**Orion** Richard Turrell McMullen, 1878 **Shrouds of the Night** David L. Block, Kenneth C. Freeman, 2009-01-05 The Milky Way has captivated the mind of multitudes ever since the beginning of time Particularly striking are its apparent dusty gaping voids With the advent of near infrared technology astronomers have discovered an awesome new view of its structure and of the structure of other galaxies around us Galaxies are encased within Shrouds of the Night shrouds or veils of cosmic dust which have given us a totally incomplete picture of what our majestic Universe actually looks like In this book we feature some of the remarkable early photographic work of masters such as Isaac Roberts and Edward Barnard before presenting to the reader the unmasked dust penetrated view of our cosmos using some of the world's largest ground and space based telescopes Martian Outpost Erik Seedhouse, 2010-04-11 Mars Outpost provides a detailed insight into the various technologies mission architectures medical requirements and training needed to send humans to Mars It focuses on mission objectives and benefits and the risks and complexities that are compounded when linked to an overall planet exploration program involving several expeditions and setting up a permanent presence on the surface The first section provides the background to sending a human mission to Mars Analogies are made with early polar exploration and the expeditions of Shackleton Amundsen and Mawson The interplanetary plans of the European Space Agency NASA and Russia are examined including the possibility of one or more nations joining forces to send humans to Mars Current mission architectures such as NASA's Constellation ESA's Aurora and Ross Tierney's DIRECT are described and evaluated The next section looks at how humans will get to the Red Planet beginning with the preparation of the crew The author examines the various analogues to understand the problems Mars bound astronauts will face Additional chapters describe the transportation hardware necessary to launch 4-6 astronauts on an interplanetary trajectory to Mars including the cutting

edge engineering and design of life support systems required to protect crews for more than a year from the lethal radiation encountered in deep space NASA's current plan is to use standard chemical propulsion technology but eventually Mars crews will take advantage of advanced propulsion concepts such as the Variable Specific Impulse Magnetoplasma Rocket ion drives and nuclear propulsion The interplanetary options for reaching Mars as well as the major propulsive maneuvers required and the trajectories and energy requirements for manned and unmanned payloads are reviewed Another chapter addresses the daunting medical problems and available countermeasures for humans embarking on a mission to Mars the insidious effects of radiation on the human body and the deleterious consequences of bone and muscle deconditioning Crew selection will be considered bearing in mind the strong possibility that they may not be able to return to Earth Still another chapter describes the guidance navigation and control system architecture as well as the lander design requirements and crew tasks and responsibilities required to touch down on the Red Planet Section 3 looks at the surface mission architectures Seedhouse describes such problems as radiation extreme temperatures and construction challenges that will be encountered by colonists He examines proposed concepts for transporting cargo and astronauts long distances across the Martian surface using magnetic levitation systems permanent rail systems and flying vehicles In the penultimate chapter of the book the author explains an adaptable and mobile exploration architecture that will enable long term human exploration of Mars perhaps making it the next space based tourist location

**Orion's prophetic guide and weather almanac [formerly The British weather almanac].**, 1865 **Birthing Orion** Dax Murray, 2018-10-18

Too fondly have I loved these stars all these galaxies we once called ours The relationship between the two goddesses is tempestuous at best Seya is the embodiment of a galactic creation and Tia of cosmic destruction They create and they destroy and then they do it all over again Seya and Tia use their divine magic to make pulsars and nebula to set planets spinning around stars and bind a galaxy together with a central black hole But when one of Seya's favorite stars goes missing she blames Tia What was once a symbiotic cycle of life and death becomes a game of broken hearts and promises betrayed These tensions and insecurities are explored in sonnets and villanelles the arc of their love tracked in meter and verse These poems touch on queer love betrayal trust acceptance and forgiveness cast against a backdrop of stardust and celestial detritus A beautiful love story in verse

*Project Orion* George Dyson, 2003-04 *Project Orion* describes one of the most awesome might have beens and may yet bes of the space age This is essential reading for anyone interested in government bureaucracies and the military industrial complex Sir Arthur C Clarke **Turn Right At Orion** Mitchell Begelman, 2008-01-07

This ingenious book is the account of an epic astronomical journey a tale told by an early twenty first century human sailor among the stars The account is discovered as an alien translator's note reveals sixty million years in earth's future the product of one man's amazing revelatory and occasionally perilous space odyssey Astrophysicist Mitchell Begelman takes the reader to far distant shores across a vast ocean of time in a narrative that zips along at just below light speed We travel to the center of the Milky Way

witness the births and deaths of stars almost perish in the crushing forces at the perimeter of a black hole and all the while Begelman explains in clear and vibrant prose the way things work in the cosmos A powerful imaginative work that is thoroughly grounded both in history and in the latest in astrophysical thinking and observation Turn Right at Orion is serious science that reads like fiction
