The Emperor's New Nudity Yuval Kremitzer, 2024-12-10 An analysis of contemporary authoritarianism and the medium in which it flourishes the internet as well as what lies at the complex intersection of authority and technology In recent decades a new style of authoritarian politics has taken hold throughout the liberal democratic world The new authority figures are characterized by obscene transgressive behavior reminiscent of the crowd leader as theorized by Freud only far less transient In The Emperor's New Nudity Yuval Kremitzer considers the fraught intersection of authority and technology the internet being the medium that has allowed contemporary authoritarianism to thrive asking foundational questions such as How can we think of the network as a social phenomenon What can social and political phenomena teach us about the nature of the new technology And how does technology reshape the very fabric of social and political life Technology Kremitzer writes leads us toward an impersonal and hyperrational world to such an extent that it renders human subjectivity outmoded Authority on the other hand anchors our subjective identifications to certain figures and seems to be hopelessly primitive and irrational What is required then is a dialectics of the primal a study of the way in which what strikes us as essential enters into the dynamics of historical change From this perspective authority and technology can be said to be divided by a common object the unwritten law and the special knowledge that pertains to it a knowledge without knowers

The Supermarket of the Visible Peter Szendy, 2019-04-02 Already in 1929 Walter Benjamin described a one hundred per cent image space Such an image space saturates our world now more than ever constituting the visibility in which we live *The Supermarket of the Visible* analyzes this space and the icons that populate it as the culmination of a history of the circulation and general commodification of images and gazes From the first elevators and escalators tracking shots avant la lettre to cinema the great conductor of gazes all the way down to contemporary eye tracking techniques that monitor the slightest saccades of our eyes Peter Szendy offers an entirely novel theory of the intersection of the image and economics *The Supermarket of the Visible* elaborates an economy proper to images icons in other words an iconomy Deleuze caught a glimpse of this when he wrote that money is

the back side of all the images that cinema shows and edits on the front Since cinema for Deleuze is synonymous with universe Szendy argues that this sentence must be understood in its broadest dimension and that a reading of key works in the history of cinema allows us a unique vantage point upon the reverse of images their monetary implications Paying close attention to sequences in Hitchcock Bresson Antonioni De Palma and The Sopranos Szendy shows how cinema is not a uniquely commercial art form among other purer arts but more fundamentally helps to elaborate what might be called with Bataille a general iconomy Moving deftly and lightly between political economy aesthetic theory and popular movies and television The Supermarket of the Visible will be a necessary book for anyone concerned with media philosophy politics or visual culture

[The Dash-The Other Side of Absolute Knowing](#) Rebecca Comay, Frank Ruda, 2018-05-04 An argument that what is usually dismissed as the mystical shell of Hegel's thought the concept of absolute knowledge is actually its most rational kernel This book sets out from a counterintuitive premise the mystical shell of Hegel's system proves to be its most rational kernel Hegel's radicalism is located precisely at the point where his thought seems to regress most Most current readings try to update Hegel's thought by pruning back his grandiose claims to absolute knowing Comay and Ruda invert this deflationary gesture by inflating what seems to be most trivial the absolute is grasped only in the minutiae of its most mundane appearances Reading Hegel without presupposition without eliminating anything in advance or making any decision about what is essential and what is inessential what is living and what is dead they explore his presentation of the absolute to the letter The Dash is organized around a pair of seemingly innocuous details Hegel punctuates strangely He ends the Phenomenology of Spirit with a dash and he begins the Science of Logic with a dash This distinctive punctuation reveals an ambiguity at the heart of absolute knowing The dash combines hesitation and acceleration Its orientation is simultaneously retrospective and prospective It both holds back and propels It severs and connects It demurs and insists It interrupts and prolongs It generates nonsequiturs and produces explanations It leads in all directions continuation deviation meaningless termination This challenges every cliché about the Hegelian dialectic as a machine of uninterrupted teleological progress The dialectical movement is rather structured by intermittency interruption hesitation blockage abruptness and random unpredictable change a rhythm that displays all the vicissitudes of the Freudian drive

The Silence of Animals John Gray, 2013-06-04 A searching captivating look at the persistence of myth in our modern world By nature volatile and discordant the human animal looks to silence for relief from being itself while other creatures enjoy silence as their birthright In a book by turns chilling and beautiful John Gray continues the thinking that made his *Straw Dogs* such a cult classic Gray draws on an extraordinary array of memoirs poems fiction and philosophy to re imagine our place in the world Writers as varied as Ballard Borges Conrad and Freud have been mesmerized by forms of human extremity experiences that are on the outer edge of the possible or that tip into fantasy and myth What happens to us when we starve when we fight when we are imprisoned And how do our imaginations leap into worlds way beyond our real experiences The Silence of Animals is consistently fascinating filled with unforgettable images and a delight in the conundrum of human existence an existence that we decorate with countless myths and ideas where we twist and turn to avoid acknowledging that we too are animals separated from the others perhaps only by our self conceit In the Babel we

have created for ourselves it is the silence of animals that both reproaches and bewitches us Epistemontology in Spinoza-Marx-Freud-Lacan A. Kiarina Kordela, 2017-10-06 A Kiarina Kordela steps beyond extant commentaries on Marx's theory of commodity fetishism from A Sohn Rethel to L Althusser Balibar Slavoj Žižek and others to show that in capitalism value is the manifestation of the homology between thought and being while their other aspect power is foreclosed and becomes the object of biopower Using monistic Marxian Lacanian structuralism as an alternative to dominant models from Plato and Kant to phenomenological accounts deconstruction and other contemporary approaches Kordela expertly argues that Marx's theory of commodity fetishism is a reformulation of the Spinozian thesis that thought mind and things bodies or extension are manifestations of one and the same being or substance Kordela's link between Spinoza and Marx shows that being consists of two aspects value and power the former leading to structuralist thought the latter becoming the object of contemporary biopower Epistemontology in Spinoza Marx Freud Lacan intervenes between two dominant lines of thought in the reception of Marx today on the one hand an approach that relates Marxian thought to psychoanalysis from a Hegelian dialectical perspective and on the other hand an approach that links Marxism to Spinozian monism at the total exclusion of psychoanalysis This book will interest scholars and researchers who study Marxism post structuralism psychoanalysis critical theory ontology epistemology and theories of representation theoreticians of cultural studies and comparative literature aesthetic theory including the relation of art to economy and politics and biopolitics **Encyclopedia of Life Writing** Margaretta Jolly, 2013-12-04 First published in 2001 Routledge is an imprint of Taylor Francis an informa company

Smith, 2017-07-05 Commentary on Skryabin has struggled to situate an understanding of the composer's music within his

idiosyncratic philosophical world views Early commentators efforts to do so failed to establish a thorough or systematic approach And later twentieth century studies turned away from the composer s ideology focusing instead on the music itself with an analytic approach that scrutinized Skryabin s harmonic language in isolation from his philosophy This groundbreaking study revisits the questions surrounding the composer s music within his own philosophy but draws on new methodological tools casting Skryabin s music in the light not only of his own philosophy of desire but of more refined semiotic psychoanalytical theory and modern techniques of music analysis An interdisciplinary methodology corrects the narrow focus of Skryabin scholarship of the last century offering insights from New Musicology and recent music theory that lead to hermeneutical critically informed readings of selected works
