Revising New Essays For Teachers Of Writing:

Revision Alice Horning, Anne Becker, 2006-05-22 Explores the wide range of scholarship on revision while bringing new light to bear on enduring questions in composition and rhetoric *Dramatizing Writing* Virginia Skinner-Linnenberg, 2020-07-24 Although speech departments have owned delivery for the last 100 years those who teach writing especially English departments can gain a great deal by reinstating delivery into their conceptions of and theories about writing Thus in the author's vision of dramatizing writing in the composition classroom delivery can have an impact on all the composing steps from invention to final draft The goals of this text are to redefine delivery for writing to reunite it with other parts of the classical rhetorical canon and to practically apply it in contemporary writing instruction This text is divided into three main sections The first provides a survey of the history of delivery in rhetorical theory A continuum is set up from a totally physical conception of delivery to a noetic one which incorporates more intellectual processes The argument is that the tension heightened by discord over its definition eventually led to the splitting of delivery from the rhetorical canon A separate discussion of the women's challenge to delivery is also included The next section contains a survey of facets of delivery that exist in current theory combined with the author's own theory of delivery It provides insight into the state of delivery in contemporary writing instruction The author argues that since the split of delivery from the rhetorical canon has caused a modern bias against delivery in writing theory many strategies that could aid in the teaching of writing have either been overlooked or undertheorized Therefore she borrows from current theoretical areas within and outside of writing in order to construct her own theory of delivery The last section provides practical applications of delivery in writing instruction Again borrowing from many sources inside and outside of composition she describes the techniques teachers may use to incorporate delivery in a writing classroom Through the use of delivery more strategies may be developed to aid in the teaching of writing Special features include the incorporation of some practices that had been in use in the composition classroom for many years but did not have any consciously theoretical grounding the discussion of women rhetoricians theories on delivery the combination of many contemporary theoretical areas including theatrical feminist rhetorical and pedagogical to form the author's redefined theory of delivery and the presentation of practical applications of this new theory of delivery for teachers to utilize in their own classrooms *Working at Writing* Robert L. Root, 1991 A survey of the composing processes of seven working writers columnist essayists Jim Fitzgerald and Kathleen Stocking political columnists Tom Wicker and Richard Reeves drama critic Walter Kerr and film critics David Denby and Neal Gabler *Working at Writing* offers rich and unique insights into how writing is actually done The book has three interlocking elements edited transcripts of interviews with the writers about their composing processes and the composition of specific works copies of the works discussed in the transcripts and a series of chapters that analyze the interviews and articles in the context of current research into composing Through this unusual structure Root investigates both the ways in which the

working practices of the seven writers relate to one another and to current models of composing and the ways in which such a discussion will be of value to others particularly to student writers and their teachers By considering the comments of practicing writers and the examples of their compositions and by comparing the evidence of research findings with those examples of practical experience Root gives student writers and their teachers as well the opportunity to better understand the paradigms that govern their own composing and to confirm modify abandon or replace them The final chapter discusses the implications of these professionals experience for those who hope to become working writers Stressing the importance of assiduous stringsaving immersion in context regular composition the rhetorical situation and the writer s understanding of his or her own process Root suggests both what separates the novice from the expert and how novices can apply the insights of this book as they work at their own writing ERIC Clearinghouse Publications ,1983 **Literacy** David Wray,2004 This four volume collection reprints key debates about exactly what it means to be literate and how literacy can best be taught Rather than centering on the emotional reaction of mass media debates this set focuses on research findings into processes and pedagogy The themes covered include Literacy its nature and its teaching Reading processes and teaching Writing processes and teaching and New Literacies the impact of technologies **Concepts in Composition** Irene L.
