TOWARD LEGAL RIGHTS  
FOR NATURAL OBJECTS

Christopher D. Stone

A brilliant essay proposing that natural objects such as trees, mountains, rivers and lakes should—like corporations—have legal rights. The U.S. Supreme Court's opinions in the controversial Mineral King-Disney-Sierra Club suit are included in full.

Foreword by Garrett Hardin

*Should Trees Have Standing?* Christopher D. Stone, 1988      *Should Trees Have Standing?* Christopher D. Stone, 2010  
Previous edition 1996 has sub title and other essays on law morals and the environment first edition 1974 has subtitle towards legal rights for natural objects      *Environmental Ethics* David R. Keller, 2010-03-15 Through a series of multidisciplinary readings *Environmental Ethics The Big Questions* contextualizes environmental ethics within the history of Western intellectual tradition and traces the development of theory since the 1970s Includes an extended introduction that provides an historical and thematic introduction to the field of environmental ethics Features a selection of brief original essays on why to study environmental ethics by leaders in the field Contextualizes environmental ethics within the history of the Western intellectual tradition by exploring anthropocentric human centered and nonanthropocentric precedents Offers an interdisciplinary approach to the field by featuring seminal work from eminent philosophers biologists ecologists historians economists sociologists anthropologists nature writers business writers and others Designed to be used with a web site which contains a continuously updated archive of case studies [environmentalethics info](#)      *Environmental Ethics and Forestry* Peter C. List, 2000 During the past twenty five years North American forestry has received increasingly vigorous scrutiny Critics including the environmentalists environmental scientists representatives of public interest groups and many individual citizens have expressed concerns about forestry's basic assumptions and methods as well as its practical outcomes Criticism has centered on such issues as the exploitation of forests for timber production the reduction and fragmentation of old growth habitats the destruction of biodiversity the degradation of grasslands through grazing practices lack of government attention to recreation facilities silvicultural methods like clearcutting and the use of herbicides and pesticides the exportation of industrial forestry techniques to other parts of the world and the use of public monies to provide services for private resource companies as in the creation of logging roads This rising tide of public scrutiny has led many foresters to suspect that their contract with society to manage forests using their best professional judgment had been undermined Some of these professionals as well as some of their critics have begun to reexamine their old beliefs and to look for new ways of practicing forestry Part of this reflective process has entailed new directions in environmental ethics and environmental philosophy This reader brings together some of the new thinking in this area Here students of the applied environmental and natural resource sciences as well as the interested general reader will discover a rich sampling of writings in environmental ethics and philosophy as they apply to forestry Readings focus on basic ethical systems in forestry and forest management philosophical issues in forestry ethics codes of ethics in forestry and related natural resource sciences such as fisheries science and wildlife biology Aldo Leopold's land ethic in forestry ethical advocacy and whistleblowing in government resource agencies the ethics of new forestry ecoforestry and public debate in forestry as well as ethical issues in global forestry such as the responsibilities of forest corporations environmentalists and individual wood consumers This volume

contains materials from the founders of forestry ethics such as Bernhard Fernow Gifford Pinchot John Muir and Aldo Leopold from such organizations as the Society of American Foresters the Wildlife Society the American Fisheries Society Forest Service Employees for Environmental Ethics and the Ecoforesters group in addition to writings by a variety of well known environmental philosophers and foresters including Holmes Rolston Robin Attfield Lawrence Johnson Michael McDonald Paul Wood James E Coufal Raymond Craig Kristin Shrader Frechette Jeff DeBonis Jim L Bowyer Alasdair Gunn Goug Gaigle Alan G McQuillan Stephanie Kaza Alan Dregson Duncan Taylor and Kathleen Dean Moore Author note Peter C List is Professor of Philosophy at Oregon State University where he teaches courses on environmental ethics ethical issues in the natural resource sciences and sustainable forestry He is the author of articles on Aldo Leopold s land ethic and co author of several articles on public attitudes about federal forests and forest management published in the Journal of Forestry and Society and Natural Resources

