Ken Wilber in Dialogue Donald Jay Rothberg, Sean M. Kelly, Sean Kelly, 1998-02-01 A passionate conversation among the best minds in transpersonal studies about the ideas of Ken Wilber the prominent contemporary thinker whose first book The Spectrum of Consciousness published by Quest in 1977 launched the transpersonal psychology movement Transpersonal thinkers taking part in this dynamic dialogue combine Eastern and Western spirituality with mainstream fields such as psychology medicine physics and ecology to map the human drive toward Spirit Contributors include best selling authors Jack Kornfield A Path with Heart Joseph Goldstein Insight Meditation Michael Murphy The Future of the Body Stanislav Grof The Holotropic Mind and Jeanne Achterberg Rituals of Healing Wilber's spirited response to each probing assessment of his ideas and the authors rebuttals give readers ringside seats at an engaging sparring match among intellectual and spiritual Women and Identity Constance Margaret Hall, 1990 This book addresses the issue of change through choice superstars examining ways that women can empower themselves by becoming more aware of their identity values and commitments to action It emphasises priorities and the behavioural consequences of giving primacy to the value of equality of Social Movement Research Jacquelien van Stekelenburg, Conny Roggeband, Bert Klandermans, 2013-07-01 Are the dynamics of contention changing This is the question confronted by the contributors of this volume among the most influential scholars in the field of social movements The answers arriving at a time of extraordinary worldwide turmoil not only provide a wide ranging and varied understanding of how social movements arise and persist but also engender unanswered questions pointing to new theoretical strands and fields of research The Future of Social Movement Research asks How are the dynamics of contention shaped by globalization By societies that are becoming increasingly more individualized and diverse By the spread of new communication technologies such as social media cell phones and the Internet Why do some movements survive while others dissipate Do local and global networks differ in nature The authors essays explore such questions with reference to changes in three domains of contention the demand of protest changes in grievances and identities the supply of protest changes in organizations and networks and how these changes affect the dynamics of mobilization In doing so they theorize and make empirically insightful how globalization individualization and virtualization create new grievances new venues for action new action forms and new structures of contention The resulting work brought together through engaging discussions and debates between the contributors is interdisciplinary and unusually broad in scope constituting the most comprehensive overview of the dynamics of social movements available today Contributors Marije Boekkooi VU U Amsterdam Pang Ching to question societal norms challenge stereotypes and engage in meaningful dialogues for a more equitable and inclusive future Reproductive Rights in Modern France Maud Anne Bracke, 2025-07-09 The introduction of the principle of women's reproductive liberty in France tentatively by the family planning movement after 1960 and explicitly by the women's liberation movement after 1970 marked a deep shift transforming public discourses Yet this principle remained fiercely contested and moderate and conservative actors responded by foregrounding notions of reproductive responsibility or the expectation that individuals perform the right sexual and family making behaviour benefiting not only themselves and their families but the nation at large Such responsibilisation underpinned the legal reforms of the 1960s 70s framing a notion of reproductive citizenship based on a tension between individual rights and social norms This book breaks new ground by taking an intersectional approach to the defining moments of this period the legalisation of contraception the laws of 1967 and 1974 and the liberalisation of abortion 1975 1979 Drawing on a wide range of sources and actors including feminist and family planning movements government actors demographers medical professional organisations disability rights groups and key actors in the overseas departments Maud Bracke demonstrates how the discourse of responsibilisation allowed actors to distinguish between citizens worthy of reproductive rights and those seen as less worthy Bracke analyses the distinct regulations regarding contraception in the

overseas departments of Guadeloupe and Martinique framed by racialised anti natalism The book also demonstrates that disability rights organisations contributed to the discrediting of the notion of eugenic abortion used among experts and policy makers until the early 1970s Furthermore Bracke goes on to highlight the silence in the feminist movement around both disability rights and race as part of its universalisation of women's conditions of oppression and analyses the emergence of Black Feminism in late 1970s France In so doing the book offers a major contribution to the history of sex gender family life healthcare demography and political debate in post war France and more generally Evolution of the Women's Movement **Introduction to Human-Computer Interaction** Kasper in Contemporary Algeria Cherifa Bouatta, 1997 Hornbæk, Professor of Interactive Systems Engineering Per Ola Kristensson, Antti Oulasvirta, Per Ola Kristensson, 2025-02-06 This is the first comprehensive textbook for students of human computer interaction The book revises and synthesizes topics including design engineering empirical methods and technology It acknowledges the many challenges that practitioners face and identifies the solution principles that can be used to tackle them Women and Empowerment Rekha Koul, Renu Gupta, Bharti Tandon, Rupa Gupta, 2025-05-09 This volume uniquely highlights women s empowerment bringing in theoretical understandings research studies and auto ethnographic narratives of women belonging to different parts of the globe and paving the way towards achieving United Nations Sustainable Development goal 5 Its five distinct themes discuss the approaches models strategies and a few success stories for empowering women correlating and working towards a more equitable world It also brings about other sustainable development goals integrated with gender equality and is essential for women's overall well being safety personal growth and development as individuals A whole gamut of women's development unfolds in the context of barriers and challenges to carve a niche to become empowered The book is of interest to all those involved with women's studies sociology and anthropology with inspirational examples toward achieving women's equality

