In Their Own Words Fred Erisman, 2021-01-15 Amelia Earhart s prominence in American aviation during the 1930s obscures a crucial point she was but one of a closely knit community of women pilots Although the women were well known in the profession and widely publicized in the press at the time they are largely overlooked today Like Earhart they wrote extensively about aviation and women s causes producing an absorbing record of the life of women fliers during the emergence and peak of the Golden Age of Aviation 1925 1940 Earhart and her contemporaries however were only the most recent in a long line of women pilots whose activities reached back to the earliest days of aviation These women too wrote about aviation speaking out for new and progressive technology and its potential for the advancement of the status of women With those of their more recent counterparts their writings form a long sustained text that documents the maturation of the airplane aviation and women s growing desire for equality in American society In Their Own Words takes up the writings of eight women pilots as evidence of the ties between the growth of American aviation and the changing role of women Harriet Quimby 1875 1912 Ruth Law 1887 1970 and the sisters Katherine and Marjorie Stinson 1893 1977 1896 1975 came to prominence in the years between the Wright brothers and World War I Earhart 1897 1937 Louise Thaden 1905 1979 and Ruth Nichols 1901 1960 were the voices of women in aviation during the Golden Age of Aviation Anne Morrow Lindbergh 1906 2001 the only one of the eight who legitimately can be called an artist bridges the time from her husband s 1927 flight through the World War II years and the coming of the Space Age Each of them confronts issues relating to the developing technology and possibilities of aviation Each speaks to the importance of assimilating aviation into daily life Each details the part that women might and should play in advancing aviation Each talks about how aviation may enhance women s participation in contemporary American society making their works significant documents in the history of American culture

So Many Worlds H. Craig Miner, 1997

During World War II he founded his own company manufacturing and distributing all the hose clamps for the popular P 51 Mustang Fighter Anne Morrow Lindbergh Kathleen C. Winters, 2025-06-25 Few people know that Anne Morrow Lindbergh was an accomplished and innovative pilot in her own right In fact she was one of the defining figures of American aviation a bright and adventurous woman who helped to pioneer air routes traveled around the world and came to be adored by the American public In this revealing biography author and pilot Kathleen C Winters vividly recreates the adventure and excitement of many of Anne s early flights including never before revealed flight details from the Lindbergh archives An intimate portrayal of a remarkable woman Anne Morrow Lindbergh also offers a dazzling picture of the exciting and dangerous early years of aviation s Golden Age **Reconsidering a Century of Flight** Roger D. Launius, Janet R. Daly Bednarek, 2015-12-01 On December 17 1903 Orville and Wilbur Wright soared into history during a twelve second flight on a secluded North Carolina beach Commemorating the 100th anniversary of the first flight these essays chart the central role that aviation played in twentieth century history and capture the spirit of innovation and adventure that has characterized the history of flight The contributors all leading aerospace historians consider four broad themes relating to the development of flight technology innovation and the technology of flight civil aeronautics and government policy aerial warfare and aviation in the American imagination Through their attention to the political economic military and cultural history of flight the authors establish that the Wrights invention and all that followed in both air and space was one of the most significant technologies of the twentieth century fundamentally reshaping our world Supported by the First Flight Centennial Commission The contributors are Janet R Daly Bednarek Tami Davis Biddle Roger E Bilstein Hans Joachim Braun David T Courtwright Anne Collins Goodyear Roger D Launius William M Leary David D Lee W David Lewis John H Morrow Dominick A Pisano and A Timothy Warnock **Amelia Earhart** Kathleen C. Winters, 2010-11-23 When Amelia Earhart disappeared over the Pacific in 1937 she was at the height of her fame Fascination with Earhart remains just as strong today as her mysterious disappearance continues to inspire speculation In this nuanced and often surprising biography acclaimed aviation historian Kathleen C Winters moves beyond the caricature of the spunky precocious pilot to offer a more complex portrait Drawing on a wealth of contemporary accounts airline records and other original research this book reveals a flawed heroine who was frequently reckless and lacked basic navigation skills but who was also a canny manipulator of mass media Winters details how Earhart and her husband publisher George Putnam worked to establish her as an international icon even as other spectacular pilots went unnoticed Sympathetic yet unsentimental this biography helps us to see Amelia Earhart with fresh eyes *Air Force Magazine* , 1989 **Proceedings - United States Naval Institute** United States Naval Institute, 1989 Wings of Honor, American Airmen in World War I James J. Sloan, 1994 Beretning om amerikanske flyvev benenheders deltagelse i 1 verdenskrig Selv om USA iv rksatte en storstilet tr ning af piloter og jordpersonel var det kun et begr nset antal af disse som faktisk kom til at deltage i kamphandlingerne Ca 4000 man deltog i kamphandlingerne og ca 700 fly

Amerikanerne måtte lade materiel af sine allierede og indgik videre som en integreret del af de allierede styrker under den pågående nations flag **Wings of Wood, Wings of Metal** Eric Schatzberg, 1999 Schatzberg shows that American aeronautical engineers and airplane designers were swayed by the symbolism of airplane materials a symbolism that linked metal with technological progress and wood with preindustrial craft traditions This symbolism encouraged the aeronautical community to focus research and development on metal airplanes at the expense of promising projects involving wood despite the fact that other countries continued to produce highly successful aircraft with wood through the end of World War II According to Schatzberg technical personnel in the American military played the key role in this process They had little evidence for metal's superiority but used their dominant influence to press the case that metal was the wave of the future and that airplanes would inevitably follow ships and abandon wood Technology and Culture , 1994
