Lucretius Selections From De Rerum Natura:

The Nature of Things Lucretius, 2007-07-26 Lucretius poem On the Nature of Things combines a scientific and philosophical treatise with some of the greatest poetry ever written With intense moral fervour he demonstrates to humanity that in death there is nothing to fear since the soul is mortal and the world and everything in it is governed by the mechanical laws of nature and not by gods and that by believing this men can live in peace of mind and happiness He bases this on the atomic theory expounded by the Greek philosopher Epicurus and continues with an examination of sensation sex cosmology meteorology and geology all of these subjects made more attractive by the poetry with which he illustrates them

Lucretius Titus Lucretius Carus,1921 *On the Nature of Things* Lucretius,2015-04-24 Pleasant it is when over a great sea the winds trouble the waters to gaze from shore upon another s great tribulation not because any man s troubles are a delectable joy but because to perceive you are free of them yourself is pleasant On The Nature of Things De Rerum Natura stands with Virgil s Aeneid as one of the vital and enduring achievements of Latin literature Lost for more than a thousand years its return to circulation in 1417 reintroduced subversive ideas about the nature and meaning of existence and helped shape the modern world *Lucretius: On the Nature of Things* William Benton (Publisher),1952 Lucretius On the Nature of Things Translated by H A J Munro The Discourses of Epictetus Translated by George Long The Medications of Marcus Aurelius Translated by George Long *On the Nature of Things* Lucretius,2013-12-14 Titus Lucretius Carus c 99 55 BC was a Roman poet and a follower of the Epicurean tradition His major work De rerum natura On the Nature of Things is held as a masterpiece of ancient poetry This is a didactic poem that also provides a comprehensive view of Epicurus philosophy the supposed structure of the Universe the origin and evolution of the world how life and civilization developed and what the lot of humanity is in this world created by chance and necessity in the blind dance of the atoms The world of Epicurus does not

need a divine creator or any divine intervention Lucretius argues that the gods exist but that they have nothing to do with our world or the humanity The philosophy is practically atheistic and as such it was suppressed during the Middle Ages From Epicurus own hand only a few fragments and letters managed to survive the Middle Ages Therefore it was a major event when the humanist Poggio Bracciolini discovered Lucretius forgotten poem in a German monastery in 1417 For philosophers and intellectual innovators of the Renaissance there were suddenly an original and sophisticated system as an alternative to the natural philosophy of Plato and Aristotle taught in scholastic Europe De rerum natura was what may be described as a bible for the scientific revolution The idea of atoms the infinite universe and the plurality of worlds and that mechanical cause and effect lies behind every natural phenomenon all this was expressed here Also Galileo s laws of motion are in their infancy in the poem centuries before Christ Epicurus and Lucretius already understood that an object in motion will continue to move forever unless something intervene and that a heavy object does not fall faster than a light one De rerum natura is considered to provide a fairly unadulterated picture of the Epicurean philosophy since the differences are insignificant when compared to Epicurus own fragments and letters It is published here in a classic 1916 translation by the American poet William Ellery Leonard 1876 1944 *Selections from Lucretius* Titus Lucretius Carus,1889
