Every project has its own unique features and requires particular problems to be identified and tackled in an appropriate way. Often the solutions developed on labour based projects are innovative and are of potential benefit to many people outside and inside the project area if appropriate and used or adapted with sensitivity to the circumstances of the new application. It is with these factors in mind that it was decided to document the particular standards, designs, methods and procedures of the Flores Road Project in this Workbook **Design and Appraisal of Rural Transport Infrastructure** Jerry Lebo, Dieter Schelling, 2001-01-01. This pathbreaking book grapples with an established reality: well intentioned international development programs often generate local conflict, some of which escalates to violence. To understand how such conflicts can be managed peacefully, the authors have undertaken a comprehensive mixed methods analysis of one of the world's largest participatory development projects: the highly successful Kecamatan Development Program (KDP) which was launched by the World Bank and the Indonesian government in the late 1990s and now operates in every district across Indonesia **Making the New Indonesia Work for the Poor** ,2006 **Road Projects Manggarai** Peter Hartmann, 1991. This publication is a compilation of teaching modules developed for training courses in the construction of rural access roads in Indonesia. This publication is meant to introduce the chosen construction standards and production proceedings of labour based road construction to a broader circle of interest institutions and persons.
