Bowker's Complete Video Directory 1996 R R Bowker Publishing, 1996 *Variety's Complete Home Video Directory*, 1989 **The Human Dilemma** Barbara Dole Larsen, 2009-12 Who has never wondered why people behave the way they do They create glorious music art and literature They have uncovered the secrets of the universe and disease yet have not been able to figure out how to get along with each other without war The Human Dilemma sets out to find out why It describes how humans evolved how their wonderful brains work and what they are like when they are born The author explores the reasons individuals grow up with different personalities depending on the societies in which they mature from hunter gatherers in Africa to industrial Americans She then turns to relationships between the sexes the temptations of power and why religious differences lead to violence The Human Dilemma explains in simple readable language how human nature customs and beliefs interfere with mankind's ability to resolve the overwhelming problems facing the world today Violent conflicts between cultures have become more volatile over the years Many believe it is man's nature to fight yet ancient civilizations like Crete were peaceful and everyone was treated equally women as well as men The same is true of two hunting gathering tribes in Africa that have followed the same way of life for thousands of years Perhaps it is just as human to cooperate peacefully in solving problems as it is to fight over them and just as human to see our fellows as equal instead of superior or inferior Why then do men regard women as inferior in so many societies And why do so many nations plunge into battle especially since the invention of nuclear bombs makes it possible to wipe out our entire species The newest peril is global warming caused by the spewing of carbon into the atmosphere from burning fossil fuels which may eventually change our climate back to the days before mankind existed Some animals have already become extinct because they cannot adjust to warmer weather Humans may not survive such a drastic change Our magnificent brains are capable of inventing solutions to all the problems confronting us and entrepreneurs are eager to put these inventions into practice Why then don't we do it Is there some flaw in our nature that makes it easier to blame each other instead and find excuses for relieving our frustrations in warfare As the author studied the sciences for answers to her questions she became convinced that only by fully understanding our nature and the reasons why it is difficult for us to confront our problems can we hope to resolve them and continue to survive Her conclusions are found in The Human Dilemma An original and thought provoking book which will appeal to a very wide audience Richard Edelman Psychoanalyst In her wonderfully wide ranging exploration of human nature Barbara Larsen has distilled her research into a lucid and absolutely fascinating book Richard Edelman Psychoanalyst The writer's style is open and exploratory warmly self sharing and it is as enjoyable as well as a searching and provocative learning experience Saul L Brown Emeritus Chairman Department of Psychiatry Cedars Sinai Medical Center Los Angeles CA Larsen skillfully weaves together current theory and research from an impressive variety of sources Arthur A Dole Emeritus Professor of Education University of Pennsylvania Bowker's Directory of Videocassettes for Children 1999 R R Bowker

