Psychopathology Johnny L. Matson, 2013-03-07 The treatment of psychopathology in children has been a centerpiece of the overall field of problem behaviors in children. Therefore, a considerable number of data have been accumulated, particularly in recent years. These efforts have expanded at such a rate as to result in the publication of several new journals such as the *Journal of Clinical Child Psychology and Education* and *Treatment of Children*. Similarly, many standard general clinical journals have begun to devote more attention to children. Despite these efforts, few books have emerged that are devoted directly and specifically to treatment in childhood psychopathology. This volume's scope is broad in that it reviews not only behavior therapy but also the rapidly expanding efforts in psychopathology and traditional psychotherapy and at an advanced level. It is designed to provide an in-depth scholarly review of the empirical evidence, including an overview and analysis of the available techniques, their effectiveness, and the limitations and complications arising from the use of these treatment methods with the full range of psychopathology displayed by children. Many nationally and internationally recognized experts have agreed to contribute chapters to this book, and we hope that what has emerged is an up-to-date and authoritative volume.

Wong's Nursing Care of Infants and Children - E-Book Marilyn J. Hockenberry, 2022-12-23 American Journal of Nursing, AJN Book of the Year Awards 1st Place in Child Health. Provide quality nursing care through each stage of child development. Wong's *Nursing Care of Infants and Children*, 12th Edition, uses an easy-to-follow, family-centered approach to describe the care of children at each age and stage of development. The book begins with a discussion of the influences on and assessment of child health, then provides chapters on child health promotion and health problems, all organized by age groups and body systems. Up-to-date, evidence-based information helps you develop critical thinking skills along with the sensitivity needed to become a compassionate, caring pediatric nurse. Written by a team of experts led by Marilyn J. Hockenberry, Wong's continues to be the leading text in pediatric nursing. Focus on family-centered care emphasizes the role and influence of the family in child health and illness with a separate chapter and Family-Centered Care boxes. Full-color drawings and photographs reflect the latest in nursing care. Nursing Care Guidelines boxes offer clear, step-by-step instructions for interventions in a variety of situations and conditions, and Nursing Care Plan boxes include expected patient outcomes and rationales for nursing interventions. Nursing Tips include helpful hints and practical clinical information. Translating Evidence into Practice and Applying Evidence to Practice boxes help you apply research to improve the outcomes of nursing care. Atraumatic Care boxes contain techniques for care that manage pain, discomfort, or stress along with approaches to promote self-esteem and prevent embarrassment. Emergency Treatment boxes serve as a quick reference for interventions in critical situations. Cultural Considerations and Cultural Competence content provides tips from clinical experts. Community and Home Health Considerations boxes address issues such as increasing immunization rates, decreasing smoking among teens, and preventing lead poisoning. Drug Alerts highlight important drug-related information for safe, appropriate care. Nursing Alerts call out critical considerations such as key assessment data, risk factors, and danger signs.

that must be considered in providing care Research Focus boxes emphasize research with concise reviews of important evidence

The Complexity of Psychiatric Care, from Pregnancy to Adolescence: Beyond the Endogenous-Exogenous Dichotomy Olivier Putois, Bernard Golse, Veronique Delvenne, Miri Keren, 2024-06-26 Child and adolescent psychiatry hosts a range of diverse epistemological positions regarding the origin of psychical suffering from fully endogenous e.g. genetic to mostly exogenous e.g. family trauma etc The complexity of clinical situations generally precludes such epistemologies to require exclusive therapeutic strategies psychodynamic psychotherapy can be fruitful in the context of monogenic genetic illnesses at the family or individual level while pharmacology can be a necessary tool in a variety of difficult relational contexts or personality issues e.g. in adolescence Thus nowadays the most promising therapeutic perspectives in child and adolescent psychiatry attempt to do justice to the polyfactorial complexity of mental suffering notably by refining their psychopathologies by drawing on e.g. biopsychosocial or epigenetic models even more so as prevention policies ask for longitudinal studies to help with the early detection of potential future troubles
