Revolution In Psychiatry:

The Revolution in Psychiatry Ernest Becker, 1985-10-01 **Moodswing** Ronald R. Fieve, 1976 The Revolution in Psychiatry Ernest Becker, 1967 **The Revolution in Psychiatry** Ernest Becker, 1990-01-01 Almost a Revolution Paul S. Appelbaum, 1994

Doubts about the reality of mental illness and the benefits of psychiatric treatment helped foment a revolution in the law's attitude toward mental disorders over the last 25 years. Legal reformers pushed for laws to make it more difficult to hospitalize and treat people with mental illness and easier to punish them when they committed criminal acts. Advocates of reform promised vast changes in how our society deals with the mentally ill; opponents warily predicted chaos and mass suffering. Now, with the tide of reform ebbing, Paul Appelbaum examines what these changes have wrought. The message emerging from his careful review is a surprising one: less has changed than almost anyone predicted. When the law gets in the way of commonsense beliefs about the need to treat serious mental illness, it is often put aside. Judges, lawyers, mental health professionals, family members, and the general public collaborate in fashioning an extra-legal process to accomplish what they think is fair for persons with mental illness. Appelbaum demonstrates this thesis in analyses of four of the most important reforms in mental health law over the past two decades: involuntary hospitalization, liability of professionals for violent acts committed by their patients, the right to refuse treatment, and the insanity defense. This timely and important work will inform and enlighten the debate about mental health law and its implications and consequences. The book will be essential for psychiatrists and other mental health professionals, lawyers, and all those concerned with our policies toward people with mental illness.

Drugs for Mental Illness Marvin E. Lickey, Barbara Gordon, 1983 *The Revolution in Psychiatry. The New Understanding of Men* Ernest Becker, 1964 **The Broken Brain: the Biological Revolution in Psychiatry** Nancy C. Andreasen, 1984 **Reclaiming the Self in Psychiatry** Şerife Tekin, 2025-04-30

Reclaiming the Self in Psychiatry: Centering Personal Narratives for Humanist Science diagnoses the fundamental problem in contemporary scientific psychiatry to be a lack of a sophisticated and nuanced engagement with the self and proposes a solution: the Multitudinous Self Model (MuSe). MuSe fulfills psychiatry's twin commitments to patients flourishing and scientific objectivity. Marshalling the conceptual and empirical resources from testimonies from individuals diagnosed with mental disorders, substantive research in cognitive science, and empirically informed philosophy, MuSe provides clinicians, scientists, and patients pathways to respond to mental distresses and disorders. This framework boosts psychiatry's relationship to science by facilitating expansive notions of expertise and objectivity in which some patients are recognized as experience-based experts whose contributions to psychiatric knowledge are indispensable. Şerife Tekin draws the contours of a future for psychiatry that is grounded in philosophy, medical humanities, and social sciences as much as physiology and neuroscience. This book is an ideal read for professional psychiatrists and philosophers of psychiatry who are interested in the philosophy of mental health.
