Translatio Studiorum , 2013-03-27 The present volume collects seventeen case studies that characterize the various kinds of translation within European culture over the last two millennia Intellectual identities establish themselves by means of a continuous translation and rethinking of previous meanings a sequence of translations and transformations in the transmission of knowledge from one intellectual context to another This book provides a view on a wide range of texts from ancient Greece to Rome from the Medieval world to the Renaissance indicating how the process of *translatio studiorum* evolves as a continuous transposition of texts of the ways in which they are rewritten their translations interpretations and metamorphosis all of which are crucial to a full understanding of intellectual history **Young People's Visions and**

Worries for the Future of Europe Dagmar Strohmeier, Harriet R. Tenenbaum, 2019-02-25 In a period in which the future of the European Union is subject to increased scrutiny it is more vital than ever that the thoughts and views of younger generations are considered *Young People's Visions and Worries for the Future of Europe* Findings from the Europe 2038 Project seeks to do exactly that presenting the findings of a large scale research project investigating the opinions and worries of young people between the ages of 16 and 25 across seven European countries In this unique and timely volume Strohmeier and Tenenbaum together with the Europe 2038 consortium examine young people's endorsement of multiculturalism diversity European identity human rights and political participation and unpick the cross national differences in a range of European countries *Young People's Visions and Worries for the Future of Europe* concludes by formulating effective evidence based recommendations for policy and practice This work is essential reading for advanced level undergraduate and masters level courses in Psychology Social Work Politics Sociology Social Policy and Education as well as researchers in those fields **Polycentric Monarchies** Pedro Cardim, 2012 Having succeeded in establishing

themselves in Europe Asia Africa and the Americas in the early 16th century Spain and Portugal became the first imperial powers on a worldwide scale Between 1580 and 1640 when these two entities were united they achieved an almost global hegemony constituting the largest political force in Europe and abroad Although they lost their political primacy in the seventeenth century both monarchies survived and were able to enjoy a relative success until the early 19th century The aim of this collection is to answer the question how and why their cultural and political legacies persist to date Part I focuses on the construction of the monarchy examining the ways different territories integrated in the imperial network mainly by inquiring to what extent local political elites maintained their autonomy and to what a degree they shared power with the

royal administration Part II deals primarily with the circulation of ideas models and people observing them as they move in space but also as they coincide in the court which was a veritable melting pot in which the various administrations that served the Kings and the various territories belonging to the monarchy developed their own identities fought for recognition and for what they considered their proper place in the global hierarchy Part III explains the forms of dependence and symbiosis established with other European powers such as Genoa and the United Provinces Attempting to reorient the politics of these states political and financial co dependence often led to bad economic choices The Editors and Contributors discard the portrayal of the Iberian monarchies as the accumulation of many bilateral relations arranged in a radial pattern arguing that these political entities were polycentric that is to say they allowed for the existence of many different centres which interacted and thus participated in the making of empire The resulting political structure was complex and unstable albeit with a general adhesion to a discourse of loyalty to King and religion *International Society and Europeanism*

on European Identity aims to promote reflection on the mutual relationship between educational processes and European construction. It attempts to get down to what this means at the everyday level: the notion of European Identity for all citizens, specially in the educational field, and identify elements for the promotion and anchorage of this concept. To this end, the authors have contemplated articulating the topic around the axis individual-group-society, and the content has been distributed in two blocks: Europe read from an educational perspective and European Identity: new challenges for the school.

A Critical Companion to Jorge Semprún O. Ferrán, G. Herrmann, 2014-09-17 Presenting the first English language collection of essays on Jorge Semprún, this volume explores the life and work of the Spanish Holocaust survivor, author, and political activist. Essays explore his cultural production in all its manifestations, including the role of testimony and fiction in representations of the Holocaust.

Political Phenomenology Hwa Yol Jung, Lester Embree, 2016-06-13 This volume presents political phenomenology as a new specialty in Western philosophical and political thought that is post-classical, post-Machiavellian, and post-behavioral. It draws on history and sets the agenda for future explorations of political issues. It discloses crossroads between ethics and politics and explores border-crossing issues. All the essays in this volume challenge existing ideas of politics significantly. As such, they open new ways for further explorations by future generations of phenomenologists and non-phenomenologists alike. Moreover, the comprehensive chronological bibliography is unprecedented and provides not only an excellent picture of what phenomenologists have already done but also a guide for the future.

Culture and Paradiplomatic Identity Ioan Horga, Maria Manuela Tavares Ribeiro, Alina Stoica, 2016-02-22 The beginning of the millennium has been influenced by a visible acceleration of the globalisation process. A complex and dynamic phenomenon, it has generated a series of consequences at the political, strategic, and military levels, as well as the cultural level. The increase of interdependence between actors on the international stage, modern technologies, means of communication, cross-border relations, and the constant flux of goods, capital, services, and people entail major changes for the tools used by states in international relations. In this context, states are obligated to identify solutions to overcome risks and threats posed to peace and security, as current regional conflicts can easily become international. In order to streamline communication and interstate cooperation beyond the classic appeal to tolerance, there has been in recent years an exponential increase of the use of culture and, by extension, cultural diplomacy. Thus, cultural cooperation represents a vital part of the current process of transformation and transition. Adopting an interdisciplinary character, this volume investigates some of the aspects that emphasise the essential role of culture as a promoter and supporter of peace and security, as an agent of regional and national development, as well as its contributions to attracting and retaining human and financial capital, regional branding, and improving quality of life, among others. The volume will particularly appeal to professors and students of political science, international relations, history, economy, law, and sociology, as well as intellectuals interested in the catalysing role of culture in all areas of activity.