The Rights of Nature Roderick Frazier Nash, 1989-01-17 Charting the history of contemporary philosophical and religious beliefs regarding nature Roderick Nash focuses primarily on changing attitudes toward nature in the United States His work is the first comprehensive history of the concept that nature has rights and that American liberalism has in effect been extended to the nonhuman world A splendid book Roderick Nash has written another classic This exploration of a new dimension in environmental ethics is both illuminating and overdue Stewart Udall His account makes history come alive Sierra So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history Philip Shabecoff New York Times Book Review Clarifying and challenging this is an essential text for deep ecologists and ecophiles Stephanie Mills Utne Reader

*The Right of Nonuse* Jan G. Laitos, 2013-05-30 The Right of Nonuse provides a fresh and remarkably different perspective on the real causes of the ills plaguing the world s resources and environment It re examines the very nature of nature and from this new perspective argues that what is needed is for humans to grant to natural resources a legal right to be left alone a right of nonuse In the process it explores the following questions Why do natural resources continue to be depleted and removed at an alarming rate Why are species becoming extinct at a pace that may be unprecedented Why does the environment continue to be polluted Why do the weather and climate seem to be changing Perhaps most important why have laws legal institutions and governments been unable to address and correct these problems Jan Laitos reviews the history of our relationship with the natural environment and develops new ways of thinking about nature and its protection Instead of proceeding with human based goals Laitos argues that we should protect environmental resources for their own intrinsic value Instead of giving humans more and more rights to clean up the environment and to halt resources depletion a right of nonuse held by the resource itself should be created Natural resources have always possessed this parallel nonuse function and society should recognize and legitimize it

**Posthuman Legalities** Gear, Anna, Boulot, Emille, Vargas-Roncancio, Iván D., 2021-12-14 How might law address the multiple crises of meaning intrinsic to global crises of climate poverty mass

displacements ecological breakdown species extinctions and technological developments that increasingly complicate the very notion of life itself How can law embrace in other words the posthuman condition a condition in which non human forces such as climate change and Covid 19 signal the impossibility of clinging to the existing imaginaries of Western legal systems and international law This carefully curated book addresses these and related questions bringing law beyond the human drawing on Indigenous legalities life ways and ontologies and New Materialist and Posthumanist approaches into stimulating proximity to each other

**Energy Futures** Daniel Soeder, 2022-10-13 The objective of this book is to help readers better understand the links between fossil fuel greenhouse gas and climate change in a clear explanatory format It avoids sensationalism and politics using plain language to explain the details of the science how the science works and how we know what we know It describes the history of fossil fuels why fossil fuel combustion products are a problem and what must be done to address the impacts on climate It provides details about a number of energy engineering solutions to replace fossil fuels and technology called geoengineering that can cool the planet and directly remove greenhouse gases from the atmosphere Some of these technologies can be implemented almost immediately and others may be applied in the future Many young people are pessimistic about the future and prepared to give up on addressing climate change The book strives to maintain hope throughout that humanity can solve this and other environmental problems The climate crisis was caused by human engineering and human engineering can fix it The goal is to produce informed readers that can have responsible discussions with their political leaders about implementing solutions to climate change

**Green Governance** Burns H. Weston, David Bollier, 2013-01-21 The vast majority of the world's scientists agree we have reached a point in history where we are in grave danger of destroying Earth's life sustaining capacity But our attempts to protect natural ecosystems are increasingly ineffective because our very conception of the problem is limited we treat the environment as its own separate realm taking for granted prevailing but outmoded conceptions of economics national sovereignty and international law Green Governance is a direct response to the mounting calls for a paradigm shift in the way humans relate to the natural environment It opens the door to a new set of solutions by proposing a compelling new synthesis of environmental protection based on broader notions of economics and human rights and on commons based governance Going beyond speculative abstractions the book proposes a new architecture of environmental law and public policy that is as practical as it is theoretically sound

