Because the Cat Purrs Janet Lembke,2008-05-17 A new book by Janet Lembke is always a cause for celebration Sue Hubbell We share our lives for better or worse with a multitude of animals white tailed deer and white tailed eagles hens and wrens frogs and guppies and last but hardly least bugs and bacteria For the most part we drift along separately with neither man nor animal affecting the other s way of life Sometimes however we fall in love as in the case of the cat in the title or otherwise encounter our animal neighbors in ways that change both of us Lembke challenges her readers to consider the idea that all creatures are conscious with the ability to make choices exercise awareness and seek pleasure while shunning pain Rarely has a book of natural history covered such a broad range of subjects from the everyday bargains we make with our pets and other domestic creatures to descriptions of bungee cord snail sex and the purpose of a honeybee s sting Lembke explores the evolution of her subjects and draws on literature and myth to paint gorgeous wide ranging portraits of everyday and more unusual encounters such as that of a gardener and a groundhog or a chicken egg and Augustus Caesar s wife This is a sensitive and timely appraisal of how we treat the creatures we share our planet with and how we ought to It is a book that no lover of intelligent writing about the natural world will want to miss 20 b w illustrations

Mendel in the Kitchen Nancy Marie Brown,Nina V. Fedoroff,2004-09-30 While European restaurants race to footnote menus reassuring concerned gourmands that no genetically modified ingredients were used in the preparation of their food starving populations around the world eagerly await the next harvest of scientifically improved crops Mendel in the Kitchen provides a clear and balanced picture of this tangled tricky and very timely topic Any farmer you talk to could tell you that we ve been playing with the genetic makeup of our food for millennia carefully coaxing nature to do our bidding The practice officially dates back to

Gregor Mendel who was not a renowned scientist but a 19th century Augustinian monk Mendel spent many hours toiling in his garden testing and cultivating more than 28 000 pea plants selectively determining very specific characteristics of the peas that were produced ultimately giving birth to the idea of heredity and the now very common practice of artificially modifying our food But as science takes the helm steering common field practices into the laboratory the world is now keenly aware of how adept we have become at tinkering with nature which in turn has produced a variety of questions Are genetically modified foods really safe Will the foods ultimately make us sick perhaps in ways we can't even imagine Isn't it genuinely dangerous to change the nature of nature itself Nina Fedoroff a leading geneticist and recognized expert in biotechnology answers these questions and more Addressing the fear and mistrust that is rapidly spreading Fedoroff and her co-author science writer Nancy Brown weave a narrative rich in history technology and science to dispel myths and misunderstandings In the end Fedoroff argues plant biotechnology can help us to become better stewards of the earth while permitting us to feed ourselves and generations of children to come Indeed this new approach to agriculture holds the promise of being the most environmentally conservative way to increase our food supply Sisters of the Earth Lorraine Anderson, 2003-12-09 Sisters of the Earth is a stirring collection of women's writing on nature Nature as healer Nature as delight Nature as mother and sister Nature as victim Nature as companion and reminder of what is wild in us all Here among more than a hundred poets and prose writers are Diane Ackerman on the opium of sunsets Ursula K Le Guin envisioning an alternative world in which human beings are not estranged from their planet and Julia Butterfly Hill on weathering a fierce storm in the redwood tree where she lived for more than two years Here too are poems essays stories and journal entries by Emily Dickinson Alice Walker Terry Tempest Williams Willa Cather Gretel Erlich Adrienne Rich and others each offering a vivid eloquent response to the natural world This second edition of Sisters of the Earth is fully revised and updated with a new preface and nearly fifty new pieces including new contributions by Louise Erdrich Pam Houston Zora Neale Hurston Starhawk Joy Williams Kathleen Norris Rita Dove and Barbara Kingsolver **Fried Walleye and Cherry Pie** Peggy Wolff, 2020-03-01 With its corn by the acre beef on the hoof Quaker Oats and Kraft Mac n Cheese the Midwest eats pretty well and feeds the nation on the side But there's more to the midwestern kitchen and palate than the farm food and sizable portions the region is best known for beyond its borders It is to these heartland specialties from the heartwarming to the downright weird that Fried Walleye and Cherry Pie invites the reader The volume brings to the table an illustrious gathering of thirty midwestern writers with something to say about the gustatory pleasures and peculiarities of the region In a meditation on comfort food Elizabeth Berg recalls her aunt's meatloaf Stuart Dybek takes us on a school field trip to a slaughtering house while Peter Sagal grapples with the ethics of pat Parsing Cincinnati's five way chili Robert Olmstead digresses into questions of Aztec culture Harry Mark Petrakis reflects on owning a South Side Chicago lunchroom while Bonnie Jo Campbell nurses a sweet tooth through a fudge recipe in the Joy of Cooking and Lorna Landvik nibbles her way

through the Minnesota State Fair These are just a sampling of what makes Fried Walleye and Cherry Pie with its generous helpings of laughter culinary confession and information an irresistible literary feast Descartes' Baby Paul

Bloom,2009-04-27 All humans see the world in two fundamentally different ways even babies have a rich understanding of both the physical and social worlds They expect objects to obey principles of physics and they're startled when things disappear or defy gravity Yet they can also read emotions and respond with anger sympathy and joy In *Descartes Baby* Bloom draws on a wealth of scientific discoveries to show how these two ways of knowing give rise to such uniquely human traits as humor disgust religion art and morality How our dualist perspective developed throughout our lives profoundly influences our thoughts feelings and actions is the subject of this richly rewarding book **Small Things Considered** Henry

Petroski,2004-09-14 Why has the durable paper shopping bag been largely replaced by its flimsy plastic counterpart What circuitous chain of improvements led to such innovations as the automobile cup holder and the swiveling vegetable peeler With the same relentless curiosity and lucid witty prose he brought to his earlier books Henry Petroski looks at some of our most familiar objects and reveals that they are in fact works in progress For there can never be an end to the quest for the perfect design To illustrate his thesis Petroski tells the story of the paper drinking cup which owes its popularity to the discovery that water glasses could carry germs He pays tribute to the little plastic tripod that keeps pizza from sticking to the box and analyzes the numerical layouts of telephones and handheld calculators *Small Things Considered* is Petroski at his most trenchant and provocative casting his eye not only on everyday artifacts but on their users as well *The Georgic*
