Looking At Architecture:

A Philosopher Looks at Architecture Paul Guyer, 2021-05-20 What should our buildings look like Or is their usability more important than their appearance Paul Guyer argues that the fundamental goals of architecture first identified by the Roman architect Marcus Pollio Vitruvius good construction functionality and aesthetic appeal have remained valid despite constant changes in human activities building materials and technologies as well as in artistic styles and cultures Guyer discusses philosophers and architects throughout history including Alberti Kant Ruskin Wright and Loos and surveys the ways in which their ideas are brought to life in buildings across the world He also considers the works and words of contemporary architects including Annabelle Selldorf Herzog and de Meuron and Steven Holl and shows that despite changing times and fashions good architecture continues to be something worth striving for This new series offers short and personal perspectives by expert thinkers on topics that we all encounter in our everyday lives *Looking Around* Witold Rybczynski, 1993 An inspired engaging look at what architecture is and how we live and work in it by the acclaimed author of *Home* and *The Most Beautiful House in the World* Rybczynski discusses buildings like the Wexner Center for the Visual Arts demonstrates how architecture actually works and more [Architects Make Zigzags](#) Diane Maddex, 1986-08 An alphabet book of twenty six architectural concepts with drawings and definitions of such terms as dormer facade and newel post

understand the cultural significance of the buildings that surround us It avoids the traditional style spotting approach in favour of giving an idea of what it is about buildings that moves us and what it is that makes them important artistically and culturally The book begins by looking at how architecture acquires meaning through tradition and concludes with the exoticism of the recent avant garde Illustrations of particular buildings help to anchor the general points with specific examples from ancient Egypt to the present day ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Why Architecture Matters Paul Goldberger, 2009-11-03 Why Architecture Matters is not a work of architectural history or a guide to the styles or an architectural dictionary though it contains elements of all three The purpose of Why Architecture Matters is to come to grips with how things feel to us when we stand before them with how architecture affects us emotionally as well as intellectually with its impact on our lives Architecture begins to matter writes Paul Goldberger when it brings delight and sadness and perplexity and awe along with a roof over our heads He shows us how that works in examples ranging from a small Cape Cod cottage to the vast flowing Prairie houses of Frank Lloyd Wright from the Lincoln Memorial to the highly sculptural Guggenheim Bilbao and the Church of Sant Ivo in Rome where simple geometries create a work of architecture that embraces the deepest complexities of human imagination Based on decades of looking at buildings and thinking about how we experience them the distinguished critic raises our awareness of fundamental things like proportion scale space texture materials shapes light and memory Upon completing this remarkable architectural journey readers will enjoy a wonderfully rewarding new way of seeing and experiencing every aspect of the built world

Columbus, Indiana, a Look at Architecture, 1991 What is Architecture? Andrew Ballantyne, 2002 What is Architecture presents a range of understandings and responses to architecture from architects philosophers and users of buildings *The Architect*, 1921 *The Conservator*, 1906

Touching Architecture Anthony Brand, 2022-12-30 This book is about perception emotion and affect in architecture how and why we feel the way that we do and the ways in which our surroundings and bodies contribute to this Our experience of architecture is an embodied one with all our senses acting in concert as we move through time and space The book picks up where much of the critique of architectural aestheticism at the end of the twentieth century left off illustrating the limitations and potential consequences of attending to architecture as the visually biased practice which has steadily become the status quo within both industry and education It draws upon interdisciplinary research to elucidate the reasons why this is counter productive to the creation of meaningful places and to articulate the embodied richness of our touching encounters A felt phenomenology is introduced as a more than visual alternative capable of sustaining our physical emotional and psychological well being By recognising the reciprocal and participatory relationship that exists between atmospheric affect

and our phenomenological bodies we begin to appreciate the manifold ways in which we touch and are touched by our built environment As such Touching Architecture will appeal to those with an interest in architectural history and theory as well as those interested in the topic of atmospheres affect and embodied perception
