Chinese Heroes Isaac Taylor Headland, 1902 U.S.- China Educational Exchange Hongshan Li, 2007-12-01 U S China relations became increasingly important and complex in the twentieth century While economic political and military interactions all grew over time the most dramatic expansion took place in educational exchange turning it into the strongest tie between the two nations By the end of the 1940s tens of thousands of Chinese and American students and scholars had crisscrossed the Pacific leaving indelible marks on both societies Although all exchange programs were terminated during the cold war the two nations reemerged as top partners within a decade after the reestablishment of diplomatic relations Approaching U S China relations from a unique and usually overlooked perspective Hongshan Li reveals that both the drastic expansion and complete termination of educational ties between the two nations in the first half of the twentieth century were largely the results of direct and deep intervention from the American and Chinese governments Benefiting from government support and collaboration educational exchange succeeded in diffusing knowledge and improving mutual understanding between the two peoples across the divide of civilizations However the visible hand of government also proved to be most destructive to the development of healthy intercultural relations when educational interactions were treated merely as an instrument for crisis management **Chinese America: History and Perspectives 2001**, 2001 Finding Firmer Ground: The Role of Higher Education in U.S.-China Relations Yawei Liu/Michael Cerny, 2022-04-27 The U S China educational exchange began auspiciously after a 30 year hiatus in 1978 when Chinese leader Deng Xiaoping announced his strategic decision to send 5 000 students and scholars from China each year to further their education 1 Then U S President Jimmy Carter famously responded Tell him to send 100 000 This was the launch of educational exchange as a core pillar of the U S China relationship Until the 40th anniversary of the normalization of U S China relations and U S China educational exchange in 2019 there was general agreement that the exchange of students and scholars benefited both countries There was recognition that the enormous increase in personal interaction and friendships and knowledge about each other s society culture economy and government strengthened understanding trust and cooperation At a time when U S China relations are at its lowest point since the normalization of relations the benefits of educational exchange are being questioned if not under assault Few could have predicted that Chinese students would be weaponized by both sides caught up in the political and security disputes between the two governments A trade war political tensions concerns about academic espionage and influence operations rising incidents of anti Asian hate and a global pandemic have created a perfect storm to stir up distrust as well as retaliatory measures that restrict student mobility on both sides of the Pacific After years of fast growth the number of Chinese students and researchers coming to the U S has slowed China is still the largest source of international students in the U S accounting for about one third of the total but America s appeal is weakening Is this shift toward declining numbers an overdue correction to better protect America against academic espionage and influence operations and

prevent China from capitalizing on American know how to accelerate its own progress Or is this decline in numbers an unnecessary and damaging hit on American universities preeminent position in global higher education and its open science model leading to loss of U S competitiveness and international prestige This report more broadly is an attempt to discern the benefits risks and challenges of U S China educational exchange and determine how educational exchange can advance the interests of both the U S and China going forward

Interpreting U.S.-China-Taiwan Relations Xiabing Li,Xiabo Hu,Yang Zhong,2003-02-27

Interpreting U S China Taiwan Relations presents an up to date multidisciplinary approach to this often troublesome relationship through essays written by experts in the fields of political science economics military science history and communications It begins with a focus on the relationship between the U S and China as China presses forward with new development while the United States encourages a balance of power in East Asia It evaluates the successes and failures of the relationship and the forces behind the stands that they take that feed the stress of the relationship The second group of essays deals with the relationship between China and Taiwan They examine the recent changes and tentativeness surrounding the situation caused by the death of Deng Xiaoping and the social and economic problems of China yet communicate a tremendous optimism that a breakthrough will occur in the future The final essays explore the evolution of China s perceptions of its international environment as it begins to understand and respond to external circumstances better and more positively
