Delusions and the Madness of the Masses Lawrie Reznick, 2010-11-16 We all think that we can tell the difference between someone who is mad or whom psychiatrists call psychotic and someone who is sane But can we really tell who is mad and who is not Do we really know what madness is and how it should be recognized Have psychiatrists made a sensible distinction between the patient who believes that aliens are beaming messages to him from a foreign planet and the religious fanatic who believes God communicates to him via automatic writing Is there a difference between the paranoid patient who believes that the FBI is after him and the sizeable proportion of our normal population that believe that the US government orchestrated the 9 11 bombings Here Reznick hopes to shed light on the delusions of the masses those delusions that are common to everyday people living so called ordinary lives He provides an understanding of madness and the psychological processes that drive us to adopt delusions arguing that it is a mistake to view only schizophrenic patients as delusional while excluding large groups of society from such an analysis If we abandon the idea that whole communities cannot share a delusion we can come to a better understanding about why the world is such a dangerous place

Scurvy Jonathan Lamb, 2016-11-21 An intellectual history of scurvy in the eighteenth century Scurvy a disease often associated with long stretches of maritime travel generated sensations exceeding the standard of what was normal Eyes dazzled skin was morbidly sensitive emotions veered between disgust and delight In this book Jonathan Lamb presents an intellectual history of scurvy unlike any other probing the speechless encounter with powerful sensations to tell the story of the disease that its victims couldn t because they found their illness too terrible and in some cases too exciting Drawing on historical accounts from scientists and voyagers as well as major literary works Lamb traces the cultural impact of scurvy during the eighteenth century age of geographical and scientific discovery He explains the medical knowledge surrounding scurvy and the debates about its cause prevention and attempted cures He vividly describes the phenomenon and experience of scorbutic nostalgia in which victims imagined mirages of food water or home and then wept when such pleasures proved impossible to consume or reach Lamb argues that a culture of scurvy arose in the colony of Australia which was prey to the disease in its early years and identifies a literature of scurvy in the works of such figures as Herman Melville Samuel Taylor

Coleridge Francis Bacon and Jonathan Swift Masterful and illuminating Scurvy shows how the journeys of discovery in the eighteenth century not only ventured outward to the ends of the earth but were also an inward voyage into the realms of sensation and passion

Problems from Reid James Van Cleve, 2015-08-25 In this systematic study James Van Cleve

expounds Thomas Reid's positions and arguments on topics in the philosophy of perception knowledge and action taking interpretive stands on points where his meaning is disputed and assessing the extent to which his ideas make valuable contributions to issues philosophers are discussing today Primary and Secondary Qualities Lawrence Nolan, 2011-04-07

Fourteen new essays trace the historical development of the distinction between primary and secondary qualities a key topic in metaphysics epistemology and philosophy of perception The volume starts with the ancient Greeks discusses virtually all major figures of the early modern era and reflects on the place of the topic in philosophy today **Mindmelding** William Hirstein, 2012-01-26 In this important and controversial new book William Hirstein argues that it is possible for one person to directly experience the conscious states of another by way of what he calls mindmelding Drawing on a range of research from neuroscience psychology and philosophy he presents a highly original new account of consciousness Foundation for a Natural Morality Edmund Wall, 2018-10-15 Few philosophers attempt to establish that there is an evaluative and moral realm They make these major assumptions without argument This plays into the hands of moral nihilists and certain other moral skeptics A major obstacle that prevents philosophers from developing such arguments is the long standing view that one cannot derive an ought from an is that is one cannot begin with purely descriptive non evaluative propositions and deduce an evaluative or moral proposition In this book Edmund Wall develops arguments for evaluative and moral principles His deductive reasoning begins with certain purely descriptive and non evaluative propositions concerning human nature establishing a basic moral principle of human life and a basic moral principle of knowledge By providing such deductive arguments for basic moral principles Wall makes considerable progress in establishing a sure foundation for morality He further develops his case by responding to a plethora of anticipated objections against his two arguments and by delineating the advantages of his own moral approach over a number of influential moral theories and competing accounts of moral reasoning *Knowledge, Virtue, and Action* Tim Henning, David P. Schweikard, 2013-09-23 This volume brings together recent work by leading and up and coming philosophers on the topic of virtue epistemology The prospects of virtue theoretic analyses of knowledge depend crucially on our ability to give some independent account of what epistemic virtues are and what they are for The contributions here ask how epistemic virtues matter apart from any narrow concern with defining knowledge they show how epistemic virtues figure in accounts of various aspects of our lives with a special emphasis on our practical lives In essence the essays here put epistemic virtues to work