**A Survey of Ecological Economics** Rajaram Krishnan, Jonathan Harris, Neva R. Goodwin, 2013-04-22 The emergent discipline of ecological economics is based on the idea that the world's economies are a function of the earth's ecosystems an idea that radically reverses the world view of neoclassical economics A Survey of Ecological Economics provides the first overview of this new field and a comprehensive and systematic survey of its critical literature The editors of the volume summarize ninety five seminal articles selected through an exhaustive survey that advance the field of ecological economics and represent the best thinking to date in the area Each two to three page summary is far more comprehensive

than a typical abstract and presents both the topics covered in each paper and the most important arguments made about each topic Sections cover historical perspective definition scope and interdisciplinary issues theoretical frameworks and techniques energy and resource flow analysis accounting and evaluation North South international issues ethical social institutional issues Each section is preceded by an introductory essay that outlines the current state of knowledge in the field and proposes a research agenda for the future A Survey of Ecological Economics is the first volume in the Frontier Issues in Economic Thought series produced by the Global Development And Environment Institute at Tufts University

**Collective and Mass Litigation in Europe** Astrid Stadler,Emmanuel Jeuland,Vincent Smith,2020-11-27 Written by leading authorities in the field of European civil procedure and collective redress this timely book explores the model collective proceedings rules in the ELI UNDRIT European Rules of Civil Procedure It explains the intended application of this best practice set of collective redress rules intended to promote greater consistency in civil and commercial court procedure across Europe linking to existing European practice and initiatives in the field

**Law and the Epistemologies of the South** Boaventura de Sousa Santos,2023-06-01 Modern state law excludes populations peoples and social groups by making them invisible irrelevant or dangerous In this book Boaventura de Sousa Santos offers a radical critique of the law and develops an innovative paradigm of socio legal studies which is based on the historical experience of the Global South He traces the history of modern law as an abyssal law or a kind of law that is theoretically invisible yet implements profound exclusions in practice This abyssal line has been the key procedure used by modern modes of domination capitalism colonialism and patriarchy to divide people into two groups the metropolitan and the colonial or the fully human and the sub human Crucially de Sousa Santos rejects the decadent pessimism that claims that we are living through the end of history Instead this book offers practical hopeful alternatives to social exclusion and modern legal domination aiming to make post abyssal legal utopias a reality

Dr. Seuss and Philosophy Jacob M. Held,2011-07-16 Since Theodor Geisel published his first children s book in 1937 under the pseudonym Dr Seuss children and adults alike have been captivated by the charming and laconic tales of whimsical characters and imaginative worlds But Dr Seuss stories are more than just catchy poems they often wrestle with serious philosophical and moral dilemmas whether it is Horton discovering the very essence of life or the Lorax teaching us about morality Dr Seuss and Philosophy explores philosophical concepts such as the nature of the good life in Oh the Places You ll Go the nature of knowledge in McElligot s Pool postmodernity in On Beyond Zebra business and the environment in The Lorax and moral character in How the Grinch Stole Christmas among many others Anyone who loves Dr Seuss or is interested in philosophy will find this book to be intriguing and enlightening

**Analysis of Dis/agreement - with particular reference to Law and Legal Theory** S. Eng,2013-03-09 In order to determine whether two participants in a discussion are in real dis agreement one must compare their propositions Comparison presupposes yardsticks in common Analysis of Dis agreement thematises such yardsticks in that it demonstrates the existence content and factual significance of

a relatively well delimited set of proposition types and proposition patterns with their accompanying tenability criteria and motivating interests The book is a work in the field of legal theory by virtue of its demonstrating how lawyers power of judgement is constituted in and through these yardsticks The book is interdisciplinary by virtue of its demonstrating how the same yardsticks come into play more generally in argumentation formulated in everyday language i e independently of law And the book is a work in the field of philosophy by virtue of its demonstrating the existence and factual significance of language and argumentation actions with a certain independence in relation to the level of controversial fundamental philosophical positions

