Conference at The Hague ,1922 *Origins and Development of Kinetic Art. Translated from the French* Frank Popper,1968 *Designing Kinetics for Architectural Facades* Jules Moloney,2011-06-14 Architectural facades now have the potential to be literally kinetic through automated sunscreens and a range of animated surfaces This book explores the aesthetic potential of these new types of moving facades Critique of theory and practice in architecture is combined here with ideas from kinetic art of the 1960 s From this background the basic principles of kinetics are defined and are used to generate experimental computer animations By classifying the animations a theory of kinetic form called state change is developed This design research provides a unique and timely resource for those interested in the capacity of kinetics to enliven the public face of architecture Extra material including animations can be seen at www.kineticarch.net/statechange

Parker Gary Genosko,2025-08-25 This is the first book about the life and work of Harley Parker 1915 1992 Canadian museum exhibition designer typographer and painter As friend and collaborator of media luminary Marshall McLuhan Parker s influence extended far beyond the realm of art In this groundbreaking intellectual biography Genosko shows that Parker s unique perspective on museums is based on his application of McLuhan s medium theory to exhibition design His emphasis on the role of the senses anticipated much of contemporary sensory studies which will bring his work into focus for a new generation of scholars A highlight of Parker s career as Head of General Display at Toronto s Royal Ontario Museum 1957 1968 was his Hall of Invertebrate Fossils which opened to considerable acclaim in early 1967 That same year he mounted a multimedia gallery at the Museum of the City of New York These milestones underscore Parker s profound impact on museum studies and communication theory Central to this comprehensive study is the rediscovery of Parker s lost manuscript The Culture Box which would have confirmed his role as a central figure in the Toronto School of Communication had it not been lost for some fifty years Scholars in communication cultural and museum studies will benefit from this exploration of Parker s thought as will those interested in sensory studies and the enduring value of McLuhan s ideas

Utopia and Dissent in West Germany Mia Lee,2019-01-22 Just as Chancellor Konrad Adenauer was seeking re election on a campaign of no experiments art avant garde groups in West Germany were reviving the utopian impulse to unite art and society Utopia and Dissent in West Germany examines these groups and their legacy Postwar artists built international as well as intergenerational networks such as Fluxus which was active in Düsseldorf Wiesbaden and Cologne and the Situationist International based in Paris These groups were committed to undoing the compartmentalization of everyday life and the isolation of the artist in society And as artists recast politics to address culture and everyday life they helped forge a path for the West German extraparliamentary left Utopia and Dissent in West Germany traces these connections and presents a chronological map of the networks that fed into the extraparliamentary left as well as a geographical map of increasing radicalism as the locus of action shifted to West Berlin These two maps show that in West Germany artists and their interventions in the structures of everyday life were a key starting point for challenging the postwar order **Companion to Contemporary Musical Thought** John Paynter,1992 **Making Images Move** Gregory

in Motion Kensho Miyoshi, 2020-11-23 The movement of designed objects is not just something purely functional but also triggers a wide range of sensations A curtain swaying gently in the wind can cause the onlooker to feel easy and relaxed as if it was he or she who is floating in the air This imagined projection caused by the perception of moving objects is called kinesthetic empathy In this study which followed on from a dissertation at the School of Design Research in London the author investigates the esthetics of movement by documenting his own design based learning and research process in terms of research through design using the experimental cooperation with puppet players as an example He thereby creates a framework that allows designers to observe the esthetics of objects in motion as a trigger of feelings

Sculptural Materiality in the Age of Conceptualism MarinR. Sullivan, 2017-07-05 Sculptural Materiality in the Age of Conceptualism is structured around four distinct but interrelated projects initially realized in Italy between 1966 and 1972 Yayoi Kusama's Narcissus Garden Michelangelo Pistoletto's Newspaper Sphere Sfera di giornali Robert Smithson's Asphalt Rundown and Joseph Beuys's Arena These works all utilized non traditional materials collaborative patronage models and alternative modes of display to create a spatially and temporally dispersed arena of matter and action with photography serving as a connective material thread within the sculpture it reflects While created by major artists of the postwar period these particular projects have yet to receive substantive art historical analysis especially from a sculptural perspective Here they anchor a transnational narrative in which sculpture emerged as a node a center of transaction comprising multiple material phenomenon including objects images and actors When seen as entangled polymorphous entities these works suggest that the charge of sculpture in the late postwar period came from its concurrent existence as both three dimensional phenomena and photographic image in the interchanges among the materials that continue to activate and alter the constitution of sculpture within the contemporary sphere
