*Musical Prodigies* Gary E. McPherson, 2016-08-26 Child prodigies have been observed in a range of disciplines particularly music mathematics chess and art The question of what makes a prodigy has long been controversial Some have dismissed the notion of giftedness arguing that most famous prodigies had strong parental cultural and environmental influences that helped them develop their extraordinary abilities One recent theory suggested that anyone could achieve outstanding success in whatever endeavour they wanted with a minimum of 10 000 hours of practice Nevertheless many studies of prodigies have suggested that there might be strong underlying cognitive differences regarding their use of short term versus long term memory spatial memory imagery and language Whatever the arguments for those interested in child development prodigies remain a fascinating subject of study when considering questions about creativity intelligence development and the impact of nature versus nurture This book breaks new ground in presenting the first scientific exploration on the topic of musical prodigies It brings together research from a range of disciplines including psychology neurobiology and genetics to provide a thorough exploration of prodigious talent In addition the book includes fascinating case studies of prodigies and also looks at their long term development into adulthood many child prodigies have had problems making the transition into adolescence and adulthood Musical prodigies will be required reading for anyone interested in child development music and the arts

**Affective Dimensions in Chemistry Education** Murat Kahveci, MaryKay Orgill, 2015-01-08 This is a unique resource for those wishing to address the affective domain as they research and solve problems in chemistry education Contributions by world leading experts cover both fundamental considerations and practical case studies This work fills a gap in the literature of chemistry education which so far has focussed mainly on the cognitive domain The affective domain refers to feelings based constructs such as attitudes values

beliefs opinions emotions interests motivation and a degree of acceptance or rejection It can affect students interest in science topics and their motivation to persevere in learning science concepts      *Creativity, Psychology and the History of Science* H.E. Gruber, Katja Bödeker, 2005-12-28 Creativity Psychology and the History of Science offers for the first time a comprehensive overview of the oeuvre of Howard E Gruber who is noted for his contributions both to the psychology of creativity and to the history of science The present book includes papers from a wide range of topics In the contributions to creativity research Gruber proposes his key ideas for studying creative work Gruber focuses on how the thinking motivation and affect of extraordinarily creative individuals evolve and how they interact over long periods of time Gruber s approach bridges many disciplines and subdisciplines in psychology and beyond several of which are represented in the present volume cognitive psychology developmental psychology history of science aesthetics and politics The volume thus presents a unique and comprehensive contribution to our understanding of the creative process Many of Gruber s papers have not previously been easily accessible they are presented here in thoroughly revised form      **Erika Landau's Contribution to the History of Gifted Education** Hanna David, 2025-06-23 This book describes some of the most critical issues in gifted education i e gender inequity concerning giftedness examinations and the boys girls ratio The book also discusses the background of the gifted child s family including their parents education and number of their siblings The book s findings are based on quantitative studies concerning 5 15 year old gifted children participating at the Erika Landau Institute for Gifted and Creative Children and Youths in Tel Aviv Israel from 1968 until 2003 It discusses aspects such as the advantages of affirmative action standards in gifted education because girls who score lower than boys on the admission test to a gifted program usually have better social skills persistence and fine motor skills and thus integrate successfully in a gifted group with boys of higher intelligence The book s second part addresses Landau s academic work in multiple languages and offers a critique that helps educators and mental health experts build gifted programs      *The Routledge International Handbook of Innovation Education* Larisa V. Shavinina, 2013-03-25 The Routledge International Handbook of Innovation Education is the international reference work on innovation education and potentially opens an entirely new direction in education The overall goal of the handbook is to address the question of how to develop innovators in general and how to develop the innovative potential of today s young people      *The Natural Musician* Dina Kirnarskaya, 2009-06-11 One of the great mysteries of music is how it affects us in multitude of ways Whether talking about our individual tastes as listeners or individual differences as performers what are the psychological qualities that can turn some people into great musicians but not others Is it down to genes sheer hard work or some other quality in the individual The Natural Musician is the story of how we become composers performers or just discriminating listeners It searches for those psychological traits essential for turning one into a musician Unlike many others Kirnarskaya does believe in the existence of talent but argues that it is due to multiplicative factors which she describes analyses and shows how to test She also sheds light on the essence and origins of perfect pitch

examines the triumphs and tortures of musical prodigies and considers the implications of her theories for the teaching of music After a foreword from the legendary conductor Gennady Rodhestvensky the book looks at our basic musical faculties how we perceive sounds distinguish their pitch and structure and recognise rhythm It then examines the nature of musical empathy what it is that allows us to perceive and emotionally connect with music The second part of the book focuses on the creative processes behind writing music The third section deals with music education looking at the role of innate and inherited characteristics in the formation of talent and considering why many who excel at an early age burn out later on The book ends exploring how musical development can shape the human brain strengthening other cognitive faculties including those unrelated to music This is a book that will fascinate anyone with an interest in music and musicians from the fields of music psychology and education to musicians themselves whether amateur and professional
