Orthogeriatrics Comprehensive Orthopedic Care For The Elderly Patient:

Orthogeriatrics Paolo Falaschi, David R. Marsh, 2016-09-19 This book focuses on orthogeriatrics a topic that has received little attention in the literature to date As active members of the Fragility Fracture Network FFN the editors and most of the authors of this book have gathered all essential expertise on hip fracture management in a single volume The 14 chapters provide a complete overview of how to approach fractures in elderly patients starting with the epidemiology of hip fractures and subsequently addressing osteoporosis surgery anesthesia medical management of frailty and peri operative complications Attention is also given to rehabilitation and nursing as well as to the psychological evaluation of the patient and the caregivers thus emphasizing the importance of a multidisciplinary approach Thanks to its clinical and practice oriented nature the book will especially be of interest to residents and young geriatricians as well as orthopaedic surgeons anesthesiologists and nurses dealing with elderly fracture patients in all parts of the world *Post-Operative*

Neuropsychiatric Disorder Chun Yang, Yiyang Zhang, Jie Sun, Yasushi Satoh, Diansan Su, 2024-03-08 Post operative neuropsychiatric disorder POND is a series of neuropsychiatric symptoms strongly linked to the triggering factors anesthesia and surgery exposure The clinical manifestations mainly include delirium cognitive dysfunction and affective disorders after surgeries POND is the most frequent postoperative complication in elderly patients especially those undergoing major surgery such as cardiac and hip surgeries It has been well recognized that oxidative stress abnormal changes in neurotransmitters and synapses as well as A deposition and phosphorylation of tau protein are probably involved in the mechanisms of POND Although studies on the POND are in full swing underlying pathogenesis is still ambiguous because of conflicting results and controversial evidence Currently patients with POND still fail to receive effective treatments although clinical studies in this field have focused on these potential therapeutic targets in the last decades Most importantly more than 320 million people are scheduled to undergo surgeries every year globally it is therefore an urgent need to develop and provide effective therapeutic strategies for patients with POND **National Library of Medicine Current Catalog**

National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70 **Comprehensive Geriatric Assessment** Alberto Pilotto, Finbarr C. Martin, 2017-12-29 This book offers an up to date review on the principles and practice of multidimensional assessment and management of the older individual which represents the cornerstone of modern clinical practice in the elderly The early chapters cover the main elements and scope of the comprehensive geriatric approach and explain the pathways of care from screening and case finding through to in depth assessment and treatment planning Subsequent chapters review the evidence of how best to apply the multidimensional assessment and management approach in defined healthcare settings and within specific clinical areas such as cancer and surgery Finally the education and training challenges are reviewed and the prospects for future clinical service and research in this important field are examined The book is very timely given the recent advances in application of this approach which reflect the growing

international realization that older people are core business in many clinical areas where the role of specialist geriatric medicine has hitherto been limited Accordingly the book will be relevant to a wide range of clinicians The authorship comprises many of the best known and widely published experts in their respective fields *Geriatric Surgery and Perioperative Care* Gabriella Bettelli,Riccardo A Audisio,2024-11-19 Geriatric Surgery and Perioperative Care presents clear evidence to support regulatory and financial decisions in the light of the value based care principles The book outlines standards of care for elderly patients undergoing surgery as well as minimal requirements for modern management aimed at delivering cost effective healthcare It opens with the epidemiology and patho physiological changes of aging and their impact on anesthesia and surgery Subsequent chapters guide readers through the surgical process addressing preoperative optimization intraoperative procedures and management and postoperative principles including ICU care The book concludes with ethical principles care models and hospital design to support a golden silver surgery using a team based approach This title is an important resource for healthcare professionals practitioners and others pursuing current strategies and methods for successful perioperative care of the elderly Presents clear evidence to support regulatory and financial decisions in the light of the value based care principles Provides a synthesis of optimal evidence based methods to support and treat geriatric surgical patients through all stages of the clinical path Outlines ethical principles and care models for managing all aspects of geriatric anesthesia and surgery Covers details on aging processes pathophysiological changes induced by aging and effective preventive strategies to improve clinical outcome and reduce costs Ageing Care in the Community: Current Practices and Future Directions Kenneth Nai-kuen FONG,Kar-wai TONG,2024-02-09 Population ageing is a challenge to societies worldwide in terms of healthcare social support community infrastructure and more With one of the longest life expectancies in the world Hong Kong will soon see a dramatic increase in the number of older residents together with a decrease in the old age dependency ratio This book provides a timely examination of the current status and services available for Hong Kong s ageing population in four key areas general healthcare needs such as health promotion and lifestyle modifications specific healthcare needs including care of chronic conditions and hip fractures psychosocial needs for older people with intellectual disabilities and impairments as well as the needs of their caregivers and environmental and technological needs in relation to universal design information and communication technology and telehealth Drawing from a wide range of experience in local professional settings combined with international best practices the authors offer holistic evidence based solutions for the development of an age friendly society where elders can age in place at home in their communities These suggestions will be useful for policy makers healthcare practitioners social workers care workers as well as older people and their families not only in Hong Kong but globally Osteoporosis and Fragility Fractures, An Issue of Orthopedic Clinics Jason A. The Frail Surgical Patient Virginia Boccardi, Luigi Marano, 2025-01-27 This book explores the transdisciplinary approach to general surgery for the frail patient promoting the use of a geriatric model of care in general surgical settings and thus proposing a gerosurgery approach in frail

