Sibelius Symphonies Nos 17:

The Symphony in Australia, 1960-2020 Rhoderick McNeill, 2022-08-26 The Symphony remained a major orchestral form in Australia between 1960 and 2020 with a body of diverse and interesting symphonies produced during the 1960s and 1970s that defied the widespread modernist trends of serialism electronic music and indeterminism that seemed harbingers of the symphony's demise From the late 1970s onwards many Australian composers chose to work in styles that admitted modal and tonal melodic and harmonic elements with regular pulse Major cycles of symphonies by Carl Vine Brenton Broadstock and Ross Edwards began to appear in the late 1980s Other prolific symphonists like Paul Paviour 10 symphonies David Morgan 15 symphonies Philip Bracanin 11 Peter Tahourdin 5 John Polglase 5 and many others demonstrated a revived interest in the form This trend continued into the first two decades of the present century with symphonies by Matthew Hindson Katy Abbott Stuart Greenbaum Andrew Schultz Mark Isaacs and Gordon Kerry This renewed interest in the symphony reflects similar trends in Britain and the United States Rhoderick McNeill provides a comprehensive introduction to this large body of music with the aim of making the music and its composers known to concert goers music educators and students conductors and music entrepreneurs

Strong Experiences with Music Alf Gabrielsson, 2011-09-29 Nowadays we can be with music whenever and wherever we like Never before has the scope of what is available been so great and varied The mass media and the Internet have given us unlimited paths into the world of music Just like music is varied and endless so are our reactions to music The very same piece of music can generate totally different reactions in different people and a person can react quite differently to the same piece of music on different occasions Individual factors how you are feeling how accustomed are you to listening to music what your tastes are in music what type of personality you are and lots more besides can play a major sometimes completely decisive role for how the reaction turns out Similarly the experience can be affected by the specific situation for example

where and when you hear the music at home in your car at a concert in the daytime at night etc whether or not the acoustics are good and if you are on your own or together with others The experience is thus determined by an interplay of factors in the music in the individual and in the situation Developments in the brain sciences have been invaluable in helping researchers to understand just how the human brain deals with music However there is a major gap between what we can uncover using state of the art technology and understanding just what music really means to us personally While measuring brain or heart activity can reveal much about our physiological reactions there is of course much more to music than this

Strong Experiences in Music is a groundbreaking new book developed from a long running study into the effects of music It draws on over two decades of research and almost 1000 participants who describe in their own words their own unique powerful and personal experiences of music The book will be a valuable resource for those in the fields of music psychology music education and musicology

New Directions in Aesthetics, Creativity and the Arts Paul Locher,Colin Martindale,Leonid Dorfman,2020-02-10 The contributing authors to this book all pre eminent scholars in their fields present their current thinking about the processes that underlie creativity and aesthetic experience They discuss established theory and research and provide creative speculation on future problems for inquiry and new approaches to conceptualising and investigating these phenomena The book contains many new findings and ideas never before published or new by virtue of the novel context in which they are incorporated Thus the chapters present both new approaches to old problem and new ideas and approaches not yet explored by leading scholars in these fields The first part of the book is devoted to understanding the nature of the perceptual cognitive and aesthetic processes that occur during encounters with visual art stimuli in everyday settings in museums and while watching films Also discussed in Part I is how cultural and anthropological approaches to the study of aesthetic responses to art contribute to our understanding about the development of a culture s artistic canon and to cross cultural aesthetic universals Part II presents new dimensions in the study of creativity Two approaches to the development of a comprehensive theory of creativity are presented Sternberg s Investment Theory of Creativity and a systems perspective of creativity based on a metaindividual world model Also covered are the factors that contribute to cinematic creativity and a film s cinematic success and the complex nature of the creative processes and research approaches involved in the innovative product design necessitated by the introduction of electronics in consumer products Part III deals with the application of concepts and models from cognitive psychology to the study of music literary meaning and the visual arts The contributors outline a model of the cognitive processes involved in real time listening to music investigate what readers are doing when they read a literary text describe what research shows about the transfer of learning from the arts to non arts cognition and discuss the kinds of thinking skills that emerge from the study of the visual arts by high school students In Part IV the authors focus on the interactive contribution of observers personalities and affect states to the creation and perception of art The chapters include a discussion of the internal mechanisms by which personality expresses itself during the making of and the response to art the relationship between emotion and cognition in aesthetics in terms of the interaction of top down and bottom up processes across the time course of an aesthetic episode the affective processes that take place during pretend play and their impact on the development of creativity in children and the causes and consequences of listener s intense experiences while listening to music

Jean Sibelius's Legacy Tim Howell,Anna Krohn,Veijo Murtomäki,2017-08-21 In 2015 at the 150th anniversary of Jean Sibelius birth research about his

music and personality is more active than ever Recent discoveries about the musical literary artistic political and social life around him have decisively widened the scope of scholarly discussion As part of the anniversary celebrations a great number of Sibelius scholars gathered in Helsinki his birth town for a conference leading up to his birthday on December 8 This volume draws upon the most current achievements of Sibelius research It brings together the diverse and sometimes even divergent viewpoints that emerged from this international meeting These studies cover all of the genres in Sibelius production orchestral works incidental music piano and chamber music and songs including both well known works and rarities and even some fresh discoveries The chapters in this book are also a welcome reminder of the manifold sources of inspiration the music of his contemporaries nature literature and visual art The versatility of Sibelius output and the richness of his creative imagination are presented here to any reader interested to learn more about the music of the Finnish master

Sein und Schein Eero Tarasti, 2015-08-31 Existential semiotics is a new paradigm in the studies of signs signification and communication This book develops its theory further starting from the continental philosophy Kant Hegel Jaspers Heidegger Arendt Sartre on one hand yet remaining also faithful to the tradition of the European semiotics particularly the Paris school From the notions of being doing and appearing the study applies them to crucial social problems of the contemporary world and moreover to various so called lesser arts like performance and gastronomy It also introduces some precursors of the approach The book represents what can be called neosemiotics the search for new theories and fields of the discipline

Musical Meaning and Interpretation Michael J. Puri, Jason Geary, Seth Monahan, 2025-03-28 Revived with new intensity at the end of the twentieth century questions of meaning and interpretation in music continue to generate widespread interest and give rise to new research directions and methods This collection of essays brings together leading musicologists and music theorists working across a range of genres classical jazz and popular to offer fresh perspectives on a concern that bestrides every area of musical scholarship While many accounts of musical meaning tend to limit and constrain Musical Meaning and Interpretation contends that music's capacity to mean is virtually limitless and therefore resists clean and orderly taxonomies Taken together the essays attest to this nearly infinite variety of ways in which music may mean Individually they explore the intellectual underpinnings of rotational form the mysterious agencies that populate our hermeneutic discourse and the significance of pleasure in the interpretive act among other topics along with extended discussions of music by Beethoven Chabrier Unsuk Chin Coltrane Stephen Foster Mahler and Chou Wen chung Rooted in humanistic values the essays combine rich analytical insights with critical perspectives on meaning and hermeneutics arguing collectively for the strength necessity and urgency of interpretive work in music
