The Miskitos in Nicaragua, 1981-1984, 1984 The Long March Darko R. Suvin, 1987-03-03 The Long March is a collection of poetry that refuses the split between the private world of the poet and the world of public affairs The poems in the book are largely written in a dialogue with the poetry of Ancient China but they are always sustained by a commitment to radical revaluation which recalls that of the playwright Bertolt Brecht Water in a Changing World World Water Assessment Programme (United Nations), 2009 The United Nations World Water Development Report published every three years is a comprehensive review providing an authoritative picture of the world's freshwater resources It offers best practices as well as in depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector It is the only report of its kind resulting from the collaboration and contributions of the 26 UN agencies commissions program funds secretariats and conventions that have a significant role in addressing global water concerns The news media are full of talk of crises in climate change energy and food and troubled financial markets These crises are linked to each other and to water resources management Unresolved they may lead to increasing political insecurity and conflict Water is required to meet our fundamental needs and rising living standards and to sustain our planet's fragile ecosystems Pressures on the resource come from a growing and mobile population social and cultural change economic development and

technological change Adding complexity and risk is climate change with impacts on the resource as well as on the sources of pressure on water The challenges though substantial are not insurmountable The Report shows how some countries have responded Progress in providing drinking water is heartening with the Millennium Development Goal target on track in most regions But other areas remain unaddressed and after decades of inaction the problems in water systems are enormous and will worsen if left unattended Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity Leaders in government the private sector and civil society determine these objectives and allocate human and financial resources to meet them Recognizing this responsibility they must act now Two volume set 336 96 pages case studies Includes CD ROM Published jointly with UNESCO Publishing

The State against Society Grzegorz Ekiert, 1996-09-30 Classical images of state socialism developed in contemporary social sciences were founded on simple presuppositions State socialist regimes were considered to be politically stable due to their pervasive institutional and ideological control over the everyday lives of their citizens impervious to reform and change and representative of extreme political and economic dependency Despite their contrasting historical experiences they have been treated as basically identical in their institutional design social and economic structures and policies Grzegorz Ekiert challenges this notion in a comparative analysis of the major political crises in post 1945 East Central Europe Hungary 1956 63 Czechoslovakia 1968 76 and Poland 1980 89 The author maintains that the nature and consequences of these crises can better explain the distinctive experiences of East Central European countries under communist rule than can the formal characteristics of their political and economic systems or their politically dependent status He explores how political crises reshaped party state institutions redefined relations between party and state institutions altered the relationship between the state and various groups and organizations within society and modified the political practices of these regimes He shows how these events transformed cultural categories produced collective memories and imposed long lasting constraints on mass political behavior and the policy choices of ruling elites These crises shaped the political evolution of the region produced important cross national differences among state socialist regimes and contributed to the distinctive patterns of their collapse *Resources in Education* ,1997-10 *Earth System Monitor* ,2009

France International Monetary Fund. Monetary and Capital Markets Department, 2013-07-01 This technical note examines housing prices and financial stability in France The note highlights that sharply rising housing prices have caused concerns about mortgage

credit risk and the stability of the financial system particularly if the macroeconomic environment were to deteriorate further France's housing market proved resilient during the crisis declining by about 9 percent from its precrisis peak before rebounding since mid 2009 to surpass its precrisis peak This resilience has reflected a confluence of fundamental macroeconomic financial and asset allocation factors that have caused the demand for housing to remain well in excess of supply

Global View on the World Economy Horst Siebert, 2007-06-11 As globalization continues apace market segmentations are diminishing distance is shrinking and the boundaries between nation states are becoming increasingly blurred National economies are closely interlinked through many channels and we rarely view things from a single country's view adopting a global perspective instead It is therefore imperative to understand how the world economy functions This book utilizes up to date empirical evidence to illuminate the mechanics of the world as a single entity The author explores the properties of the world economy the diverse mechanisms of interdependence shocks and disturbances economic processes and structures and the institutional arrangements that guide these processes Key topics covered include world GDP growth and global product and factor markets China as a new global player the roots and impact of financial and currency crises the performance of the developing countries over time which have gained which have lost conflicts between the national interest and global concerns protectionism locational competition for mobile factors of production environmental issues the institutional arrangements for the world economy IMF WTO The World Economy A Global Analysis will be essential reading for students studying the world economy from the perspective of economics finance business and politics
