Recently our citizens throughout the nation had a revealing and painful experience. For the first time in our national history they saw, through the miracle invention of television, their government at work in the hearings conducted by the Senate Crime Committee, of which I was privileged to be a member. They watched a parade of witnesses from the underworld appear in court before the committee. They studied the faces of these witnesses, watched their reactions to questions propounded by committee members, heard their refusals to answer questions, as they repeated parrotlike, time after time, those words, "I refuse to answer on the grounds that it might tend to incriminate me." Guilt was manifest, but the only recourse our committee had was to order them to answer and them, if they persisted in their refusal, to cite them for contempt on the Senate floor.

In our visits to various sections of the country we found sordid and corrupt conditions almost everywhere.

In Kansas City, for instance, we questioned twenty-six men, all with criminal records, who covered their faces with their hands as they entered the courtroom, and whose incomes ranged from \$4,000 to over \$20,000 a year, all gained by gambling and illegal activities.

We found sheriffs who admitted taking bribes, and men who had failed to live up to their oaths of office as law enforcement officials. We uncovered proof of definite collusion between criminals and public officials.

In Las Vegas, Nevada, which is the only state in the Union where gambling is legal, we visited large gambling enterprises. It

Wren, Wolfgang Edelstein, Gertrud

Nunner-Winkler, 1990 These 13 essays by noted American and German scholars provide a focused discussion of many of the issues raised by the integration of philosophical and psychological theories of moral development The essays pivot around two key contributions by Lawrence Kohlberg and his associates and by Jürgen Habermas Kohlberg s major work was a description of the stages of development of moral understanding in children This book contains the final formulation of his view of the end point of moral development Stage 6 Habermas s insightful response to that formulation which seeks to fit Kohlberg s perceptions into the framework of a communicative ethics is an important extension of his own moral theory In three parts the essays map out the relationship between philosophy and psychology in the study of the moral domain explore the way the moral point of view is understood within Kohlberg s cognitive developmental model and discuss the place of moral development in terms of various models of personality and decision making The contributors are Augusto Blasi Dwight R Boyd Rainer Dobert Wolfgang Edelstein Jürgen Habermas Helen Haste Monika Keller Lawrence Kohlberg Charles Levine Mordecai Nisan Gil G Noam Gertrud Nunner Winkler Bill Puka Ernst Tugendhat and Thomas E Wren Thomas E Wren is Professor of Philosophy at Loyola University of Chicago The Moral Domain is included in the series Studies in

Contemporary German Social Thought edited by Thomas McCarthy **Moral Imagination** Mark Johnson, 2014-12-10 Using path breaking discoveries of cognitive science Mark Johnson argues that humans are fundamentally imaginative moral animals challenging the view that morality is simply a system of universal laws dictated by reason According to the Western moral tradition we make ethical decisions by applying universal laws to concrete situations But Johnson shows how research in cognitive science undermines this view and reveals that imagination has an essential role in ethical deliberation Expanding his innovative studies of human reason in *Metaphors We Live By* and *The Body in the Mind* Johnson provides the tools for more practical realistic and constructive moral reflection **Moral Relativism and Chinese Philosophy** Yang Xiao, Yong

Huang, 2014-02-03 Original influential and often controversial ethicist David Wong defends forms of moral relativism His 1984 *Moral Relativity* was a study of this concept and his 2006 *Natural Moralities* presented a new and sophisticated account of it Wong s vision is of a pluralistic moral relativism he does not defend all forms of relativism but evaluates what moralities may be true His singular philosophy reflects his deep knowledge of Confucian and Daoist thought In this book moral philosophers and scholars of Chinese thought debate ideas central to Wong s work and Wong responds to them The discussion ranges widely including exploring Wong s thought on naturalism criteria for moralities the principle of charity moral authority and the concept of community and looking at his readings of Xunzi and Zhuangzi Wong s nuanced and forceful responses clarify and develop further arguments in his work These engaging and critical exchanges between Wong

and his critics illuminate not only Wong's thought but also contemporary ethical theory and Chinese philosophy *The Moral Wager* Malcolm Murray, 2007-05-05 In the following chapters I offer an evolutionary account of morality and from that extrapolate a version of contractarianism I call consent theory Game theory helps to highlight the evolution of morality as a resolution of interpersonal conflicts under strategic negotiation It is this emphasis on strategic negotiation that underwrites the idea of consent Consent theory differs from other contractarian models by abandoning reliance on rational self interest in favour of evolutionary adaptation From this more emphasis will be placed on consent as natural convergence rather than consent as an idealization My picture of contractarianism then ends up looking more like the relativist model offered by Harman rather than the rational or pseudo rational model offered by Gauthier let alone the Kantian brands of Rawls or Scanlon So at least some of my discussion will dwell on why it is no loss to abandon hope for the universal categorical morality that rational models promise In the introduction I offer the betting analogy that underwrites the remaining picture There are some bets where the expected utility is positive though the odds of winning on this particular occasion are exceedingly low In such cases we cannot hope to give an argument that taking the bet is rational The only thing we can say is that those predisposed to take this kind of bet on these kinds of occasions will do better than those with other dispositions so long as such games occur often enough **The East and the West** ,1909
