

Hong Kong: Comprehensive national security unleashed

In Beijing's eyes, the sustained public protests in 2014 and 2019, the landslide victory of the pandemocratic camp in 2019 and weak identification with the PRC were a threat to territorial and political security. In 2020, the Hong Kong National Security Law imposed Beijing's understanding of national security, changing the fabric of Hong Kong's political and legal system.

The last two years show how strongly concerns over "political and ideological security" feature in the law and related policies. Specialized national security sections have been formed in the police and judiciary. Mainland security forces can now operate in Hong Kong. New legislation requires all candidates in future Hong Kong elections to be "patriotic."

Arrests and legal proceedings have targeted media outlets, civil society organizations and activities for a large range of non-violent acts. Public commemoration of the Tiananmen protests has been curtailed, and curricula revised to educate pupils about national security. Repression is set to intensify. Hong Kong's new Chief Executive John Lee has already announced additional legislation.

Security Of China:

China's Challenges to Human Security Guoguang Wu, 2012-11-27 This book looks at human security in China's foreign relations. It discusses the concept and theory of human security and their implications for China. The book goes on to analyse environmental security issues including climate change and water resources as well as looking at issues from an energy consumption perspective. Significant human security issues are then focussed on including food safety, pandemic disease control, migration and the human rights implications of China's overseas investment. Human Security in China Chi Zhang, 2021-10-21 This book explores the emergent concept of human security within the political context of COVID-19 Chinese politics. For decades, Western nations have used human rights as a rubric with which to scold Chinese leaders, betraying a fundamental unwillingness to accept diversity of governance systems. As COVID-19 has demonstrated, different governance systems yield different outcomes: the freedom of circulation, speech and movement in Western democracies yielding one and use of surveillance, lockdowns and private/public collaboration in China and Asian societies such as Korea and Singapore yielding another. Chinese political scientists have become fixated on the notion of human security, a utilitarian concept which insists on the importance of protecting and extending human life via health care technology and a wide range of other systems, sometimes in ways which contradict Western notions of human rights even as they demonstrably achieve superior outcomes for the humans involved. Being the first English language book to explore these issues, this book aims to generate a sustained theoretical relevance in the aftermath of the crisis which is likely to have lasting effects on how people live and will be of note for political scientists, China scholars and economists. *The Great Wall and the Empty Fortress* Andrew J. Nathan, Robert S. Ross, 1998 Many see China and the United States on the path to confrontation. The Chinese leadership violates human rights norms. It maintains a harsh rule in Tibet, spars aggressively with Taiwan and is clamping down on Hong Kong. A rising power with enormous assets, China increasingly considers American interests an obstacle to its own. But the authors argue the United States is the least of China's problems. Despite its sheer size, economic vitality and drive to upgrade its military forces, China remains a vulnerable power crowded on all sides by powerful rivals and potential foes. As it has throughout its history, China faces immense security challenges and their sources are at and within China's own borders. China's foreign policy is calibrated to defend its territorial integrity against antagonists who are numerous, near and strong. The authors trace the implications of this central point for China's relations with the United States and the rest of the world. Achieving Food Security in China Zhang-Yue Zhou, 2017-05-18 China's food security has never failed to attract the public's attention. Feeding China's large population has always been a huge challenge. The latest large-scale famine took place in 1958-62 during which approximately 37 million people died of starvation. However, since the early 1980s, China's food availability has improved drastically. The important question is then: has China achieved its food security? Although China's food availability has significantly improved, it has not achieved a high level of food security due to the lack of progress in

