George Eliot's Religious Imagination Marilyn Orr, 2018-02-15 George Eliot's Religious Imagination addresses the much discussed question of Eliot's relation to Christianity in the wake of the sociocultural revolution triggered by the spread of theories of evolution The standard view is that the author of *Middlemarch* and *Silas Marner* lost her faith at this time of religious crisis Orr argues for a more nuanced understanding of the continuity of Eliot's work as one not shattered by science but shaped by its influence Orr's wide ranging and fascinating analysis situates George Eliot in the fertile intellectual landscape of the nineteenth century among thinkers as diverse as Ludwig Feuerbach David Strauss and S ren Kierkegaard She also argues for a connection between George Eliot and the twentieth century evolutionary Christian thinker Pierre Teilhard de Chardin Her analysis draws on the work of contemporary philosopher Richard Kearney as well as writers on mysticism particularly Karl Rahner The book takes an original look at questions many believe settled encouraging readers to revisit George Eliot's work Orr illuminates the creative tension that still exists between science and religion a tension made fruitful through the exercise of the imagination Through close readings of Eliot's writings Orr demonstrates how deeply the novelist's religious imagination continued to operate in her fiction and poetry

The Poetry Toolkit: The Essential Guide to Studying Poetry Rhian Williams, 2013-03-14 Now in its 2nd edition this guide helps students build the knowledge and tools needed to tackle poetry with confidence

Mindful Aesthetics Chris Danta, Helen Groth, 2013-11-07 In the last few decades literary critics have increasingly drawn insights from cognitive neuroscience to deepen and clarify our understanding of literary representations of mind This cognitive turn has been equally generative and contentious While cognitive literary studies has reinforced how central the concept of mind is to aesthetic practice from the classical period to the present critics have questioned its literalism and selective borrowing of scientific authority Mindful Aesthetics presents both these perspectives as part of a broader consideration of the ongoing and vital importance of shifting concepts of mind to both literary and critical practice This collection contributes to the forging of a new interdisciplinarity to paraphrase Alan Richardson s recent preface to the *Neural Sublime* that is more concerned with addressing how rather than why we should navigate the increasingly narrow gap between the humanities and the sciences

Before George Eliot Fionnuala Dillane, 2013-08-15 Fionnuala Dillane revisits the first decade of Marian Evans s working life to explore the influence of the periodical press on her emergence as George Eliot and on her subsequent responses to fame This interdisciplinary study

discusses the significance of Evans's work as a journalist editor and serial fiction writer in the periodical press from the late 1840s to the late 1850s and positions this early career against critical responses to Evans's later literary persona George Eliot. Dillane argues that Evans's association with the nineteenth-century periodical industry that dominant cultural force of the age is important for its illumination of Evans's understanding of the formation of reading audiences, the development of literary genres and the cultivation of literary celebrity. Philosophy and Literature M.W. Rowe, 2017-11-28. Bringing together eight previously published essays by M.W. Rowe and a substantial new study of Larkin, this book emphasizes the profound affinities between philosophy and literature. Ranging over Plato, Shakespeare, Goethe, Arnold and Wittgenstein, the first five essays explore an anti-theoretical conception of philosophy. This sees the subject as less concerned with abstract arguments that result in theories than with prompts intended to induce clarity of vision and psychical harmony. On this understanding, philosophy looks more like literature than logic. Conversely, the last four essays argue that literature is centrally concerned with truth and abstract thought and that literature is therefore a more cognitive and philosophical enterprise than is commonly supposed. Fictions of Knowledge Y. Batsaki, S. Mukherji, J. Schramm, 2011-11-15. Locating literature at the intersection of distinct areas of thinking on the nature, scope and methods of knowledge, philosophy, theology, science and the law, this book engages with literary texts across periods and genres to address questions of probability, problems of evidence, the uses of experiment and the poetics and ethics of doubt.
