Lq Lovers Quotient:

Conjugal Spirituality Mary Anne McPherson Oliver, 1994 Mary Anne Oliver develops an alternate to celibate religious practices drawing from the experience of couples and diverse sources in the Christian tradition This work explores the dynamics of conjugal love *Love to Learn* Isabelle C. Hau, 2025-02-11 The most important aspect of early childhood in general and education in particular is the quality and care of the relationships a child forms Love to Learn shows how to build and develop these relationships and unlock every child's true potential Early relationships are the key to healthy brain development resilience and lifelong flourishing Children need to be loved to be valued to interact and to be listened to When children have the space and time to play and explore through nurturing positive relationships then children learn But loving relationships are precisely what so many children are missing and modern factors are making it more difficult for children to build these necessary bonds Kids are growing up in smaller families with fewer siblings and in more single parent households They have fewer adult family friends and mentors They have less contact with grand parents and grand adults They spend 60% less time with friends than children did a decade ago They play outside less half the time spent by their parent's generation They find themselves increasingly immersed in solitary realms of screens a modern sanctuary where parents seek refuge as well Many kids are so overscheduled they have less time to build friendships Love to Learn offers a vision for a future where learning is relational and love is a literacy It is a provocative paradigm shift from child centered education to relationship centered learning It weaves in stories of perseverance empathy creativity and showcases innovations anchored in the latest neuroscience and technology advance all driven by the desire to unlock the inherent human potential in any child This hope filled book seeks to change how we raise our children how we run early learning environments and how we construct care full communities It aims to inspire and engage readers catalyze new solutions and in doing so change our understanding of childhood itself **The Art of Compassionate Business** Bruno R. Cignacco, 2023-12-01 There are several well ingrained assumptions regarding the dynamics of work and business activities which can be refuted Some examples of these widespread assumptions in business and work environments are employees being viewed as commodities competitors perceived as threats companies resources seen as limited and customers perceived as scarce and difficult All this leads to the question Is there a way to perform business activities more humanely The second edition of this book challenges the reader to change the way they perform in business situations and become more focused on the human aspects of business activities The users of this knowledge and those affected by them will undergo a profound transformation in the way they perform business activities They will benefit from gradually testing and implementing the guidelines conveyed in this book both in the business environment and in the workplace When readers put these principles into practice positive ripple effects are bound to affect other stakeholders of the organisation they work for or own The author has refreshed all the concepts and examples introduced in the first edition which include aspects related to mission and vision passion business mindset organisational

learning improvement of business conversations use of constructive criticism and betterment of relationships with the most relevant stakeholders customers suppliers intermediaries community employees etc The author also includes a discussion of creativity and the innovation process as well as other relevant aspects related to a healthy business environment and provides various real life examples of companies which have adopted a loving attitude towards their stakeholders which has become so important in the current business environment Sweethearts for a Lifetime Wayne A. Forthcoming Books Rose Army,1988 Coming Out of the Illusion Christopher Link,2020-04-13 There comes a time

when being terribly lost without a clue and having the proverbial black cloud over one's head must come to an end. It doesn't matter how screwed up your life has been with a rough childhood or now as an adult I have learned that our life experiences no matter how terrible don't have to shape who we are or who we become. For instance I personally was in and out of foster homes from about age four to eighteen. I had to overcome tremendous obstacles to bring this book to you. The number one lesson for everybody is: When you get knocked down get up again and stand a little taller than you did before until your foundation is unbreakable. Something More where is it? I think everybody at one point or another has asked themselves this. Looking up at the stars in wonderment at a very young age is where it all begins. All beings are aware of their surroundings and figure out really quickly something is wrong here on this beautiful planet Earth. There are plenty of indicators such as Violence and war domination and hate racial profiling and human suppression working for survival and fighting over resources and or the need for money debt creation. These things are part of our collective third dimensional consciousness and are no longer necessary as we advance mature together. So what are we looking for? What is the true reality? How can we better ourselves? How do we awaken to and find our true self again? Where is the love joy grace morals compassion unity we know are the truth behind this existence? The most important question for us all to ask ourselves is: How do we break through the false reality that we have created for ourselves and the planet and keep our light shining never to be hidden under veils of illusion again? We will explore this thing called life through our own self realization together and find some answers to these questions.

Methuselah's Zoo Steven N. Austad, 2023-08-15. Stories of long lived animal species from thousand year old tubeworms to 400 year old sharks and what they might teach us about human health and longevity. Opossums in the wild don't make it to the age of three, our pet cats can live for a decade and a half, cicadas live for seventeen years spending most of them underground. Whales however can live for two centuries and tubeworms for several millennia. Meanwhile human life expectancy tops out around the mid eighties with some outliers living past 100 or even 110. Is there anything humans can learn from the exceptional longevity of some animals in the wild? In Methuselah's Zoo Steven Austad tells the stories of some extraordinary animals considering why for example animal species that fly live longer than earthbound species and why animals found in the ocean live longest of all. Austad the leading authority on longevity in animals argues that the best way we will learn from these long lived animals is by studying them in the wild. Accordingly he proceeds habitat by habitat examining animals that spend most of their lives in the air comparing insects birds and bats animals that live on and under the ground from mole rats to elephants and animals that live in the sea including quahogs carp and dolphins. Humans have dramatically increased their lifespan with only a limited increase in healthspan we're more and more prone to diseases as we grow older. By contrast these species have successfully avoided both environmental hazards and the depredations of aging. Can we be more like them?
