

STUDIES OF ECR PLASMAS AND MATERIALS MODIFICATION USING LOW ENERGY ION BEAM FACILITY AT IUAC

Puneeta Tripathi*, Shushant Kumar Singh, Pravin Kumar†
Inter-University Accelerator Centre, New Delhi, India

Abstract

The ECR ion sources are widely used to produce high intensity of highly charged positive ions. To increase their performance further, several techniques are employed. The addition of a lighter gas into the main plasma (so called gas mixing) shows a substantial effect on the charge state distribution of highly charged ions. Although many theoretical models were used to explain this gas mixing effect, yet it is not fully understood. The low energy ion beam facility (LEIBF) at Inter-University Accelerator Centre (IUAC), New Delhi, India, which comprises of a 10 GHz all-permanent magnet NANO-GAN ECR ion source placed on a high voltage platform (400kV) has been used to develop several plasmas for the physical understanding of ions production and their confinement in a strong magnetic field. Further, the LEIBF allows us to extract ion beams from the plasma in the energy range of a few keV to tens of MeV for novel ion-matter interaction experiments. In this paper, the charge state distribution studies (relevant to gas mixing effect) of various atomic species at optimized ion source tuning parameters along with some interesting results on materials modification using ion beams is presented.

INTRODUCTION

The Electron Cyclotron Resonance ion sources (ECRIS) [1] are most suitable for producing high intensity of multiply charged ions and therefore, preferred as an injector in high energy particle accelerators. In fact there exists some ECRIS based implanter/low energy facilities for conducting research in materials science, atomic and molecular physics [2–4]. A cylindrical vacuum chamber consisting of multi-pole magnets around it and two solenoids at its ends, RF power injector and gas feed systems are essential components of ECRIS. The electrons gyrating in a magnetic field gain energy from the input RF wave via ECR and the plasma is formed by the step-by-step electron impact ionization. In the past few decades, a significant progress has been made to enhance the performance, mainly with the better understanding of of plasma and advancement in the magnetic field technology for its confinement. With the frozen design of the source, some additional techniques are also employed to further increase the intensity of highly charged ions. [5].

The gas mixing technique has been found to be very effective to boost the intensity of the highly charged ions in many folds (3–4 times) [6]. In most studies of gas mixing effect, He gas is chosen for lighter masses (such as O, N, Ne etc.), whereas O and N are used for heavier masses (Xe, Ar,

Kr) [3, 7–12]. However, till now, there is no empirical rule for selecting a suitable gas for mixing purposes in a specific system. The gas mixing effect is mainly explained by the ion cooling model [13] and lowering a plasma potential [14]. These two processes decrease the ion temperature resulting a longer confinement time. However, a numerical simulation performed by Mironov et al. [15] showed that the ion temperature (T_i) actually increases in parallel with the potential dip ($\Delta\phi$), however $\Delta\phi/T_i$ is always higher, following the overall ion confinement. Further, low frequency noise observed in the plasma due to instabilities and parametric decay of high frequency wave affect the ion dynamics by the process of selective ion heating [10, 16]. Due to the limited database of gas mixing experiments; it is very difficult to understand the ion behavior in the plasma and a consistent generalised model still needs to be established.

In present studies, we have recorded the charge state distributions (CSD) of Carbon (C) and Oxygen (O) in pure and Helium (He) mixed (at different %) CO_2 ECR plasma and touched upon various aspects of ion behaviour. Further, the extracted and analysed ion beams from ECR plasma are used for ion-matter interactions studies.

FACILITY DESCRIPTION

The Low Energy Ion Beam Facility (LEIBF) at IUAC, New Delhi, India [17] is a compact accelerator that has been functioning continuously for more than two decades, providing ion beams of energy ranging from tens of keV to a few MeV for diverse materials science and atomic molecular physics experiments. The schematic of the facility is shown in Fig. 1. The LEIBF consists of mainly a 10 GHz all-permanent-magnet ECR ion source, RF power and gas feed systems, efficient ion extraction system and an Einzel lens. All these components along with electronics and vacuum pumps are placed on a high voltage platform ($V_{max} = 400$ kV). These are powered by using an isolation transformer (10KVA) and controlled by the fibre-optic communication. The ions extracted from the plasma are further accelerated using a general purpose tube (GPT) having electrostatic field gradient. The pre-analysis section of LEIBF consists of electromagnetic lenses, a Faraday cup, a beam profile monitor and a double slit. For the analysis of ion beam in energy and momentum, a large analyser-cum-switching dipole magnet ($B_{max} = 1.4$ T) is used. For experiments, three beam lines at 75° , 90° and 105° equipped with proper beam line components, are available. The ions extracted from the plasma are transported to experimental chamber at the end of each beam line by focusing and steering those using electromagnetic lenses. All ion source and beam line

Application of Particle and Laser Beams in Materials Technology P. Misaelides, 1995-01-31 The development of advanced materials with preselected properties is one of the main goals of materials research Of especial interest are electronics high temperature and superhard materials for various applications as well as alloys with improved wear corrosion and mechanical resistance properties The technical challenge connected with the production of these materials is not only associated with the development of new specialised preparation techniques but also with quality control The energetic charged particle electron and photon beams offer the possibility of modifying the properties of the near surface regions of materials without seriously affecting their bulk and provide unique analytical tools for testing their quality Application of Particle and Laser Beams in Materials Technology provides an overview of this rapidly expanding field Fundamental aspects concerning the interactions and collisions on atomic nuclear and solid state scale are presented in a didactic way along with the application of a variety of techniques for the solution of problems ranging from the development of electronics materials to corrosion research and from archaeometry to environmental protection The book is divided into six thematic units Fundamentals Surface Analysis Techniques Laser Beams in Materials Technology Accelerator Based Techniques in Materials Technology Materials Modification and Synchrotron Radiation *Ion-Solid Interactions* Michael Nastasi, James W. Proceedings Introduction

Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings Offers a diverse range of free eBooks across various genres. Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings, especially related to Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings books or magazines might include. Look for these in online stores or libraries. Remember that while Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or

publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings full book, it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings eBooks, including some popular titles.

FAQs About Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings Books

What is a Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Lowenergy Ion Beam And Plasma Modification Of Materials Vol 223 Materials Research Society Symposium Proceedings PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing

PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
