## **Review And Evaluation Of Alternative Chemical Disposal Technologies:**

*Review and Evaluation of Alternative Chemical Disposal Technologies* Panel on Review and Evaluation of Alternative Chemical Disposal Technologies, Commission on Engineering and Technical Systems, Division on Engineering and Physical Sciences, National Research Council, 1996-11-29 In 1994 the National Research Council published Recommendations for the Disposal of Chemical Agents and Munitions which assessed the status of various alternative destruction technologies in comparison to the Army's baseline incineration system The volume's main finding was that no alternative technology was preferable to incineration but that work should continue on the neutralization technologies under Army consideration In light of the fact that alternative technologies have evolved since the 1994 study this new volume evaluates five Army chosen alternatives to the baseline incineration system for the disposal of the bulk nerve and mustard agent stored in ton containers at Army sites located in Newport Indiana and Aberdeen Maryland respectively The committee assessed each technology by conducting site visits to the locations of the technology proponent companies and by meeting with state regulators and citizens of the affected areas This volume makes recommendations to the Army on which if any of the five technologies has reached a level of maturity appropriate for consideration for pilot scale testing at the two affected sites

the munitions management device MMD and the explosive destruction system EDS for accessing and destroying a range of nonstockpile chemical agents and militarized industrial chemicals The RRS is designed to treat recovered chemical agent identification sets CAIS which contain small amounts of chemical agents and a variety of highly toxic industrial chemicals The MMD is designed to treat nonexplosively configured chemical munitions The EDS is designed to treat munitions containing chemical agents with energetics equivalent to three pounds of TNT or less These munitions are considered too unstable to be transported or stored A prototype EDS system has recently been tested in England by non stockpile program personnel Although originally proposed for evaluation in this report no test data were available to the committee on the composition of wastes from the EDS Therefore alternative technologies for the destruction of EDS wastes will be discussed in a supplemental report in fall 2001 Treatment of solid wastes such as metal munition bodies packing materials and carbon air filters were excluded from this report Review and Evaluation of the Army Non Stockpile Chemical Materiel Disposal Program Disposal of Neutralent Wastes evaluates the near term 1999 2005 application of advanced nonincineration technologies such as from the Army s Assembled Chemical Weapons Assessment Program and the Alternative Technologies and Approaches Project in a semi fixed skid mounted mode to process Rapid Response System Munitions Management Device and Explosive Destruction System liquid neutralization wastes