Publishing, Bowker, 1999-03 **Pharaohs on Both Sides of the Blood-Red Waters** Allan Aubrey Boesak, 2017-07-12 After the civil rights and anti apartheid struggles are we truly living in post racial post apartheid societies where the word struggle is now out of place Do we now truly realize that as President Obama said the situation for the Palestinian people is intolerable This book argues that this is not so and asks What has Soweto to do with Ferguson New York with Cape Town Baltimore with Ramallah With South Africa the United States and Palestine as the most immediate points of reference it seeks to explore the global wave of renewed struggles and nonviolent revolutions led largely by young people and the challenges these pose to prophetic theology and the church It invites the reader to engage in a trans Atlantic conversation on freedom justice peace and dignity These struggles for justice reflect the proposal the book discusses there are pharaohs on both sides of the blood red waters Central to this conversation are the issues of faith and struggles for justice the call for reconciliation its possibilities and risks the challenges of and from youth leadership prophetic resistance and the resilient audacious hope without which no struggle has a future The book argues that these revolutions will only succeed if they are claimed embraced and driven by the people **VideoHound's Golden Movie Retriever 1996** VideoHound Editors, Videohound, 1995-09 USA Today gave it a 4 star rating the Houston Chronicle called it by far the best and the New York Times says the Hound takes the lead in a blaze of supplemental lists The new 1996 edition of America s favorite guide to movies on video offers over 22 000 video reviews including 1 000 new reviews *Hate-work* David W. Augsburger, 2004-01-01 Using stories case histories and correlating perspectives from psychology sociology and theology Augsburger explains how hate functions He also makes an argument for the moral imperative of moving from hate to justice and mercy in our dealings with one another *Robots That Kill* Judith A. Markowitz, 2019-05-01 This book describes real world killer robots using a blend of perspectives Overviews of technologies such as autonomy and artificial intelligence demonstrate how science enables these robots to be effective killers Incisive analyses of social controversies swirling around the design and use of killer robots reveal that science alone will not govern their future Among those disputes is whether fully autonomous robotic weapons should be banned Examinations of killers from the golem to Frankenstein s monster reveal that artificially created beings like them are precursors of real 21st century killer robots This book laces the death and destruction caused by all these killers with science and humor The seamless combination of these elements produces a deeper and richer understanding of the robots around us The Politics of Truth and Reconciliation in South Africa Richard Wilson, 2001-05-02 The South African Truth and Reconciliation Commission TRC was set up to deal with the human rights violations of apartheid during the years 1960 1994 However as Wilson shows the TRC s restorative justice approach to healing the nation did not always serve the needs of communities at a local level Based on extended anthropological fieldwork this book illustrates the impact of the TRC in urban African communities in Johannesburg While a religious constituency largely embraced the commission s religious redemptive language of reconciliation Wilson argues that the TRC

had little effect on popular ideas of justice as retribution This provocative study deepens our understanding of post apartheid South Africa and the use of human rights discourse It ends on a call for more cautious and realistic expectations about what human rights institutions can achieve in democratizing countries **The Compassionate Life** Marc Ian

Barasch,2010-06-21 How can compassion a trait hardwired into our nervous system and waiting to be awakened transform our lives and the world at large Marc Barasch provides up to the minute research to timeless spiritual truths and weaves a stirring unforgettable story of the search for kindness in a world that clearly needs it With unfailing curiosity Barasch poses vital questions What can we learn from exceptionally empathetic people Can we increase our compassion quotient with practice What if the great driving force of our evolution were actually survival of the kindest He comes up with challenging ultimately inspiring answers With encounters as diverse as observations of compassion amongst bonobo chimpanzees to the story of a man who forgives his daughters killer to teenage Palestinian and Israeli girls trying to wage peace Barasch blends hard science and popular culture with his own hip engaging narrative style to create a smart provocative argument that a simple shift in consciousness changes pretty much everything Advance ,1978 **The Invention of Good and Evil**

Hanno Sauer,2024-09-17 What makes us moral beings How do we decide what is good and what is evil In the vein of Sapiens comes a grand history of our universal moral values at the moment of their greatest crisis How did we learn to distinguish good from evil Have we always been capable of doing so And will we still be in the world to come In this breathtaking book ethics expert Hanno Sauer offers a great universal history of morality in the era of its darkest crisis He finds that morality existed long before there was talk of God religion or philosophy Its history is first of all the fruit of a process of natural selection going back to the dawn of humanity in the forests of East Africa which five million years ago thinned out owing to climate change Among the early humans that came down from the trees there were also our ancestors who adapted to open spaces by organizing themselves into large groups Under the pressure of environmental factors morality emerges as the foundation for cooperation a quality that is as precarious as it is essential to the survival of the species Moving between paleontology and genetics psychology and cognitive science philosophy and evolutionism Sauer traces a genealogy of morality and along the journey marks the main moral transformations in the history of humanity In the end he concludes that millions of years of stratifications has led to the moral crisis of our present and the only way to build a future together is to retrace our history *He-Man and the Masters of the Universe: A Character Guide and World Compendium* Val
