*Love Disconsoled* Timothy P. Jackson, 1999-11-25 Few concepts are more central to ethics than love but none is more subject to false consolation This 1999 book explores several theological philosophical and literary accounts of love focusing on how it relates to matters such as self interest and self sacrifice and invulnerability and immortality Timothy Jackson first considers key aspects of what the Bible says about love then he further examines the meaning of love and sacrifice through a close reading of novels by Fitzgerald and Hemingway Lastly he evaluates how love constrains and is constrained by other traditional moral concepts Throughout Jackson defends the moral priority of what the Christian tradition calls agape He argues that a proper understanding of agapic love rejects both moral relativism and the comfort of believing that good people cannot be harmed or that God causally necessitates every historical action and event When love is thus disconsoled it neither fears death nor despises life

Nature are countless But on careful observation we can notice that some forms of common threads run across different platforms or fields These fascinating parallels can be found amidst the world of human affairs also apart from the natural scientific laws and theories Look at how a very large unit or organization or organism or machine is very conveniently and smartly assembled out of many smaller units The beauty is that the smaller constituent units work independently and at the same time are also a part of the whole Take human individuals and as a parallel the theme of this book the physical house in which they dwell Individuals come together and make families Families live together and make groups or organizations or societies They in turn combine and grow into states states join up and become a nation All nations of course make up the world whether they like it or not Physical purely material entities like houses and possessions run in a parallel stream with those of human ideologies The same method is employed by Nature in building its vast empire Fundamental particles join

and exist together to make up atoms Atoms join and make up molecules Out of the molecules all of planet Earth is made Planets and a star join and make a solar system Millions of them combine and make a galaxy Billions and trillions of them make a universe like ours There are innumerable such examples in the world we live in Go ahead and begin to turn the pages

**Love and Human Flourishing in Paul Tillich and Iris Murdoch** Julia T. Meszaros, 2016-03-03 In an age of self affirmation and self assertion selfless love can appear as a threat to the lover s personal well being This perception jars with the Biblical promise that we gain our life through losing it and therefore calls for a theological response In conversation with the Protestant theologian Paul Tillich and the atheistic moral philosopher and novelist Iris Murdoch Selfless Love and Human Flourishing in Paul Tillich and Iris Murdoch enquires into the anthropological grounds on which selfless love can be said to build up rather than undermine the lover s self It proposes that while the implausibility of selfless love was furthered by the modern deconstruction of the self both Tillich and Murdoch utilize this very deconstruction towards explicating and restoring the link between selfless love and human flourishing Julia T Meszaros shows that they use the modern diagnosis of the human being s lack of a stable and independent self as manifest in Sartre s existentialism in support of an understanding of the self as relational and fallen This leads them to view a loving orientation away from self and a surrender to the other as critical to the full flourishing of human selfhood In arguing that Tillich and Murdoch defend the link between selfless love and human flourishing through reference to the human being s ontological selflessness Meszaros closely engages S ren Kierkegaard s earlier attempt to keep selfless love and human flourishing in a productive dialectical tension She also examines the breakdown of this tension in the later figures of Anders Nygren Simone Weil and Jean Paul Sartre and addresses the pitfalls of this breakdown Her examination concludes by arguing that the link between selfless love and human flourishing would be strengthened by a more resolute endorsement of a personal God and of the reciprocal nature of selfless love **Baby Loves Political Science: Congress!** Ruth Spiro, 2021-04-13 Is your future voter election day ready This cute and clever addition to the best selling Baby Loves series offers an accurate and simple introduction to political science and the US government perfect for babies Baby learns that just as there are rules in daycare there are rules in our society And who makes the rules or laws Congress A fun and easy introduction to the three branches of the US government and the legislative branch in particular Representatives and senators may pass laws but anyone in our democracy can have ideas for new ones

**The Equation of Love** José Tiberius, 2020-09-01 Love poems and thoughts about relativity of time metaphysics and the Equation of Love Definition and concept of time Gravity and a new theory of everything In this book perspectives of modern science and metaphysics are combined besides the introduction about the relativity of love there are two titles dedicated to time and the Love Equation and gravity respectively In title II the different definitions of time are discussed emphasizing the

subjective origin of the concept and the never ending attempts to obtain its common and objective idea There is a brief discussion about the new concept used by the physics science and more thoroughly the personal conception of metaphysical time and the time line as something real and subjective in contrast to the imaginary nature of time in Modern Physics Title III focuses on the Equation of Love Newton s gravity and its interrelations with Modern Physics and in particular with Einstein s equation of the mass energy equivalence In other words the new theory attempts to replace the correct duality of subjective and objective reality in the realm of philosophy separating them from other let s say imaginary realities It is not to say that imaginary realities are completely incorrect but they do not correspond to the standard common and simpler form of the operation of human logic and as a epistemological result of the scientific method Being YOU!
