Orthoptics Proceedings Of The Second Int:

Orthoptics: Proceedings of the Second International Orthoptic Congress, Amsterdam, 11-13 May, 1971 Joyce Mein, Jos J. M. Bierlaagh, T. E. A. Brummelkamp-Dons, 1972 **Simultaneous Horizontal and Cyclovertical Strabismus Surgery**

M.H. Gobin, J.J.M. Bierlaagh, 2012-12-06 Thirty years ago our attention was drawn to the alphabetical incomitances in strabismus. As an elevation in adduction is the most frequent incomitance we decided to start treating these incomitances. A weakening procedure of the inferior oblique muscle seemed indicated. However, since we wanted to prevent a torsional overcorrection with a head tilt, we displaced the scleral insertion of the oblique muscle towards the equator of the globe. This way the torsional action of the muscles is saved. A weakening of the horizontal rectus muscles was systematically added, making it a simultaneous horizontal and cyclovertical surgery. Our way to deal with strabismus developed into a coherent entity, and the interest of colleagues encouraged us to write it down. We decided to publish a textbook with a theoretical and an extensive practical part. Our approach is based on thirty years of exclusive strabological work: half time academic and half time private practice. More than 6500 results were analysed and the majority have been published. The concerned publications are referred to at the end of the first chapter. Private practice allowed to benefit from the fact that patients were operated on by the same surgeon and remained in personal contact during follow up. **Current Catalog** National Library of Medicine (U.S.), 1993 **Diagnosis and Management of Ocular Motility Disorders** Alec M. Anson, Helen

Davis, 2014-01-28 This comprehensive clinically grounded textbook now in its fourth edition supports orthoptists and ophthalmologists in decision making through the patient care process from presentation to discharge. Written by authors with extensive experience in teaching and research, *Diagnosis and Management of Ocular Motility Disorders* offers a clear and practical overview of assessment and management principles and further explores the clinical features of specific disorders from amblyopia and infantile strabismus to supranuclear and infranuclear disorders as well as other miscellaneous disorders of ocular movement. A brand new chapter on congenital cranial dysinnervation disorders reflects recent advances in gene mapping and increased understanding of this condition, and a new appendix provides surgical dose tables for easy reference. Now in full colour throughout with additional diagrams and photographs of surgical techniques, this remains the key reference text for orthoptic and ophthalmic professionals managing patients with eye movement disorders. *Orthoptics*, 1972 *The Second Congress of the International Strabismological Association* International Strabismological Association, 1976

Orthoptics and Ocular Examination Techniques William Edwin Scott, Denise D. D'Agostino, Leslie Weingeist Lennarson, 1983 **Ocular Vascular Occlusive Disorders** Sohan Singh Hayreh, 2015-02-18 This book provides a

comprehensive account of the pathogenesis, clinical features and management of ocular vascular occlusive disorders, with the focus very much on the scientific evidence. This offers a sound basis for addressing the many controversies that surround these disorders, which collectively constitute the most common cause of visual impairment or blindness. The book is divided

into two sections the first of which addresses the basic science and encompasses vascular anatomy blood supply and flow and retinal tolerance time to acute ischemia The second clinical section covers the presentation clinical features diagnosis and treatment of the full range of vascular occlusive disorders of the retina the choroid the anterior segment of the eye ophthalmic manifestations of carotid artery disease and the optic nerve Ocular Vascular Occlusive Disorders written by a distinguished world leader in the field will be invaluable for general ophthalmologists and particularly for retina specialists neuro ophthalmologists and researchers

Convergent Strabismus L.E. Evens, 2012-12-06 When the Board of Directors of the Belgian Ophthalmological Society in its session of November 26th 1978 asked me to prepare a report on strabismus to be presented at the joint meeting of the Dutch and Belgian Ophthalmological Societies to be held on June 13th 1981 I felt greatly honored but still more overwhelmed by the immensity of the task I took advantage of the complete liberty given to me by the Board of Directors first to limit the work to one particular form of strabismus i e the convergent comitant form second to seek the help of what I thought to be the best strabologists in the Low Countries third to aim not at an encyclopedic treatise but at a practical volume destined to the general ophthalmologist This volume is thus limited to the various aspects of convergent strabismus more accurately of comitant convergent strabismus The omission of the word comitant is purposely made to avoid the difficulties accompanying the explanation of this term and all the acrobatics needed to explain that most comitant strabismus are not completely comitant The choice of this particular form of strabismus seems logical First of all it is the most common form of strabismus On the other hand most principles concerning examination and treatment can with some modifications be applied to other forms of strabismus
