Ecological Characterization of the Central and Northern California Coastal Region: pt.1. Habitats. pt.2. Community composition lists ,1981 Systematic Botany Monographs ,1997 Illustrated Handbook of Succulent Plants: Crassulaceae Urs Eggli, 2012-12-06 The present volume covering the Crassulaceae marks the completion of the successful handbook series that presents a complete coverage of the so called other succulents i e of all taxa of suc culent plants with the exception of the Cactaceae It is with pride that this volume is now put before the public Together with its predecessors it is the fruit of a truly international project Not only does the present volume constitute the first complete synopsis of the large and horticulturally important family Crassulaceae published since the treatment by Berger 1930 but the handbook series as a whole is a landmark in succulent plant literature. The history of the project that eventually led to the publication of the present handbook series was outlined in the Preface to the Monocotyledons Volume published in the summer of 2001 A short summary of its history will therefore suffice Handbooks devoted to succulent plants including cacti have a long standing tradition First treatments covering the family Cactaceae were already published in the 19th century but the first handbook dealing with the so called other succulents authored by Hermann Jacobsen was only published in 1954 1955 then called Handbuch der sukkulenten Pflanzen A revised and en larged English edition was published in 1959 and was repeatedly reprinted subsequently The Sonoran Desert Tortoise Thomas R. Van Devender, 2019-04-15 One of the most recognizable animals of the Southwest the desert tortoise Gopherus agassizii makes its home in both the Sonoran and Mohave Deserts as well as in tropical areas to the south in Mexico Called by Tohono O odham people komik c ed or shell with living thing inside it is one of the few desert creatures kept as a domestic pet as well as one of the most studied reptiles in the world Most of our knowledge of desert tortoises comes from studies of Mohave Desert populations in California and Nevada However the ecology physiology and behavior of these northern populations are quite different from those of their

southern Sonoran Desert and tropical cousins which have been studied much less Differences in climate and habitat have shaped the evolution of three races of desert tortoises as they have adapted to changes in heat rainfall and sources of food and shelter as the deserts developed in the last ten million years This book presents the first comprehensive summary of the natural history biology and conservation of the Sonoran and Sinaloan desert tortoises reviewing the current state of knowledge of these creatures with appropriate comparisons to Mohave tortoises It condenses a vast amount of information on population ecology activity and behavior based on decades of studying tortoise populations in Arizona and Sonora Mexico and also includes important material on the care and protection of tortoises Thirty two contributors address such topics as tortoise fossil records DNA analysis and the mystery of secretive hatchlings and juveniles Tortoise health is discussed in chapters on the care of captives and original data are presented on the diets of wild and captive tortoises the nutrient content of plant foods and blood parameters of healthy tortoises Coverage of conservation issues includes husbandry methods for captive tortoises an overview of protective measures and an evaluation of threats to tortoises from introduced grass and wildfires A final chapter on cultural knowledge presents stories and songs from indigenous peoples and explores their understanding of tortoises As the only comprehensive book on the desert tortoise this volume gathers a vast amount of information for scientists veterinarians and resource managers while also remaining useful to general readers who keep desert tortoises as backyard pets It will stand as an enduring reference on this endearing creature for years to come
