Crossing Borders, Dissolving Boundaries Hein Viljoen, 2013 Borders separate but also connect self and other and literary texts not only enact these bordering processes but form part of such processes This book gestures towards a borderless world stepping as it were with thousand mile boots from south to north even across the Atlantic from South Africa to Scandinavia It also shows how literary texts model and remodel borders and bordering processes in rich and meaningful local contexts The essays assembled here analyse the crossing and negotiation of borders and boundaries in works by Nadine Gordimer Ingrid Winterbach Deneyse Reitz Janet Suzman Marlene van Niekerk A S Byatt Thomas Harris Frank A Janssen Eben Venter Antjie Krog and others under different signs or conceptual points of attraction These signs include a spiritual turn eventfulness self understanding ethnic and linguistic mobilization performative chronotopes the grotesque the carceral the rhetorical and the interstitial Contributors Ileana Dimitriu Heilna du Plooy John Gouws Anne Heith Lida Kruger Susan Meyer Adle Nel Ellen Rees Johan Schimanski Tony Ulliyatt Phil van Schalkwyk Hein Viljoen Contemporary Linguistics: Integrating Languages, Communities, and Technologies, 2025-06-26 The International Congress of Linguists ICL takes place every five years It is the meeting where the world's leading linguists present their research and discuss the progress of their work and the state of their profession 21st ICL Pozna 2024 is a highlight in this series In twelve plenary lectures eighteen extensive sections and twelve focus streams two special panels and numerous workshops all theories and schools new developments and emerging sub disciplines of linguistics are discussed This book contains the plenary lectures and all introductions to the sections and focus streams that cover special areas of interest and thus offers the State of the Art of Linguistics in 2024 **Optimal Parenting** Ba Luvmor, 2006-05-04 This book instructs parents in how to create well being in all stages of their children's lives Combining compelling insights with practical applications based on 25 years of experience Natural Learning Rhythms is poised to be the parenting style for cultural creatives **Bi-Directionality in the Cognitive Sciences** Marcus Callies, Wolfram R. Keller, Astrid Lohöfer, 2011-07-13 Cognitive science is the interdisciplinary study of the

human mind As far as the exact relationship between the cognitive sciences and other fields is concerned however it appears that interdisciplinary exchange often remains unrealized possibly because of the uni directional application of theories concepts and methods which impedes the productive transfer of knowledge in both directions In the course of the cognitive turn in the humanities and social sciences many disciplines have selectively borrowed ideas from core cognitive sciences like psychology and artificial intelligence The day to day practice of interdisciplinarity thus thrives on one directional borrowings Focusing on cognitive approaches in linguistics and literary studies this volume explores bi directionality a genuine transdisciplinary interchange in which both disciplines are borrowing and lending The contributions take different perspectives on bi directionality some extend uni directional borrowing practices and point to avenues and crossroads while others critically discuss obstacles challenges and limitations to bi directional transfer **Sylvie and Bruno** Ray Dyer PhD,2015-10-29 Lewis Carroll s late life final children s story ignored and all but forgotten owing to it s great internal complexities Is here removed from its distracting asides to be presented initially for specialist scholars as a simpler and annotated didactic new edition **Industrial Design Law in Singapore** George Wei,2012 *Dictionaries. historically lower levels of published work on generation than on understanding of figurative expression The contributions stretch across various academic disciplines mainly psychology cognitive linguistics and applied linguistics but with a representation also of philosophy and artificial intelligence and across different types of endeavour theoretical investigation and model building experimental studies and applications focussed work for instance figurative expression in product design and online support groups There is also a wide ranging introductory chapter that touches on areas outside the scope of the contributed articles and discusses difficult issues such as a complex interplay of production and understanding
