Hansen, Steven Ashby, Irene Baug, 2015-02-05 The medieval marketplace is a familiar setting in popular and academic accounts of the Middle Ages but we actually know very little about the people involved in the transactions that took place there how their lives were influenced by those transactions or about the complex networks of individuals whose actions allowed raw materials to be extracted hewn into objects stored and ultimately shipped for market Twenty diverse case studies combine leading edge techniques and novel theoretical approaches to illuminate the identities and lives of these much overlooked ordinary people painting of a number of detailed portraits to explore the worlds of actors involved in the lives of everyday products objects of bone leather stone ceramics and base metal and their production and use in medieval northern Europe In so doing this book seeks to draw attention away from the emergent trend to return to systems and global models and restore to centre stage what should be the archaeologists most important concern the people of the past