several other important dimensions of food security The book examines China's food security practices in the past six decades explores the root causes that led to food shortages or abundances and elaborates on the challenges that China has to deal with in order to improve its future food security China's quest for food security serves as a valuable lesson for many other countries to learn through China's experiences and to better manage their food security in the future The book also draws attention to the fact that China's food security status has a huge impact on the global community and hence global collaboration is a mutually beneficial approach *China's National Security* Cora Chan, Fiona de Londras, 2020-03-05 All states are challenged by the need to protect national security while maintaining the rule of law but the issue is particularly complex in the China Hong Kong context This timely and important book explores how China conceives of its national security and the position of Hong Kong It considers the risks of introducing national security legislation in Hong Kong and Hong Kong's sources of resilience against encroachments on its rule of law that may come under the guise of national security It points to what may be needed to maintain Hong Kong's rule of law once China's 50 year commitment to its autonomy ends in 2047 The contributors to this book include world renowned scholars in comparative public law and national security law The collection covers a variety of disciplines and jurisdictions and both scholarly and practical perspectives to present a forward looking analysis on the rule of law in Hong Kong It illustrates how Hong Kong may succeed in resisting pressure to advance China's security interests through repressive law Given China's growing international stature the book's reflections on China's approach to security have much to tell us about its potential impact on the global political security and economic order *Security and Profit in China's Energy Policy* Øystein Tunsjø, 2013-11-19 China has developed sophisticated hedging strategies to insure against risks in the international petroleum market It has managed a growing net oil import gap and supply disruptions by maintaining a favorable energy mix pursuing overseas equity oil production building a state owned tanker fleet and strategic petroleum reserve establishing cross border pipelines and diversifying its energy resources and routes Though it cannot be secured China's energy security can be insured by marrying government concern with commercial initiatives This book comprehensively analyzes China's domestic global maritime and continental petroleum strategies and policies establishing a new theoretical framework that captures the interrelationship between security and profit Arguing that hedging is central to China's energy security policy this volume links government concerns about security of supply to energy companies search for profits and by drawing important distinctions between threats and risks peacetime and wartime contingencies and pipeline and seaborne energy supply routes the study shifts scholarly focus away from securing and toward insuring an adequate oil supply and from controlling toward managing any disruptions to the sea lines of communication The book is the most detailed and accurate look to date at how China has hedged its energy bets and how its behavior fits a hedging pattern **China's Energy Security** Giulia Romano, Jean-Francois Meglio, 2016-06-10 A secure supply of energy is essential for all nations to sustain their economy and

indeed their very survival This subject is especially important in the case of China as China's booming economy and consequent demand for energy is affecting the whole world and in turn potentially driving realignments in international relations Moreover as this book argues energy security should be considered more broadly to include issues of sustainability environmental protection and the domestic organisation of energy policy and energy supply This book presents a comprehensive picture of China's energy security It covers all energy sectors coal oil gas renewables international relations with all major sources of energy supply the Middle East Central Asia Africa and key areas of domestic policy making and supply

Routledge Handbook of Chinese Security Lowell Dittmer, Maochun Yu, 2015-05-08 Located in the center of Asia with one of the largest land frontiers in the world and 14 neighbors whose dispositions could not easily be predicted China has long been obsessed with security In this handbook an internationally renowned team of contributors provide a comprehensive and systematic analysis of contemporary thinking about Chinese national security Chapters cover the PRC's historical ideological and doctrinal heritage related to security its security arrangements and policies targeting key regions and nations of the world the security aspects of the PRC's ground air sea space and cyber forces as well as the changing and expanding definition and scope of China's security theory and practice

Environmental Change and Food Security in China Jenifer Huang McBeath, Jerry McBeath, 2010-03-25 Abstract This chapter defines food security as the condition reached when a nation's population has access to sufficient safe and nutritious food to meet its dietary needs and food preferences It stresses China's importance to global food security because of its population size The chapter introduces the contents of the volume and then treats briefly food security in ancient and dynastic 211 bc 1912 China It examines environmental stressors such as population growth natural disasters and insect pests as well as imperial responses for example irrigation flood control storage and transportation systems The chapter also briefly introduces the Republican era 1912 1949 and compares environmental stressors and government responses then to those of the imperial period Keywords Food system Food security Food production regions Environmental stressors Population growth Natural disasters Insect pests and Plant diseases Deforestation Climate change Irrigation systems Flood control Grand Canal

1 1 The Problem of Food Security and Environmental Change Food is the material basis to human survival and in each nation state providing a system for the development production and distribution of food and its security is a primary national objective Many forces have influenced the food security of peoples since ancient times with particular challenges from natural disasters floods famines drought and pestilence and growing populations globally
