**Revelation, Rationality, Knowledge & Truth** Hazrat Mirza Tahir Ahmad, 1998-06-30 Any divide between revelation and rationality religion and logic has to be irrational If religion and rationality cannot proceed hand in hand there has to be something deeply wrong with either of the two Does revelation play any vital role in human affairs Is not rationality sufficient to guide man in all the problems which confront him Numerous questions such as these are examined with minute attention All major issues which intrigue the modern mind are attempted to be incorporated in this fascinatingly comprehensive statute Whatever the intellectual or educational background of the reader this book is bound to offer him something of his interest It examines a very diverse and wide range of subjects including the concept of revelation in different religions history of philosophy cosmology extraterrestrial life the future of life on earth natural selection and its role in evolution It also elaborately discusses the advent of the Messiah or other universal reformers awaited by different religions Likewise many other topical issues which have been agitating the human mind since time immemorial are also incorporated The main emphasis is on the ability of the Quran to correctly discuss all important events of the past present and future from the beginning of the universe to its ultimate end Aided by strong incontrovertible logic and scientific evidence the Quran does not shy away from presenting itself to the merciless scrutiny of rationality It will be hard to find a reader whose queries are not satisfactorily answered We hope that most readers will testify that this will always stand out as a book among books perhaps the greatest literary achievement of this century

A. Evans, 2020-05-15 How do you prove that you re Muslim This is not a question that most believers ever have to ask themselves and yet for members of India s Ahmadiyya Muslim Community it poses an existential challenge The Ahmadis are the minority of a minority people for whom simply being Muslim is a challenge They must constantly ask the question What evidence could ever be sufficient to prove that I belong to the faith In Far from the Caliph s Gaze Nicholas H A Evans explores how a need to respond to this question shapes the lives of Ahmadis in Qadian in northern India Qadian was the birthplace of the Ahmadiyya community s founder and it remains a location of huge spiritual importance for members of the community around the world Nonetheless it has been physically separated from the Ahmadis spiritual leader the caliph since partition and the believers who live there now and act as its guardians must confront daily the reality of this separation even while attempting to make their Muslimness verifiable By exploring the centrality of this separation to the ethics of everyday life in Qadian Far from the Caliph s Gaze presents a new model for the academic study of religious doubt one that is not premised on a concept of belief but instead captures the richness with which people might experience problematic relationships to truth *Absolute Justice, Kindness and Kinship* Hazrat Mirza Tahir Ahmad, 2008 *Some Distinctive Features of Islam* Hazrat Mirza Tahir Ahmad, 2008 Some distinctive features of islam was a lecture delivered by Hazrat Mirza Tahir Ahmad rh at the University of Canberra Australia The speaker builds up his lecture on the thesis that the most distinctive feature of Islam is twofold First it is the only religion which claims to be and is the final the universal and eternal religion for all times and for all peoples Second it is the only religion which acknowledges and bears witness to the veracity of every other religions and claims that the truth is not the monopoly of Islam alone whereas every

[Islam, Science Fiction and Extraterrestrial Life](#)

Jörg Matthias Determann, 2020-09-17 The Muslim world is not commonly associated with science fiction Religion and repression have often been blamed for a perceived lack of creativity imagination and future oriented thought However even the most authoritarian Muslim majority countries have produced highly imaginative accounts on one of the frontiers of knowledge astrobiology or the study of life in the universe This book argues that the Islamic tradition has been generally supportive of conceptions of extra terrestrial life and in this engaging account J rg Matthias Determann provides a survey of Arabic Bengali Malay Persian Turkish and Urdu texts and films to show how scientists and artists in and from Muslim majority countries have been at the forefront of the exciting search Determann takes us to little known dimensions of Muslim culture and religion such as wildly popular adaptations of Star Wars and mysterious movements centred on UFOs Repression is shown to have helped science fiction more than hurt it with censorship encouraging authors to disguise criticism of contemporary politics by setting plots in future times and on distant planets The book will be insightful for anyone looking to explore the science culture and politics of the Muslim world and asks what the discovery of extra terrestrial life would mean for one of the greatest faiths      Selected Themes in The Study of Religions in Nigeria S.
