See The City Level A:

Seeing the City Nanke Verloo, Luca Bertolini, 2025-10-01 The city is a complex object Some researchers look at its shape others at its people animals ecology policy infrastructures buildings history art or technical networks Some researchers analyse processes of in or exclusion gentrification or social mobility others biological evolution traffic flows or spatial development Many combine these topics or add still more topics beyond this list Some projects cross the boundaries of research and practice and engage in action research while others pursue knowledge for the sake of curiosity This volume embraces this variety of perspectives and provides an essential collection of methodologies for studying the city from multiple interdisciplinary and transdisciplinary perspectives We start by recognizing that the complexity of the urban environment cannot be understood from a single vantage point We therefore offer multiple methodologies in order to gather and analyse data about the city and provide ways to connect and integrate these approaches The contributors form a talented network of urban scholars and practitioners at the forefront of their fields They offer hands on methodological techniques and skills for data collection and analysis Furthermore they reveal honest and insightful reflections from behind the scenes All methodologies are illustrated with examples drawn from the authors own research applying them in the city of Amsterdam In this way the volume also offers a rich collection of Amsterdam based research and outcomes that may inform local urban practitioners and policy makers Altogether the volume offers indispensable tools for and aims to educate a new generation of interdisciplinary and transdisciplinary minded urban scholars and practitioners