On Being Unfinished Patrick, Anne E.,2017-11-16 Gathered here for the first time are both published and unpublished writings of Anne E Patrick a leading feminist Catholic voice revered both as a teacher and as a critical scholar of theology ethics literature and the arts Her scholarly publications broke new ground in a number of Catholic theological subdisciplines including feminist ethics liturgy and contemporary expressions of religious life This is an essential resource for anyone seeking to understand post Vatican II theological development in the Catholic Church in the US Whole Earth Thinking and Planetary Coexistence Sam Mickey, 2015-07-16 Like never before in history humans are becoming increasingly interconnected with one another and with the other inhabitants and habitats of Earth There are numerous signs of planetary interrelations from social media and international trade to genetic engineering and global climate change The scientific study of interrelations between organisms and environments Ecology is uniquely capable of addressing the complex challenges that characterize our era of planetary coexistence Whole Earth Thinking and Planetary Coexistence focuses on newly emerging approaches to ecology that cross the disciplinary boundaries of sciences and humanities with the aim of responding to the

challenges facing the current era of planetary interconnectedness It introduces concepts that draw out a creative contrast between religious and secular approaches to the integration of sciences and humanities with religious approaches represented by the geologian Thomas Berry and the whole Earth thinking of Stephanie Kaza and Gary Snyder and the more secular approaches represented by the geophilosophy of poststructuralist theorists Gilles Deleuze and F lix Guattari This book will introduce concepts engaging with the ecological challenges of planetary coexistence to students and professionals in fields of environmental studies philosophy and religious studies Methods of Social Movement Research Bert Klandermans, Suzanne Staggenborg, 2002 Citing the critical importance of empirical work to social movement research the editors of this volume have put together the first systematic overview of the major methods used by social movement theorists Original chapters cover the range of techniques surveys formal models discourse analysis in depth interviews participant observation case studies network analysis historical methods protest event analysis macro organizational analysis and comparative politics Each chapter includes a methodological discussion examples of studies employing the method an examination of its strengths and weaknesses and practical guidelines for its application Steering Human Evolution Yehezkel Dror, 2020-05-07 Humanity must steer its evolution As human knowledge moves a step ahead of Darwin's theories this book presents the emergence of human made meta evolution shaping our alternative futures This novel process poses fateful challenges to humanity which require regulation of emerging science and technology which may endanger the future of our species However to do so successfully a novel humanity craft has to be developed main ideologies and institutions need redesign national sovereignty has to be limited a decisive global regime becomes essential some revaluation of widely accepted norms becomes essential and a novel type of political leader based on merit in addition to public support is urgently needed Taking into account the strength of nationalism and vested interests it may well be that only catastrophes will teach humanity to metamorphose into a novel epoch without too high transition costs But initial steps such as United Nation reforms are urgent in order to contain calamities and may soon become feasible Being both interdisciplinary and based on personal experience of the author this book adds up to a novel paradigm on steering human evolution It will be of great interest to scholars and researchers of modern history evolution sciences future studies political science philosophy of action and science and technology It will also be of wide appeal to the general reader anxious about the future of life on Earth Comments on the Corona pandemic add to the book s concrete significance There Are Two Sexes Antoinette Fouque, 2015-02-24 Antoinette Fouque cofounded the Mouvement de Lib ration des Femmes MLF in France in 1968 and spearheaded its celebrated Psychanalyse et Politique a research group that informed the cultural and intellectual heart of French feminism Rather than reject Freud's discoveries on the pretext of their phallocentrism Fouque sought to enrich his thought by more clearly defining the difference between the sexes and affirming the existence of a female libido By recognizing women's contribution to humanity Fouque hoped uterus envy which she saw as the mainspring of misogyny

