Segmented Negative Strand Viruses Richard W. Compans, 2013-10-22 Segmented Negative Strand Viruses Arenaviruses Bunyaviruses and Orthomyxoviruses is a collection of proceedings presented at the 5th International Symposium on Negative Strand Viruses held at Hilton Head South Carolina on September 11 17 1983 The papers focus on three virus families with segmented negative RNA genomes arenaviruses bunyaviruses and orthomyxoviruses Emphasis is placed on the viruses replication strategies gene organization and biochemical and biological properties Comprised of 56 chapters this volume begins with an introduction to the genome structure transcription and genetics of arenaviruses bunyaviruses and orthomyxoviruses The next section is devoted to these viruses gene expression protein synthesis and protein modification Eukaryotic expression of cloned complementary DNA coding for influenza is considered along with the functional expression and mutational analysis of influenza virus surface glycoproteins Subsequent chapters explore viral proteins via antigenic and functional analyses the biology and immunochemistry of the African arenaviruses Lassa and Mopeia and the use of avian human reassortant influenza A viruses as live vaccine viruses in humans This book will be of interest to investigators microbiologists and molecular and cell biologists in fields such as molecular biology genetics viral immunology infectious diseases and vaccine development **Segmented Negative Strand Viruses**, 1984 Arenaviruses Michael, B.A.

Oldstone, 2012-12-06 M B A OLDSTONE Viruses are generally studied either because they cause significant human animal or plant disease or for their utility as materials to probe a basic phenomenon in biology chemistry genetics or molecular biology Arenaviruses are unusually interesting in that they occupy both of these categories Arenaviruses cause severe human diseases known primarily as the hemorrhagic fevers occurring in South and Latin America Bolivia Machupo virus and Argentina Junin virus and in Africa Lassa virus Because such viruses produce profound disability and may kill the persons they infect they are a source of economic hardship in the countries where they are prevalent Further they provide new problems for health care personnel owing to the narrowing of the world as visitors from many countries increasingly travel to and from these endemic areas In addition lymphocytic choriomeningitis virus LCMV can infect humans worldwide although the illness is most often less disabling than those elicited by other arenaviruses Yet LCMV is likely of greater concern to non-arena virologists and experimentalists using tissue culture or animals i.e. workers in molecular biology cancer research virology immunobiology etc because normal appearing cultured cells or tissues and animals used for research may be persistently infected with LCMV without manifesting clinical disease or cytopathology and transmit that infection to laboratory workers reviewed OWSTONE and PETERS 1978 For example HINMAN et al **Current Topics in Microbiology and Immunology** M. Cooper, H. Eisen, W. Goebel, P. H. Hofschneider, H. Koprowski, F. Melchers, M. Oldstone, R. Rott, H. G. Schweiger, P. K. Vogt, I. Wilson, 2012-12-06 *The Bunyaviridae* Richard M. Elliott, 2013-06-29 In this comprehensive reference leading researchers examine the biology molecular biology and diseases of the Bunyaviridae and
