Dominance and Antitrust Policy.-/Michael Utton Michael Utton, 1994 *An Institutional Assessment of Antitrust Policy* Ignacio De León, 2009-01-01 Antitrust policy nominally plays an instrumental public interest role The generally accepted notion is that it is a government instrument designed to intervene in relatively unregulated markets in order to preserve rivalry among independent buyers and sellers Competition authorities are supposed to restrain business conduct that exercises monopoly power aimed at excluding competitors or exploiting consumers and clients Thus it can be said although few pro market theorists make the insight explicit that antitrust provisions reveal mistrust of the capacity of markets to promote social welfare The inner logic enforcement mechanisms and practical outcomes of antitrust provisions are all intrinsically contradictory to the natural dynamic course of market functioning In Dr De Leon s challenging thesis this mistrust of the market lies at the root of antitrust policy giving rise always to a preference towards predicting the result of impersonal market forces rather than interpreting the entrepreneurial behaviour which creates those forces And it is in Latin America that he finds the powerful evidence he needs to support his case From the formative years of Latin American economic institutions during the Spanish Empire economic regulations far from being driven by the pursuit of promoting free trade and economic freedom have been conceived enacted and implemented in the context of deeply anti market public policies trade mercantilism and government dirigisme The so called neoliberal revolution of the 1990s triggered by the Washington Consensus did not really change the interventionist innuendo of these policies but merely restated the social welfare goal to be achieved the pursuit of economic efficiency Dr De Leon presents his case against the assumption that consumer welfare orientated policies such as antitrust do really promote entrepreneurship and market goals Paradoxically antitrust enforcement has undermined the transparency of market institutions in the name of promoting market competition The author s provocative analysis marshals several sets of facts in support of his thesis including the actual functioning of antitrust policy as reflected in case law in various Latin American countries the preference of merger control over other less intrusive forms of market surveillance the constrained role of competition advocacy against government acts and the

ineffective institutional structure created to apply the policy Among the many specific topics treated are the following government immunity strategic industries state owned enterprises politically influential groups measurement of market concentration the burden of proof of social welfare benefits the role of joint trade associations and professional guilds institutional arrangements that favour collusion selective distribution sector regulation erosion of property rights marginal role of courts in the antitrust system leniency programs and privatized public utilities The growing significance of Latin America in the context of economic globalization endows this book with huge international interest Written by a leading authority on the topic this is the first book that presents a detailed description of Latin American antitrust law and policy as it has been developed through numerous judicial opinions A wide variety of audiences around the world will find it of extraordinary value competition law specialists scholars and students of the subject policymakers and politicians in Latin America as well as all interested lawyers jurists and economists

Market Power in EU Antitrust Law Luis Ortiz

Blanco,2011-12-02 The notion of market power is central to antitrust law Under EU law antitrust rules refer to appreciable restrictions of competition Article 101 1 Treaty on the Functioning of the European Union TFEU ex Article 81 1 EC Treaty the elimination of competition for a substantial part of the market Article 101 3 TFEU ex Article 81 3 EC dominant positions Article 10 2 TFEU ex Article 82 EC and substantial impediment to effective competition in particular by creating or reinforcing a dominant position Article 2 of the EU Merger Regulation At first sight only the concept of dominant position relates to market power but it is the aim of this book to demonstrate that the other concepts are directly linked to the notion of market power This is done by reference to the case law of the EU Courts and the precedents of the European Commission The author goes on to argue that for very good reasons clarity and enforceability among others the rules should be interpreted in this way Beginning with market definition the book reviews the different rules and the different degrees of market power they incorporate Thus it analyses the notion of appreciable restriction of competition to find a moderate market power obtained by agreement among competitors to be the benchmark for the application of Article 101 TFEU ex Article 81 EC It moves on to the concept of dominance under Article 102 TFEU ex Article 82 EC which is equivalent to substantial or significant market power and then focuses on the old and new tests for EU merger control Finally it addresses the idea of elimination of competition in respect of a substantial part of the market Article 101 3 TFEU ex Article 81 3 b EC in which the last two types of market power Article 102 TFEU ex Article 82 EC and EU Merger Regulation converge To exemplify this an in depth study of the notion of collective dominance is conducted The book concludes that a paradigm of market power exists under the EU antitrust rules that both fits with past practice and provides for a useful framework of analysis for the general application of the rules by administrative and even more importantly judicial authorities in the Member States under conditions of legal certainty

Dominance and Monopolization Rosa Greaves,2017-05-15 Antitrust and competition law is a fast moving area of law and the subject of extensive academic research The aim of this volume is to

select articles as tools for understanding how antitrust and competition law is applied to unilateral conduct which is harmful to the consumer and to the competitiveness of the market The articles examine the meaning of dominance and monopolisation and show that although legal and economic rules have been developed to establish whether undertakings hold such strong market positions it is often difficult to determine with certainty that the undertaking being investigated meets the threshold The various debates on pricing and non pricing conduct are also represented as are the conflicts that have arisen regarding the exercise of intellectual property rights by powerful undertakings particularly in the context of the new economies The volume includes scholarly articles published on both sides of the Atlantic and enables a greater understanding of the application of antitrust and competition law from the point of view of economics and politics

Antitrust Law Journal ,1986 **Law and Economics in Europe** Klaus Mathis,2013-11-11 This anthology illustrates how law and economics is developing in Europe and what opportunities and problems both in general and specific legal fields are associated with this approach within the legal traditions of European countries The first part illuminates the differences in the development and reception of the economic analysis of law in the American Common Law system and in the continental European Civil Law system The second part focuses on the different ways of thinking of lawyers and economists which clash in economic analysis of law The third part is devoted to legal transplants which often accompany the reception of law and economics from the United States Finally the fourth part focuses on the role economic analysis plays in the law of the European Union This anthology with its 14 essays from young European legal scholars is an important milestone in establishing a European law and economics culture and tradition *The Basics of Antitrust Policy* Roger Alan Boner,Reinald Krueger,1991 Competition policy known in the United States as antitrust policy is designed to preserve competition among independent buyers and sellers in relatively unregulated markets The movement toward economic liberalization around the world has created a growing awareness of competition policy as a means of supporting efficient markets Competition policy strives to ensure that barriers to competition and trade once removed by the State are not resurrected by private action This paper discusses the central notions of industrial organization and competition policy in an international context The need for brevity prevents a comprehensive review of the country specific principles of antitrust policy law and enforcement Instead the paper describes the main concepts of industrial organization as they apply to antitrust and shows the diversity of antitrust policies in design and practice illustrating the theoretical and practical strengths and weaknesses of the various approaches to antitrust The paper also discusses the relationship between competition policy and industrial and trade policies *Trade Secrets and Market Dominance* Peicheng Wu,2025-09-30 This book explores the circumstances where the use of trade secrets may constitute the abuse of market dominance under competition law Trade secrets have been valuable intangible assets for companies in the modern market While it is imperative to protect trade secrets noteworthy is that the exploitation of trade secrets may lead to anti competitive concerns and may require antitrust intervention By examining
