pictorial images was derived from their physical characteristics and acoustic properties as well as from their aesthetic product *Sounding Objects* is concerned with ways in which musical culture provided poets with a rich nuanced vocabulary for reflecting on their own art and its roles in courtly life the civic arena and salon society Poets not only depicted the world of musical practice but also appropriated it using musical instruments figuratively to establish their literary identities Drawing on music treatises and archival sources as well as poems paintings and engravings this unique study aims to enrich our understanding of the interplay of poetry music and art in this period and highlights the importance of musical materiality to Renaissance culture
