ground: A Praxis of Being-in-the-World* Daniil Koloskov, 2024-07-18 This book argues for the pragmatist thesis of the primacy of praxis on a phenomenological basis Demonstrating the relevance of phenomenology it provides a systematic overview of the contemporary pragmatic landscape taking into account not only a family of neo pragmatic approaches but also the current pragmatic readings of phenomenology This volume offers an innovative formulation of the primacy of practice thesis based on the genetic reformulation of Heidegger s notions of disclosure Dasein and average intelligibility Das Man Investigating the dynamic interrelation among those notions the author arrives at the phenomenological conception of forms of life or average background practices and argues that a form of life is not a pragmatic condition of meaningfulness but an outcome of the dynamic process of meaning formation This text concludes that the formation of meaning has no overarching origin but sources from the bundle of disparate practical spaces and is anarchic in nature It appeals to students and researchers working in phenomenology and philosophical anthropology