**The Shape of the Signifier** Walter Benn Michaels,2013-10-31 The Shape of the Signifier is a critique of recent theory primarily literary but also cultural and political Bringing together previously unconnected strands of Michaels s thought from *Against Theory* to *Our America* it anatomizes what s fundamentally at stake when we think of literature in terms of the experience of the reader rather than the intention of the author and when we substitute the question of who people are for the question of what they believe With signature virtuosity Michaels shows how the replacement of ideological difference we believe different things with identitarian difference we speak different languages we have different bodies and different histories organizes the thinking of writers from Richard Rorty to Octavia Butler to Samuel Huntington to Kathy Acker He then examines how this shift produces the narrative logic of texts ranging from Toni Morrison s *Beloved* to Michael Hardt and Toni Negri s *Empire* As with everything Michaels writes *The Shape of the Signifier* is sure to leave controversy and debate in its wake

*Environmental Law in Arab States* Damilola S. Olawuyi,2022-02-11 *Environmental Law in Arab States* offers a comprehensive and authoritative account of the guiding principles and rules relating to environmental protection in the Arab region Taking an international and comparative approach the book introduces readers to the latest developments of environmental law across the Arab region through applicable legislation green finance and climate technologies The impact of these is assessed in each of the major areas of environmental regulation air pollution water pollution biodiversity conservation of nature and cultural

heritage infrastructure development and Islamic ecology Consideration is given to participatory and bottom up legal strategies focusing on transparency accountability gender justice and other human rights safeguards that are needed to achieve greater coherence and coordination in the implementation and enforcement of environmental regulation across the region The book closes by providing legal assessments and reflections on how Arab countries can through clear and comprehensive legislation advance existing national strategies and visions on trade and investment green growth Islamic green finance circular economy blue economy and low carbon future amongst others

**Rights for Robots** Joshua C. Gellers, 2020-10-26 Bringing a unique perspective to the burgeoning ethical and legal issues surrounding the presence of artificial intelligence in our daily lives the book uses theory and practice on animal rights and the rights of nature to assess the status of robots Through extensive philosophical and legal analyses the book explores how rights can be applied to nonhuman entities This task is completed by developing a framework useful for determining the kinds of personhood for which a nonhuman entity might be eligible and a critical environmental ethic that extends moral and legal consideration to nonhumans The framework and ethic are then applied to two hypothetical situations involving real world technology animal like robot companions and humanoid sex robots Additionally the book approaches the subject from multiple perspectives providing a comparative study of legal cases on animal rights and the rights of nature from around the world and insights from structured interviews with leading experts in the field of robotics Ending with a call to rethink the concept of rights in the Anthropocene suggestions for further research are made An essential read for scholars and students interested in robot animal and environmental law as well as those interested in technology more generally the book is a ground breaking study of an increasingly relevant topic as robots become ubiquitous in modern society The Open Access version of this book available at <http://www.taylorfrancis.com/books/e> ISBN has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

*Thinking Through the Environment* Mark J. Smith, 2005-09-30 This broad ranging and thought provoking set of readings stresses the diversity of responses in the way the natural environment has been understood and questioned in the modern world

**Mathematical Outreach: Explorations In Social Justice Around The Globe** Hector Rosario, 2019-10-30 The presentations gathered in this book offer plenty of ideas and advice for anyone seeking to start a program or affiliate with an existing one In general the authors do not compare their programs to those described in other chapters but readers of the whole volume will identify significant commonalities across the various audiences processes obstacles and outcomes described Summing up Recommended All readers CHOICE This groundbreaking anthology is a collection of accounts from leaders in mathematical outreach initiatives The experiences range from prison education programs to alternative urban and Indian reservation classrooms across the United States traversing the planet from the Americas to Africa Asia and the Indian subcontinent Their common theme is the need to share meaningful and beautiful mathematics with disenfranchised communities across the globe Through these stories the authors share their

educational philosophy personal experiences and student outcomes They incorporate anecdotal vignettes since research articles in mathematics education often exclude them The inclusion of these stories is an element that adds immeasurable value to the larger narratives they tell