persons beyond chronological age Aging frailty and surgical needs are increasing dramatically worldwide while surgeons are daily facing with the trouble of the trade off between short term outcomes and efficacy of surgery in older persons However recent studies have clearly shown that age itself is not a prognostic risk factor for complications after elective surgery in older patients whereas cognitive or functional frailty is Neither a referring physician nor an assessing surgeon should deny patients surgery purely based on chronological age Instead decisions should be based on a CGA comprehensive geriatric assessment with a precise picture of the patient considering the cognitive functional nutritional socioeconomic and affective status Recent studies examining the use of preparative CGA in surgical patients showed encouraging results on postoperative outcomes in old and or frail patients The most compelling current evidence comes from the orthopaedic community which has embraced the idea of multidisciplinary team care Preoperative evaluation postoperative care pain control nutritional support delirium prevention mobilization and rehabilitation are necessary also in general surgery An expert multidisciplinary team including geriatricians anaesthesiologists specialist nurses physiotherapists and nutritionists should mandatorily support surgeons With this book the reader will have an exhaustive overview and will gain essential practical knowledge on how best to manage the surgical and frail patient and how to develop clinical systems that do so reliably

The Very Old Critically Ill Patients Hans Flaatten,Bertrand Guidet,Hélène Vallet,2022-08-03 This book part of the European Society of Intensive Care Medicine ESICM textbook series provides detailed up to date information on the care of the critical ill very old 80 years patients in the ICU The very old are expanding fast in our populations and this is mirrored in our hospitals and ICUs as well During the last decade a lot more information about the group of critical ill elderly has been published and several large networks cooperate in performing multinational studies in this field one of them with roots in the ESICM This book will give readers knowledge about the current epidemiology of elderly ICU patients in patients centered outcomes and factors affecting these outcomes A large part is devoted to age related changes in vital organ functions and the specific geriatric syndromes like frailty cognitive decline reduced activity of daily living sarcopenia and immunosenescence This is all important for the practicing intensivists to know about In addition specific groups of the elderly in the ICU are also described like the elderly patients with trauma or sepsis The book is written jointly by intensivists and geriatricians often working in teams and originating from many different countries This herald a new era in the collaboration between these two groups in order to improve care and rehabilitation We have a lot to learn from each other as both groups have a holistic view of our patients although with different perspectives This book should be of value for all working in adult ICUs physicians as well as nurses It will hopefully lead to a better understanding of the particular challenges posed by this important sub group of ICU patients and how to manage his group in a way that combine respect for life as well as death and includes patients and caregivers in this process

Cheuk,2018-11-26 As the Baby Boomers age concerns over healthcare systems abilities to accommodate geriatric patients grow increasingly challenging This is especially true with the population deemed to be the oldest of the old specifically those over the age of 85 Unlike any other time in history this demographic is the fastest growing segment of most developed countries In the United States the oldest old is projected to double from 4.3 million to 9.6 million by 2030 The increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions diet public health and advancement in medical care With this we have seen a steady decline in the age specific prevalence of vascular and heart diseases stroke and even dementia Older persons are healthier today than their counterparts decades ago More importantly than in any other age group the care of the oldest old must be individualized management decisions should be made taking into consideration the older persons expressed wishes quality of life function and mental capacity The inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases multiple co existing pathologies and neuro degenerative diseases The oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old Furthermore among the oldest old physiologically they are more diverse than other segments of the population Their demographic characteristics are unparalleled and different compared to that of the younger old Several studies have drawn attention to the differing attitudes among health professionals towards elderly people and many show prejudice because they are old As a result the use of age as a criteria in determining the appropriateness of treatment is of very limited validity yet there are limited resources that guide physicians through these challenges This book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic This book is designed for geriatricians primary care physicians junior medical officers specialty geriatrics nurses and gerontologists It is divided into 3 sections General Considerations Chronic diseases and Geriatric Syndromes Each chapter provides a summary of important and essential

information under the heading of Key Points Case studies are included in some of the chapters to highlight the principles of management **Geriatrics Models of Care** Michael L. Malone,Marie Boltz,Jonny Macias Tejada,Heidi White,2024-05-30

Following the success of the previous edition the second edition of Geriatrics Models of Care is the definitive resource for systems based practice improvement for the care of older adults Several new models of care have been published in the last eight years new outcomes have emerged to better understand the impact of existing models and with the rise of the Age Friendly Health Systems movement promoting organized efforts to prepare our health care settings for older individuals is of more importance than ever The second edition is organized based on the practice setting along a continuum of care hospital transitions from hospital to home outpatient settings and the emergency department This book also highlights long term care models which is an important part of the continuum of care for older Americans Further this edition features models that address the needs of vulnerable populations This new section will describe a spectrum of programs for older adults who have Alzheimer s disease or Parkinson s disease Other models describe best practices for older adults undergoing surgery or those who want to remain functioning independently in their home A defining feature of this book is that each chapter follows a standard template 1 the challenge which led to the model 2 the patient population served 3 core components of the intervention 4 the role of interdisciplinary health professionals 5 evidence to support the intervention 6 lessons learned in the implementation and dissemination of the model 7 implications for family caregivers and communities particularly underserved and diverse communities and 8 how each model will provide care across the continuum during an entire episode of care In addition each chapter features a call out box with practical tips for implementing the model **Rockwood and**
