B-29 "Double Trouble" Is "Mister Bee" Colonel Charles A. Jones, 2020-10-29 This book is the story of Elmer C Jones a young man who grew up during the Great Depression and who joined the military in 1943 becoming a member of the Army's Air Corps in 1944 He was the radar observer of a B 29 Superfortress bomber crew flying 28 combat missions over Japan in 1945 13 bombing missions and 15 photographic reconnaissance missions including the longest mission of the war 4 650 miles in 23 00 hours He accumulated 489 50 combat flying hours during the war

The Nimrods Roger D. Graham, 2007 The Nimrods is an important new book for two reasons First it is an accurate true life story told by an A 26 navigator co pilot who flew 182 combat missions in the Vietnam War about a magnificent band of A 26 pilots and navigator co pilots who flew from 1966 to 1969 countless high intensity nighttime dive bombing missions in The Secret War in Laos Steel Tiger Barrel Roll and along the Ho Chi Minh Trail To illustrate the intensity of the dive bombing missions in the Vietnam War the writer describes in detail more than twenty separate unforgettable missions and more importantly the personalities and psychological reactions of all of the unforgettable characters who were a part of the 609th Special Operations Squadron Second the book is highly relevant to the current Wars in Iraq and Afghanistan and the Global War on Terror because it addresses the lessons learned in the Vietnam War and World War II and the Korean War and advocates that Americans and their allies apply those lessons learned to terrorism and renewed threats of nuclear war from tyrants and terrorists around the world This is a book whose time has come The views of our military veterans and their families who have endured the life threatening and life changing experiences of combat are made known to the American public and our allies Recommendations from The Iraq Study Group Report and President Bush's new Iraq strategy are reviewed and analyzed The book articulates a new way forward and a new vision that can be embraced by the entire world and contrasts the vision of America and its allies with the vision of Osama bin Laden and the radical Islamic terrorists who threaten the security of the entire world

Dietlein,1977 *The Space Shuttle Program* Davide Sivoletta,2017-06-09 This book tells the story of the Space Shuttle in its many different roles as orbital launch platform orbital workshop and science and technology laboratory It focuses on the technology designed and developed to support the missions of the Space Shuttle program Each mission is examined from both the technical and managerial viewpoints Although outwardly identical the capabilities of the orbiters in the late years of the program were quite different from those in 1981 Sivoletta traces the various improvements and modifications made to the shuttle over the years as part of each mission story Technically accurate but with a pleasing narrative style and simple explanations of complex engineering concepts the book provides details of many lesser known concepts some developed but never flown and commemorates the ingenuity of NASA and its partners in making each Space Shuttle mission push the boundaries of what we can accomplish in space Using press kits original papers newspaper and magazine articles memoirs and interviews this book provides the most up to date and comprehensive account available of the shuttle s many missions and will refocus interest on a remarkable flying machine and space program that is often pushed to the background

Social Reform, Modernization and Technical Diplomacy Véronique Plata-Stenger,2020-04-20 Founded in 1919 under the Treaty of Versailles as part of the League of Nations system the ILO is still today the main organization responsible for the international organization of work and the improvement of working conditions in the world Widely recognized for its efforts in building international labour standards the ILO remains little studied by development specialists and historians This book intends to fill this gap and traces the history of international development and its early pioneers through an analysis of the activities of the International Labour Office the Secretariat of the International Labour Organization between 1930 and 1946 In this book development is used as a key to questioning the ILO s place and function in the expanding inter war world The development practices and discourses that emerged in the 1930s were mainly intended to support the ILO s universalization strategy which was made necessary by the events that shook Europe at the time Development discourses and practices were also part of the esprit du temps as they were closely linked to the affirmation of the planist and rationalist ideas of the 1930s However development for the ILO was not reduced to a project of economic modernization but was seen as a tool for social engineering as evidenced by the ILO s missions of technical assistance organized since 1930 The analysis of the expertise work makes it possible to highlight the logics that prevailed in technical assistance which was more in line with institutional objectives than with the dissemination of a genuine expertise This book therefore hopes to bring new insight on the history of internationalism and international organizations during the inter war period and the Second World War as well as on the role of the ILO in the history of international development thinking and practices
