Now, in *The Science of Premonitions*, Dossey uses cutting-edge science to make a convincing case that premonitions are real, common and helpful. Then Dossey explores research on mindfulness and meditation to show readers how they can cultivate and take advantage of premonitions. Helping Those Experiencing Loss Robert J. Grover Professor Emeritus,Susan G. Fowler,2011-07-13 This book provides a guide for grieving youth and adults as well as extensive descriptive lists of recommended professional literature resources

Grief caused by loss is both a very common human experience and a highly individualized one. For example, children experience a number of losses that are unique to their young age such as sibling and parent death, adoption or divorce and should be given special consideration by professionals and parents helping them in these situations. For gay, lesbian or cohabiting heterosexual couples that suffer the loss of a partner, societal standards often deny the survivors in these relationships the right to grieve.

Helping Those Experiencing Loss: A Guide to Grieving Resources is a book like no other, supplying compassionate information for navigating the emotional distress that every man and woman will experience in their lifetime as well as a comprehensive guide to the literature of bereavement and grieving. It explains the grieving process, interpreting the results of research on the topic in plain language and addressing specific groups: children, young adults, parents who have lost a child, adults who have lost spouses, and the aging population.

The Voice Within Richard Hardoin, Judith A. Henslee, Carrie Sheehan, 2007-09. Each of the authors brings a unique perspective, one being the parent of an infant who died of SIDS long before it was defined and who has brought understanding and comfort to untold thousands of other families so stricken. The others are proven investigators in the field. It is clear from their analyses that SIDS parents experience premonitions of doom nearly ten times more often than parents whose babies do not die. Clearly, this is a signal for continued intensive study of the phenomenon.

Helping Bereaved Parents Richard G. Tedeschi, Lawrence G. Calhoun, 2004. First Published in 2004. Routledge is an imprint of Taylor & Francis, an informa company.

Encyclopedia of Clinical Child and Pediatric Psychology Thomas H. Ollendick, Carolyn S. Schroeder, 2012-12-06. The Encyclopedia of Clinical Child and Pediatric Psychology, children, adolescents and their families with a focus on Psychology, is intended to be an authoritative and comprehensive resource that provides up-to-date information on a broad array of problems and issues related to behavioral and family problems of children. Of particular importance to clinical child psychologists is the field of clinical child and pediatric psychology. It is understanding of the basic psychological needs of children and the social contexts that influence child development and adjustment. Thus, typical and atypical graduate students in training as well as diverse medical development and the impact of life stresses are of interest and concern for the clinical child psychologist who works with young persons but who have limited information on a particular topic. Inasmuch as the scope of child psychology is interested in the psychological needs of children, clinical child and pediatric psychology is extensive. A range of topics is included that cover typical and atypical illness.
