The Luckiest Orphans

Hyman Bogen, 1992 Founded in 1860 the Hebrew Orphan Asylum of New York was the oldest largest and best known Jewish orphanage in the United States until its closing in 1941 This book the first history of an orphanage ever published tells the story of the HOA s development from a nineteenth century institution into a model twentieth century child care facility Because of the humane and benevolent attitude of the New York Jewish community toward its orphans the harsh authoritarianism and Dickensian conditions typical of contemporary orphanages were gradually replaced there by a nurturing approach that looked after the religious social and personal needs of the children Though primarily an instrument of social control the HOA was also an expression of Jewish ethnicity Its history is set in a larger context that includes the life and character of the New York Jewish community the city s immigrant population the social and economic conditions of the time the child saving efforts of other groups and the debate over institutional versus foster care Drawing from HOA archives published sources and his personal experience as a resident from 1932 to 1941 Hyman Bogen brings a unique perspective to child saving efforts in the late nineteenth and early twentieth centuries His compelling tale portrays daily life for those who lived and worked in such institutions He illustrates how an enlightened orphanage rather than crushing the spirit of its young residents can help children to gain self esteem and become secure adults Bogen s tale will be of particular interest to urban and social historians to city and government officials and to social workers as well as to anyone concerned with the growing crisis in child care options

An Orphan in History Paul Cowan, Rachel Cowan, 2002 After growing up as a fully assimilated Jew Paul Cowan embarks upon a journey to discover and appreciate his true identity and heritage traveling a path from his Park Avenue home to nineteenth century Lithuania to a contemporary Israeli kibbutz

Orphans and Abandoned

Children in European History Nicoleta Roman, 2017-11-08 In a world dominated by poverty a central characteristic has been the plight of orphans and abandoned children Over the centuries State Church and individuals have all attempted to

tackle the issue but can we trace any change over the course of time when it comes to the welfare system intended for these disadvantaged children and acts of philanthropy What kind of social policies did States follow and what were the main differences between countries and regions Drawing on historical evidence across several centuries and a range of European countries the contributors to this volume provide a transnational overview *The Bristol Orphan Houses, Ashley Down: the History of the New Orphan Houses on Ashley Down Bristol Under the Direction of Mr. George Müller* William Elfe Tayler, 1872 *A History of St. Paul's Orphans' Home of the Reformed Church in the United States, Greenville, Mercer County, Pa* David B. A Brief Economic History of Colonial Nsw Gordon Beckett, 2012 Any economic history written in the 21st century of colonial Australia will highlight the economic gains made by Governor Macquarie especially in the broad planning approach to efficiently and effectively use convict labour for economic improvement in the colony Whilst Macquarie tried to make the colony safe and attractive to investors and entrepreneurs he used the various Government business enterprises such as the Lumber and Timber Yards the Stone Quarry and the naval yard to supplement the gains already accomplished by the Government Farms and the Government Store the Commissariat to underpin outstanding economic growth and impressive GDP in the colonial economy The various aspects of the colonial economy make interesting reading not to mention the comparison of the Aboriginal economy of 1788 with the white economy The study is a different approach to the colonial economy and is the first of an impressive series of studies of each of the aspects of the economy between 1788 and 1835

The Patchwork of World History in Texas High Schools Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States
