Seeing The Rainforests In 19thcentury Australia:

An Environmental History of Australian Rainforests until 1939 Warwick Frost,2020-06-10 This book provides a comprehensive environmental history of how Australia s rainforests developed the influence of Aborigines and pioneers farmers and loggers and of efforts to protect rainforests to help us better understand current issues and debates surrounding their conservation and use While interest in rainforests and the movement for their conservation are often mistakenly portrayed as features of the last few decades the debate over human usage of rainforests stretches well back into the nineteenth century In the modern world rainforests are generally considered the most attractive of the ecosystems being seen as lush vibrant immense mysterious spiritual and romantic Rainforests hold a special place both providing a direct link to Gondwanaland and the dinosaurs and today being the home of endangered species and highly rich in biodiversity They are also a critical part of Australia s heritage Indeed large areas of Australian rainforests are now covered by World Heritage Listing However they also represent a dissonant heritage What exactly constitutes rainforest how it should be managed and used and how much should be protected are all issues which remain hotly contested Debates around rainforests are particularly dominated by the contradiction of competing views and uses seeing rainforests either as untapped resources for agriculture and forestry versus valuing and preserving them as attractive and sublime natural wonders Australia fits into this global story as a prime example but is also of interest for its aspects that are exceptional including the intensity of clearing at certain periods and for its place in the early development of national parks This book will be of great interest to students and scholars of Environmental History Australian History and Comparative History Australian Rainforests D. M. J. S. Bowman,2000-02-17 A critical evaluation of the ecological hypotheses proposed to explain the distribution of Australian rainforests Rainforest Tourism, Conservation and Management Bruce Prideaux,2014-09-19 Globally rainforests are under threat on numerous fronts including clearing for agriculture harvesting for timber and urban expansion Yet they have a crucial role in biodiversity conservation climate change mitigation and providing other ecosystem services As the term is used in this book rainforests include both temperate and tropical although the emphasis is on tropical rainforests Rainforests are also attractive tourist spaces and where they have been used as a tourism resource have generated significant income for local communities However not all use of rainforests as a tourism resource has been sustainable This book argues that sustainability must be the foundation on which tourism use of this complex but ultimately fragile ecosystem must be built upon It provides a multi disciplinary perspective incorporating rainforest science management and tourism issues The book is organized into four sections commencing with Rainforest Ecology and Management followed by People and Rainforests Opportunities for Rainforest Tourism Development and finally Threats to Rainforests Each major rainforest region is covered including the Amazon Central America Africa Australia and south east Asia in the context of a specific issue For example rainforests in Papua New Guinea are examined in the context of community based ecotourism development while the

rainforests in Borneo are discussed in an examination of wildlife issues Other issues covered in this manner include governance empowerment issues for rainforest peoples and climate change **Forests of Ash** Tom Griffiths,2001-12-18 This book tells the story of the giant eucalypt the Mountain Ash which grows in the north and east of Melbourne A single tree can reach a height of 120 feet in 20 years making it the worlds tallest hardwood **Australian National Bibliography** ,1978 **Australia, New Zealand, and the Pacific** Donald S. Garden,2005-08-19 A fascinating study of the environmental history of Australia New Zealand and the islands of the Pacific from the time of the dinosaurs to the present day Of interest to students and academics alike this book provides a much needed synthesis of the recent literature on the environmental history of Australia and Oceania Part of ABC CLIO s Nature and Human Societies series this book maps out the key trends in the region s environmental history charting the creation of the Australian continent from the ancient land mass of Gondwanaland to the arrival of humans Especially fascinating are the chapters highlighting how successive waves of human migration created environmental havoc throughout the region leading to the collapse of the Easter Island civilization and the spread of nonindigenous flora and fauna From the controversies over the reasons why creatures such as the marsupial lion and the giant kangaroo became extinct to such contemporary problems as deforestation and global warming this book contains sobering lessons for us all **Seeing the Rainforests in 19th-century Australia** Rod Ritchie,1989 **The Flowering of Australia's Rainforests** Geoff Williams,2021-05-03 The Flowering of Australia s Rainforests provides a comprehensive introduction to the pollination ecology evolution and conservation of Australian rainforest plants with particular emphasis on subtropical rainforests and their associated pollinators This significantly expanded second edition includes new information on the impact of climate change fire fragmentation and invasive species Rainforests continue to be a focus of global conservation concern not only from threats to biodiversity in general but to pollinators specifically Within Australia this has been emphasised by recent cataclysmic fire impacts ongoing extreme drought events and the wider consideration of climate change This second edition strengthens coverage of these issues beyond that of the first edition The Flowering of Australia s Rainforests makes timely contributions to our understanding of the nature and function of the world s pollinator fauna plant reproduction dependencies and the evolutionary pathway that has brought them to their current state and function Illustrated with 150 colour plates of major species and rainforest formations this reference work will be of value to ecologists and field naturalists botanists conservation biologists ecosystem managers and community groups involved in habitat restoration *World Rainforest Report* ,1990 [English Accents](#) Christiana Payne,2018-01-18 In the century following the foundation of the Royal Academy in 1768 British art had an international reputation prints spread knowledge of the work of British artists around the globe and it was widely seen as the product of a modern commercial society and much admired by artists as diverse as Goya in Spain Delacroix in France and Bierstadt in America In recent years scholars working on this period have become increasingly aware of the international context of their subject but there has

been no systematic analysis of the reception of British art abroad This collection of essays looks at the uses made of the paintings of Reynolds Hogarth Lawrence and their contemporaries on the continent of Europe and in the colonies and ex colonies of Australia and America The authors go beyond the simple issue of influence to consider how ideas and artistic conventions originating in the British Isles were adapted appropriated or resisted in these new environments In the process some surprising views of British art emerge demonstrating how a multi faceted view from the outside can correct and enrich the narrative produced within a national school and revealing some of the important connections that are obscured when art is studied as it so often is within narrow national boundaries
