Shrouded Planet:

The Planet of Doubt Stanley G. Weinbaum, 2018-03-16 This is a classic science fiction short story by Stanley G. Weinbaum that was originally published in *Astounding Stories* in 1935. This story is the third story of Weinbaum's to feature the characters of Hamilton Ham Hammond and Patricia Burlingame. In this instalment, the pair travel to Uranus to explore its north pole where they encounter bizarre flora and fauna. This work is part of our Vintage Sci-Fi Classics Series, a series in which we are republishing some of the best stories in the genre by some of its most acclaimed authors such as Isaac Asimov, Marion Zimmer Bradley, and Robert Sheckley. Each publication is complete with a short introduction to the history of science fiction.

The Tomb of the Devils Michael D. Christensen, 2006-01-26 Ninety-five years ago, the enormous interplanetary space vehicle the *Pacifica* with a numerous crew suddenly and inexplicably disappeared as it neared the planet Pluto. None of the probes directed towards the planet after the disaster found any evidence that the vessel and its crew had ever existed. Now a century later, the wreck of the huge ship has been sighted lying shrouded in the hazy black starlight on the Plutonian surface. A shuttle has been fitted for the dangerous journey to the seventh planet and with three crewmembers aboard has made the first attempt to reach Pluto since the loss of the *Pacifica*. As the shuttle approaches the planet, it also suddenly and inexplicably disappears and is lost. Although the crew of three is believed to have perished, they have not and will carry on with their mission to determine how the *Pacifica* met its fate. The truth, however, may be found only beyond reason or even beyond imagination, and the three astronauts may wish that they never sought answer to this great mystery.

The Jupiter Theft Donald Moffitt, 2014-04-01 A massive alien convoy is hurtling toward Earth, but its true purpose is a puzzle. It's time to discover. Donald Moffitt. Greg Bear. The Lunar Observatory on Earth is picking up a very strange and unidentifiable signal from the direction of Cygnus. When the meaning of this signal is finally understood, it clearly spells disaster for Earth. An immense object is rushing toward the Solar System, traveling nearly at the speed of light, its intense nuclear radiation sure to kill all life on Earth within months. As it moves closer, the humans can discern that it is an enormous convoy of some sort, nearly as large as a planet. And there is nothing anyone can do to divert such an enormous alien object. Then unexpectedly, the object changes course and heads toward the dead planet of Jupiter, but what could an enormous alien convoy want with such a useless planet?
