Parrish, 2014-04-21 The virtue of mercy is widely admired but is now marginalized in contemporary public life Yet for centuries it held a secure place in western public discourse without implying a necessary contradiction with justice Alex Tuckness and John M Parrish ask how and why this changed Examining Christian and non-Christian ancient traditions along with Kantian and utilitarian strains of thought they offer a persuasive account of how our perception of mercy has been transformed by Enlightenment conceptions of impartiality and equality that place justice and mercy in tension Understanding the logic of this decline they argue will make it possible to promote and defend a more robust role for mercy in public life Their study ranges from Homer to the late Enlightenment and from ancient tragedies to medieval theologies to contemporary philosophical texts and will be valuable to readers in political philosophy political theory and the philosophy of law

Truth, Rationality, Cognition, and Music K. Korta, Jesús M. Larrazabal, 2013-03-14 A speech for the defence in a Paris murder trial a road safety slogan Hobbes political theory each appeals to reason of a kind but it remains an oblique and rhetorically indirect Each relies on comparisons rather than on direct statements and none can override or supersede the conclusions of ethical reasoning proper Nevertheless just as slogans may do more for road safety than the mere recital of accident statistics or of the evidence given at coroners inquests so the arguments of a Hobbes or a Bentham may be of greater practical effect than the assertion of genuinely ethical or political statements however true and relevant these may be

*Thought-Contents* Steven E. Boër, 2006-11-23 According to our commonsense view of the matter beliefs desires intentions and the like are special kinds of internal states the possession of which by a given creature potentially explains its behavior and otherwise renders the creature intelligible to us So called folk psychology provides us with a rough and ready network of counterfactuals delimiting the role supposedly played by these internal states vis perceptual input inference and behavioral output in a normal member of our species The exact empirical details of this network do not matter here for we are not undertaking further refinement or systematization of the relevant counterfactuals Instead our topic is the ontological analysis of the internal states that occupy the nodes of this complex network and the bearing of that analysis on the truth conditions of the sentences we use to ascribe beliefs and related states The relevant counterfactuals canonically

describe particular belief desire and intention states as states of believing desiring and intending that such a such The use of in nitival clauses to describe desires and intentions is not really an exception for desiring or intending to do A or to be F is just having a self regarding desire or intention that oneself does A or that oneself is F By the lights of our commonsense psychology then to be in a particular belief desire or intention state is to bear the corresponding attitudinal relation believing desiring or intending to a certain content

*Wholes, Sums and Unities* A. Meirav, 2013-03-14 According to Ariel Meirav the root of some of our most noteworthy difficulties in the metaphysics of concrete entities has been the traditional tendency to focus on the horizontal dimension of wholes i e relations between the parts of a whole and to neglect the vertical dimension i e relations between the whole itself and its parts In *Wholes Sums and Unities* Meirav formulates a critique of widely accepted mereological assumptions presents a new conception of wholes as Unities and demonstrates the advantages of this new conception in treating a variety of metaphysical puzzles such as that of Tibbles the cat More generally he suggests that conceiving wholes as Unities offers us a new way of understanding the world in non reductive terms
