World Bank Financing of Education Phillip W. Jones,2007-02-12 Based on detailed analysis of thousands of confidential World Bank

documents this book demonstrates that the World Bank lies at the centre of the major changes in global education of our time. It outlines the evolution of World Bank lending policies in education and assesses the policy impact of the Bank's educational projects looking at how it has shaped the economic and social policies of many governments including policies that affect education. It has been an influential proponent of the rapid expansion of formal education systems around the world financing much of that expansion. It has been instrumental in forging those policies that see education as a precursor to modernisation served as a major purveyor of Western ideas about how education and the economy are or should be related. Following on from the success of the first edition this revised edition covers topical issues of globalisation and looks into the political debate concerning aid to developing countries. It will be of enormous value to those studying or working in educational policy in developing countries, international organisations and financial institutions and aid agencies.

Transforming Comparative Education Martin Carnoy, 2019-04-02. Over the past fifty years new theoretical approaches to comparative and international education have transformed it as an academic field. We know that fields of research are often shaped by collectives of researchers and students converging at auspicious times throughout history. Part institutional memoir and part intellectual history, *Transforming Comparative Education* takes the Stanford collective as a framework for discussing major trends and contributions to the field from the early 1960s to the present day and beyond. Carnoy draws on interviews with researchers at Stanford to present the genesis of their key theoretical findings in their own words. Moving through them chronologically, Carnoy situates each work within its historical context and argues that comparative education is strongly influenced by its economic and political environment. Ultimately he discusses the potential influence of feminist theory, organizational theory, impact evaluation, world society theory and state theory on comparative work in the future and the political and economic changes that might inspire new directions in the field.

Returns to Investment in Education: A Global Update, **Routledge Handbook of International Education and Development**

Simon McGrath, Qing Gu, 2015-07-24 This timely Handbook takes stock of the range of debates that characterise the field of international education and development and suggests key aspects of a research agenda for the next period. It is deliberately divergent in its approach, recognising the major ideological and epistemological divides that characterise a field that draws on many traditions. Leading and emergent voices from different paradigms and contexts are afforded a space to be heard and each section puts current debates in larger historical contexts. The Handbook is divided in four parts and book ended by an introduction and a conclusion, the latter oriented towards the implications that the volume has for future research agendas. The first part explores major strands of debates about education's place in development theory. The second acknowledges the disciplining of the field by the education for all movement and examines the place that learning and teaching and schools play in development. Part three looks beyond schools to consider early years, adult and vocational education but focuses particularly on the return to thinking about higher education's role in development. The final part considers the changing but still important role that international cooperation plays in shaping education in developing countries. Featuring over thirty chapters written by leading international and interdisciplinary scholars, the Routledge Handbook of International Education and Development offers the first comprehensive and forward looking resource for students and scholars. *Social*

Development James Midgley, 1995-08-03 The social development approach seeks to integrate economic and social policies within a dynamic development process in order to achieve social welfare objectives. This first comprehensive textbook on the subject demonstrates that social development offers critically significant insights for the developed as well as the developing world. James Midgley describes the social development approach, traces its origins in developing countries, reviews theoretical issues in the field and analyzes different strategies in social development. By adding the developmental dimension, social development is shown to transcend the dichotomy between the residualist approach which concentrates on targeting resources to the most needy and the institutional approach which urges extensive state involvement in welfare.

Education and Development Simon McGrath, 2018-05-08 This title explores the place of education in development debates and provides a systematic as well as a theoretical overview of the main approaches to education and development. It emphasises the fact that education is profoundly shaped by national and local cultures even if many issues are shared across institutions in different locations. Education and Development discusses different theoretical accounts from different disciplinary traditions to help students understand the complexity of the overall debate. The text does not shy away from discussions of education's negative impacts and insists that an account of education must include consideration of early childhood, development, adult, vocational and higher education as well as the growing range of informal and distance forms. It includes chapters on human capital, human rights and human development and on education, gender and development and draws on examples from a wide range of countries and regions such as India, Hong Kong, Kenya and South Africa. The book has a well developed pedagogy including text boxes, chapter summaries, key questions, links to websites and videos and

annotated further reading sections Particular attention is paid to ensuring that a plurality of voices contexts and educational sub sectors are represented in the boxes weblinks and references Education and Development provides an introductory overview to the field aimed at the undergraduate level while critically engaging with key themes and questions The book will also be of interest to development practitioners policymakers entrepreneurs and corporate employees engaged in aspects of education and development work

China's Education Aid to Africa Wei Ye, 2023-05-31 China's rise as an aid provider in Africa has caught global attention with China's activity being viewed as the projection of soft power of a neo colonialist kind in an international relations context This book which focuses on China's education aid government scholarships training Confucius Institutes dispatched teachers etc reveals a much more complicated picture It outlines how the divide between the Chinese Ministry of Commerce and the Ministry of Education hinders China's soft power projection how much of China's aid is bound up with an education for economic growth outlook mirroring China's own recent experiences of economic development and how China's aid prioritized to reflect the

commercial sector's interests is out of step with most international development aid which is dominated by education agendas and the campaigns of international organizations and traditional donors this leaves China easily exposed to the charge of neo colonialism This situation also reveals insufficient knowledge production of China and in South South Cooperation Substantial production of Southern knowledge should recognize the international development cooperation architecture as an open system by which both traditional donors and Southern countries transform
