The Look of Things Carsten Strathausen, 2003-12-04 Examining the relationship between German poetry philosophy and visual media around 1900 Carsten Strathausen argues that the poetic works of Rainer Maria Rilke Hugo von Hofmannsthal and Stefan George focused on the visible gestalt of language as a means of competing aesthetically with the increasing popularity and reality effect of photography and film Poetry around 1900 self reflectively celebrated its own words as both transparent signs and material objects Strathausen says In Aestheticism this means that language harbors the potential to literally present the things it signifies Rather than simply describing or picturing the physical experience of looking as critics have commonly maintained modernist poetry claims to enable a more profound kind of perception that grants intuitive insights into the very texture of the natural world

Adorno and Philosophical Modernism Roger S. Foster, 2016-08-29 Adorno and Philosophical Modernism The Inside of Things offers an original interpretation and vigorous defense of Theodor Adorno's idea of philosophy as the practice of what Roger Foster calls philosophical modernism Adorno's philosophical writings from the early 1930s to the mature works of the late 1960s are deeply informed by a distinctively modernist vision of human experience This book seeks to establish that Adorno's unique and lasting contribution to philosophy consists in his sustained and rigorous development of this modernist vision into an encompassing practice of philosophical interpretation The essential features of this vision can be discerned in all of Adorno's major writings in philosophy social theory and aesthetics Its defining element is the idea of a pattern underlying ordinary experience which although not directly accessible can be disclosed by the reconstructive work of philosophical or literary language This vision Foster argues can be discerned in the major works of literary modernism including Woolf Proust and Musil as well as in the interpretive technique of psychoanalysis developed by Sigmund Freud The importance of Adorno's contribution to twentieth century philosophy can only be fully appreciated by understanding how he developed this vision into an overarching practice of philosophical interpretation that furnished a coherent and profound response to the decay of experience afflicting late modern societies In this book Foster expounds that interpretive practice exploring its ramifications and in particular its relation with literary modernism and places it in critical dialogue with alternative philosophical

modernizing tantra itself with reference to the works of Lata Mani and William Schindler and an investigation of the Mother centric spiritual sensibilities in various religious discourses and devotional literatures among other discussions In short this book investigates the possibilities of inserting the figure of the Great Mother into the critical domain of cultural pluralism thereby celebrating a multiculturalism that is not based on violence and conflict antagonism but grounded in harmony The Mother is seen by the discourse articulated here mainly as a middle ground between flesh and spirit knowledge and passion justice and compassion and in the red shadow of the Mother social epistemologies and academic discourses are radically renegotiated

The Future of Philology Hannes Bajohr, Benjamin R. Dorvel, Vincent Hessling, 2014-06-19 Philology master science of the nineteenth century has changed so radically over the course of the twentieth century that it is hardly recognizable in the twenty first Its scope has been transformed its methodology contested and its legitimacy called into doubt Does it still make sense to speak institutionally and epistemologically of philology Does this venerable title continue to signify a truly coherent field and not a multitude of scattered currents and competing genealogies differing national characteristics and inconsistent methodologies This volume collects answers by a range of young philologists given at the 11th Annual Columbia University German Graduate Student Conference They show that philology in its practices and theories continues to be the fundament of the ever expanding field of literature and language studies and that a discipline whose very core is the care for the text wields competencies that are indispensable for neighboring fields In conversation with Brecht and George Hamann and Rilke Nietzsche and Heidegger these essays confront questions of materiality epistemology and ontology that define as Sheldon Pollock put it the fate of a soft science in a hard world

Posthumanism in the Age of Humanism Edgar Landgraf, Gabriel Trop, Leif Weatherby, 2018-10-04 The literary and scientific renaissance that struck Germany around 1800 is usually taken to be the cradle of contemporary humanism Posthumanism in the Age of Humanism shows how figures like Immanuel Kant and Johann Wolfgang Goethe as well as scientists specializing in the emerging modern life and cognitive sciences not only established but also transgressed the boundaries of the human This period so broadly painted as humanist by proponents and detractors alike also grappled with ways of challenging some of humanism's most cherished assumptions the dualisms for example between freedom and nature science and art matter and spirit mind and body and thereby also between the human and the nonhuman Posthumanism is older than we think and the so called humanists of the late Enlightenment have much to offer our contemporary re thinking of the human

The Red Book: Reflections on C.G. Jung's Liber Novus Thomas Kirsch, George Hogenson, 2017-09-19 In 2009 WW Norton published The Red Book a book written by Jung in 1913 1914 but not previously published Snippets of information about the likely contents of the Red Book had been in circulation for years and there was much debate and eager anticipation of its publication within the Jungian field and the larger reading public In 2010 a

conference was held at the San Francisco Jungian Institute which brought together an international group of distinguished scholars in analytical psychology to explore and address critical contextual aspects of The Red Book and to debate its importance for current and future Jungian theory and practice The Red Book Reflections on C G Jung's Liber Novus is based on that conference the individual papers have been thoroughly revised and updated for this book and address some of the important questions and issues that were raised at that conference in response to the presentation of these papers As yet there has been very little published about The Red Book The Red Book Reflections on C G Jung's Liber Novus will contribute to setting the agenda for further research both scholarly and clinical in response to Jung's account of his experiences between 1913-1914 when arguably the future course of his entire project was set in motion This book will be essential reading for any Jungian interested in the importance of The Red Book analytical psychologists trainee analysts those with an interest in the history of ideas and historians

Carsten Strathausen **Bioaesthetics** Carsten Strathausen, 2017-10-15 In recent years bioaesthetics has used the latest discoveries in evolutionary studies and neuroscience to provide new ways of looking at art and aesthetics Carsten Strathausen's remarkable exploration of this emerging field is the first comprehensive account of its ideas as well as a timely critique of its limitations Strathausen familiarizes readers with the basics of bioaesthetics grounding them in its philosophical underpinnings while articulating its key components Importantly he delves into the longstanding problem of the two cultures that separate the arts and the sciences Seeking to make bioaesthetics a more robust way of thinking Strathausen then critiques it for failing to account for science's historical and cultural assumptions At its worst he says biologism reduces artworks to mere automatons that rubber stamp pre-established scientific truths Written with a sensitive understanding of science's strengths and willing to refute its best arguments Bioaesthetics helps readers separate the sensible from the specious At a time when humanities departments are shrinking and when STEM education is on the rise Bioaesthetics makes vital points about the limitations of science while lodging a robust defense of the importance of the humanities *Play Among Books* Miro Roman, Alice_ch3n81, 2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science
