**Landscapes of Mobility** Jennifer Johung, 2016-04-22 Our world is unquestionably one in which ubiquitous movements of people goods technologies media money and ideas produce systems of flows Comparing case studies from across the world including those from Benin the United States India Mali Senegal Japan Haiti and Romania this book focuses on quotidian landscapes of mobility Despite their seemingly familiar and innocuous appearances these spaces exert tremendous control over our behavior and activities By examining and mapping the politics of place and motion this book analyzes human beings embodied engagements with their built world and provides diverse perspectives on the ideological and political underpinnings of landscapes of mobility In order to describe landscapes of mobility as a historically socially and politically constructed condition the book is divided into three sections objects contacts and flows The first section looks at elements that constitute such landscapes including mobile bodies buildings and practices across multiple geographical scales As these variable landscapes are reconstituted under particular social economic ecological and political conditions the second section turns to the particular practices that catalyze embodied relations within and across such spaces Finally the last section explores how the flows of objects bodies interactions and ecologies are represented presenting a critical comparison of the means by which relations processes and exchanges are captured depicted reproduced and re embodied

**Body Architecture** Andrew Patrizio, Bradley Quinn, Jade Dellinger, 2003      **It's Not Personal** Susan Best, 2021-06-17 How does something as potent and evocative as the body become a relatively neutral artistic material From the 1960s much body art and performance conformed to the anti expressive ethos of minimalism and conceptualism whilst still using the compelling human form But how is this strange mismatch of vigour and impersonality able to transform the body into an expressive medium for visual art Focusing on renowned artists such as Lygia Clark Marina Abramovic and Angelica Mesiti Susan Best examines how bodies are configured in late modern and contemporary art She identifies three main ways in which they are used as material and argues that these formulations allow for the exposure of pressing social and psychological issues In skilfully aligning this new typology for body art and performance with critical theory she raises questions pertaining to gender inter subjectivity relation and community that continue to dominate both our artistic and

Art Theory for a Global Pluralistic Age Steven Félix-Jäger,2019-12-02 This book extends a theory of art that addresses the present era's shift towards global pluralism By focusing on extrinsic rather than intrinsic qualities of art this book helps viewers evaluate art across cultural boundaries Art can be universally classified by an evaluation of its guiding narrative and can be understood and judged through hermeneutical methods Since artists engage culture through various local transnational and emerging global narratives it is difficult to decipher what standards are used for evaluation and which authoritative body evaluates the work This book implements a narrative hermeneutical approach to properly classify an artwork and establish its meaning and value

**Routledge Handbook of Sustainability and Fashion** Kate Fletcher,Mathilda Tham,2014-08-21 The clothing industry employs 25 million people globally contributing to many livelihoods and the

prosperity of communities to women's independence and the establishment of significant infrastructures in poorer countries. Yet the fashion industry is also a significant contributor to the degradation of natural systems with the associated environmental footprint of clothing high in comparison with other products. Routledge Handbook of Sustainability and Fashion recognizes the complexity of aligning fashion with sustainability. It explores fashion and sustainability at the levels of products, processes and paradigms and takes a truly multi-disciplinary approach to critically question and suggest creative responses to issues of Fashion in a post-growth society. Fashion diversity and equity, Fashion fluidity and balance across natural, social and economic systems. This handbook is a unique resource for a wide range of scholars and students in the social sciences, arts and humanities interested in sustainability and fashion. **Fashion: Exploring Critical Issues**

,2020-05-18 This ebook is an interdisciplinary collection of topics representing conventional and unconventional approaches to fashion studies, exposing a wide variety of methodological perspectives from fields including anthropology, history, art history, sociology and material culture. **Art in Consumer Culture** Grace McQuilten, 2017-07-05 Written with beautiful clarity, *Art in Consumer Culture* asks the contemporary art world to be honest about the pervasive effects of commodification and the difficulty of staging critique. The book examines the collusion of art and design in contemporary artistic practices in order to find avenues of critique in a commercially driven cultural landscape. Grace McQuilten focuses on the work of Takashi Murakami, Andrea Zittel, Adam Kalkin and Vito Acconci, four contemporary artists who claim to be working in the field of design rather than the traditional art world. McQuilten argues that Zittel, Acconci and Kalkin engage with design only to reactivate the critical practice of art in a more direct engagement with capital and conceives of and affirms a future for art outside of the art world as a parasite in the complex beast of late capitalism. This book is an important and timely provocation to a cynical and apathetic consumer culture and a call to arms for creative freedom and critical thought.