could finally give way to gratitude and by associating procreation with women's liberation she advanced the goal of a parity based society in which men and women could write a new human contract The essays lectures and dialogues in this volume finally allow English speaking readers to access the breadth of Fouque's creativity and activism Touching on issues in history and biography politics and psychoanalysis Fouque recounts her experiences running the first women s publishing house in Europe supporting women under threat such as Aung San Suu Kyi Taslima Nasrin and Nawal El Saadaoui and serving as deputy in the European Parliament Her theoretical explorations discuss the ongoing development of feminology a field she initiated and while she celebrates the progress women have made over the past four decades she also warns against the trends of counterliberation the feminization of poverty the persistence of sexual violence and the rise of religious In the Event of Women Tani Barlow, 2021-09-20 In the Event of Women outlines the stakes of what Tani Barlow calls the event of women Focusing on the era of the late nineteenth century through the mid twentieth century s Cultural Revolution Barlow shows that an event is a politically inspired action to install a newly discovered truth in this case the mammal origins of human social evolution Highbrow and lowbrow social theory circulating in Chinese urban print media placed humanity s origin story in relation to commercial capital s modern advertising industry and the conclusion that women s liberation involved selling buying and advertising industrial commodities The political struggle over how the truth of women in China would be performed and understood Barlow shows means in part that an event of women was likely global because its truth is vested in biology and physiology In so doing she reveals the ways in which historical universals are effected in places where truth claims are not usually sought This book reconsiders Alain Badiou s concept of the event particularly the guestion of whose political moment marks newly discovered truths **Lineages of the Feminine** Emmanuel Todd, 2023-06-06 We are experiencing an anthropological revolution We see it in the MeToo movement in the denunciation of femicide and in an increasingly vociferous critique of patriarchal domination Why this sudden rise of an antagonistic conception of the relationship between men and women at the very moment when progress is accelerating and when the goals of first and second wave feminism seem on the verge of being achieved In this book the anthropologist and historian Emmanuel Todd while not underestimating the importance of crucial inequalities that remain argues that the emancipation of women has essentially already taken place but that it has given rise to new tensions and contradictions As women gain more freedom they also gain access to traditional male social pathologies economic anxiety the disorientation of anomie and individual and class resentment But because they remain women with the ability to bear children their burden as human beings although richer is now more difficult to bear than that of men In order to understand our current condition Todd retraces the evolution of the male female relationship through the long history of the human species from the emergence of Homo sapiens a hundred thousand years ago to the present He also conducts a broad empirical study of the convergence between men and women today and of the differences that still separate them in education in employment and

in relation to longevity suicide and homicide electoral behaviour and racism He explores the relations between women s liberation and other changes in contemporary societies such as the collapse of religion the decline of industry the decline of homophobia the rise of bisexuality and the transgender phenomenon and the decline in a sense of the collective life And he shows how and why Western countries and especially the Anglo American world Scandinavia and France are in their new feminist revolution perhaps less universal than they think The Lonely Generation Ting Wang, 2024-12-15 This book invites readers on an exploratory journey through the intricate tapestry of China's history culture political climate and social dynamics At the heart of this exploration is the one child policy a revolutionary measure with far reaching implications for the country's gender dynamics By scrutinizing this policy and its repercussions the book aims to uncover and interlink various elements of how the evolution or in some instances the stagnation of China's cultural and structural norms has shaped and continues to influence women s lives and choices in contemporary China Philosophising Experiences and Vision of the Female Body, Mind, and Soul: Historical Context and Contemporary Theory Musingafi, Maxwell Constantine Chando, Mafumbate, Racheal, Khumalo, Thandi Fredah, 2021-04-23 Much of our understanding of the world our societies and ourselves rests on theories and knowledge generated predominantly by men of certain nationalities and economic classes This male dominated and culturally specific theorizing and knowledge have generally resulted in the exclusion of women and other groups from the process of formal theorizing and knowledge building Feminism argues that the male dominated knowledge represents a skewed perception of reality and is only partial knowledge Feminism is a generalized wide ranging system of ideas about social life and human experience developed from a woman centered perspective It treats women as the central subjects in the investigative process and seeks to see the world from the distinctive vantage points of women in the social world The best way to empower women and better the situation for women is to take women s daily experiences and their informal theorizing into account and on this basis adopt feminist approaches to building theory and knowledge Philosophising Experiences and Vision of the Female Body Mind and Soul Historical Context and Contemporary Theory provides an overview and introduction to the study of feminist theory and practice in the social sciences This book provides a starting point for further and more advanced study of the nexus of feminism gender and development and translates feminist theory and concepts into practice The chapters investigate in a historical context mainstream and contemporary theories of feminism and gender studies This book is ideal for post graduate students of social science researchers of development management business management public governance and gender and development activists feminists and practitioners stakeholders researchers academicians and students interested in feminist theory and knowledge building the Trenches Diane Kravetz, 2004 Tales from the Trenches Politics and Practice in Feminist Service Organizations examines the political visions and experiences of women who created five feminist service organizations in the 1970s The organizations include a shelter for battered women a rape crisis center a rape prevention ride service a residential facility for female

offenders and a statewide organization for chemically dependent women Based primarily on interviews with 57 founders staff volunteers and or board members the book traces into the mid 1980s how women translated their understandings of radical feminist ideology into goals social change strategies services and organizational structures Tales from the Trenches explores how members dealt with the problems created by antifeminist resistance as well as the dilemmas that characterized many feminist efforts in the early years of the women s movement The extensive use of direct quotations in the book along with women s detailed accounts provide valuable examples of feminist practice based on thoughtful applications of feminist principles to specific circumstances rather than remaining within the confines of conventional assumptions or prescriptive politics

The Creation of Patriarchy Gerda Lerner, 1986 A radical reinterpretation of Western civilization argues that male dominance has resulted from and can be ended by historical process and identifies key developments
