**The Origins of Violence** Anatol Rapoport, 2020-02-18 In this fundamental analysis Rapoport asks Why do we have wars Doesn't humanity always seem on the verge of self annihilation Is there something in human genetic structure that makes people want to kill each other Perhaps this impulse is a matter of good versus evil or just plain human nature Rapoport moves beyond clichés by claiming that the sources of modern violence reside in the imbalance between a lag in the system of values inherited from the past and the structure of science and technology that awaits no revision of values to move ahead As a result Rapoport argues that the study of war and peace should be considered a science just like biology or for that matter political science The same rules of empirical engagement and experimentation should apply Before we can have a theory of peace we need a methodology of conflict Using the writings of thinkers who have made significant contributions to the predominant ideas and ideals of our society Rapoport weaves together the strands of independent thought and research into a single thought provoking work After investigating the whys of violence using ideological psychological strategic and systemic perspective Rapoport moves to an in depth analysis of possible varieties of conflict resolution He explores such mechanisms as mediation education and applying the results of scientific research He documents the impact of ideologies countervailing dominant ones that place obstacles in the way of peacemaking Rapoport argues that conciliation and game theories can be utilized to replace the concept of winner take all or total victory The Origins of Violence is a needed contribution to our understanding of warfare and provides a forward looking perspective that can be of wide use to each of the policy sciences starting with military strategy and ending with international development **Origins of Aggression**

Willard W. Hartup, Jan de Wit, 1978 No detailed description available for Origins of Aggression *Sigmund Freud's psychodynamic theory. The origins of aggression* Temba Munsaka, 2014-06-11 Seminar paper from the year 2014 in the subject Psychology Social Psychology grade A Atlantic International University course PhD Project Management language English abstract The origins of aggression dominate psychological debate Psychologists are divided on what really is the cause of aggression in human behavior This has evoked the inconclusive nature v nurture debate on the origins of aggression The psycho dynamic theory is a psychological theory Sigmund Freud 1856 1939 and his later followers applied to trace and explain the origins of aggression Sigmund Freud's psycho dynamic theory is founded on the assumption that human behavior is propelled by thoughts and feelings that lie in our sub conscious mind Aggression refers to action or behavior intended to

cause harm to a person toward whom it is directed Thus aggression manifests itself in varied forms which can be verbal attacks violent acts and threats to unleash destruction However the psycho dynamic theory has been criticized for over emphasis on innate personality at the exclusion of external effects in an individual s environment which may predispose them to aggressive behavior This paper analyses Sigmund Freud s psycho dynamic theory in explaining the origins of aggression The paper further argues that the psycho dynamic theory has its own inherent shortcomings when it comes to explaining the origins of aggression A wholesome explanation of the origins of aggression can be achieved if theories such as the externally stimulated aggression and learned aggression theory are also considered as they offer complementary alternative aggression explanations      Understanding Aggression Azadeh Aalai,2012      **Origins of Human Aggression** Gerard G. Neuman,1987

*The Origins of Violence in Mexican Society* Christina J. Johns,1995-05-30 Establishes the interconnections between the economic structure and state violence in Aztec and Conquest Mexico from pre contact to present day patterns of state organized crime      Understanding Children's Development Peter K. Smith,Helen Cowie,Mark Blades,2015-12-14

Understanding Children's Development is the UK s best selling developmental psychology textbook and has been widely acclaimed for its international coverage and rigorous research based approach This dynamic text emphasizes the practical and applied implications of developmental research It begins by introducing the ways in which psychologists study developmental processes before going on to consider all major aspects of development from conception through to adolescence      **The Psychology of Conflict and Combat** Ben Shalit,1988-03-25 Shalit draws on the research he conducted as field psychologist in the Israeli military to offer an original behavioral model of combat that accounts for the fighting potential of an individual or group His model is based on the appraisal process that the individual undertakes in combat conditions to assess a situation whether it concerns him or not and regardless of his role It is through this process that the individual makes a judgment taking into consideration his past experience knowledge and expectations that in turn leads to a course of action Shalit pinpoints and describes specific aspects of the psychology of combat and conflict including the motivation to act in combat with special reference to the aggression drive the definition of an enemy and the effects such appraisals have on behavior the situational factors in heroic acts and discipline and its affects on combat efficiency      The Long View of Crime: A Synthesis of Longitudinal Research Akiva M. Liberman,2007-11-30 Criminology is concerned with many questions which are inherently longitudinal For example what is the life course of criminal behavior Is there one general offending pattern or multiple offending patterns over time Which early risk factors if any are strongly predictive of criminal behavior Can early intervention prevent the development of a criminal career Longitudinal research allows examination of within person relationships over time and allows the examination of developmental sequences and timing This volume examines longitudinal research in relation to crime and delinquency The main body of Longitudinal Studies on Crime and Delinquency is seven reviews which were commissioned to answer two simultaneous questions What have we learned

from recent longitudinal research on crime and delinquency that a we did not know before and b that capitalizes on the longitudinal nature of the data Topics for review were chosen with an eye to three considerations a a critical mass of studies addresses the question b an emphasis on longitudinal methods c policy relevance of the question Three additional chapters include an introduction and overview an essay reflecting on the findings highlighted in the volume from the broad perspective of the evolutionary ecological theory of crime and a Future Directions chapter The volume also includes an appendix which relates each of the reviews to the body of longitudinal studies reviewed in the volume This not only shows which studies have informed which topics but also highlights analytic opportunities that have not yet been explored and where this information could be applied in future research
