Longevity To The Limits And Beyond:

Longevity: To the Limits and Beyond Jean-Marie Robine, James W. Vaupel, Bernard Jeune, Michel Allard, 2012-12-06
Why longevity For a number of years the Fondation IPSEN has been devoting considerable effort to the various aspects of ageing not only to age related diseases such as Alzheimer s but also to the Centenarians the paragon of positive ageing The logical continuation of this approach is to address the question of longevity in global terms Behind the extreme values what span is accessible to all of us and likely to directly concern most of our contemporaries The individual and collective increase in the duration of life is one of the most striking phenomena of our time It could be one of the most significant events in the bio social history of humanity The increase in life expectancy at old age which started a few decades ago only is going on The most well advised observer had not foreseen or even dared hope for this increase which will drastically affect our everyday life our habits and our behavior In the fragment of human history we are living in it is our responsibility to deal with this major transformation for the species Such a transformation needs an effort from all to adapt to the new conditions This transformation has to be managed rather than simply experienced anticipated rather than followed in order to avoid any attempt to pervert this major step forward All that was present during the first symposium of the new series on longevity of the Colloques Medecine et Recherche convened by the Fondation IPSEN

What Price Better Health? Daniel Callahan, Milbank Memorial Fund, 2003-10-06 Medical research with its power to attract money and political support and its promise of cures for a wide range of medical burdens has good and bad sides which are often indistinguishable In this book the author teases out the distinctions and differences revealing the difficulties that result when the research imperative is suffused with excessive zeal adulterated by the profit motive or used to justify cutting moral corners Exploring the National Institutes of Health's annual budget the inflated estimates of health care cost savings that result from research the high prices charged by drug companies the use and misuse of human subjects for medical testing and the controversies surrounding human cloning and stem cell research he clarifies the fine line between doing good and doing harm in the name of medical progress His work shows that medical research must be understood in light of other social and economic needs and how even the research imperative dedic

The Longevity Code Olivia Parker, 2024-10-11

The Longevity Code presents a fascinating exploration of the science behind aging and the potential to extend our healthspan. This comprehensive guide delves into three key areas: genetic factors, lifestyle choices, and emerging medical technologies that influence longevity. By examining cutting edge research in gerontology, the book challenges the notion that aging is an uncontrollable process and offers readers practical strategies to potentially add healthy years to their lives. The book's unique approach lies in its ability to translate complex scientific concepts into actionable advice. It covers intriguing topics such as longevity genes, epigenetic modifications, and the impact of diet and exercise on aging. For instance, readers will learn about the role of telomeres in cellular aging and how lifestyle choices can influence their length. The author also explores promising developments in senolytic drugs and stem cell therapies, providing a glimpse into the future of anti-aging interventions. Progressing from genetic factors to lifestyle choices and finally to emerging technologies, The Longevity Code offers a well-structured journey through the multifaceted world of longevity science. By combining scientific rigor with accessibility, this book serves as an invaluable resource for health-conscious individuals and professionals alike, empowering them with knowledge to make informed decisions about their health and longevity.

Pathways to the Development of the Aging Phenotype John Papaconstantinou, *Pathways to the Development of the Aging Phenotype* explores the journey that all living things must eventually take. Using the definition that aging is a multifactorial syndrome caused by multiple pathophysiological processes that occur simultaneously in multiple tissues of the aged, Dr. John Papaconstantinou provides a holistic look at aging: its causes, how it presents, and how aging syndromes can be treated. In addition, this book offers a deeper look at the effects of aging on individual organs. The aging heart, skeletal muscle, eye, skin, kidney, intestine, liver, pancreas, and adipose tissue are all covered, as well as an examination of the aging brain and neurodegenerative diseases such as Alzheimer's, ALS, Parkinson's, and Huntington's disease. Other important subjects covered are the effects of social isolation and loneliness on aging, as well as the effects of sleep and other lifestyle choices. Throughout the book, Dr. Papaconstantinou provides information on current and promising research on aging and the treatment of aging syndromes, as well as the recent exciting work on tissue regeneration that suggests aged tissues and organs can be reprogrammed to a juvenile phenotype. *Pathways to the Development of the Aging Phenotype* is an exciting addition to scientific and medical literature related to aging and will be an invaluable resource for medical students, professionals, and researchers looking to expand their knowledge in this field.

A Protocol to Determine Seed Storage Behaviour T. D. Hong, R. H. Ellis, 1996. This publication provides an approach by which conservationists can determine whether or not long-term seed storage is feasible for a particular species, i.e. whether or not that species shows orthodox seed storage behaviour, and provides advice on the implementation of the protocol, examples of ways in which the results from seed storage studies could be misinterpreted due to confounding factors, as well as several alternative approaches for estimating seed storage behaviour prior to carrying out actual investigations with the seeds. In particular, the latter section introduces the concept of a multicriteria approach for
